After the confirming of the minutes of the last meeting the master's address was presented by Worthy Master Bro. Henry Glendinning. In the sections of the Province of Ontario where spring wheat was principally sown, the crop had been poor, with the price to such an extent that it is not likely to be profitable to continue the cultivation of the six-rowed varieties that are used by the American malister. The increased tariff was also a severe blow to the horse and egg trade of our country. The cheese industry had paid well, and there was a demand for much more than could be supplied at present. Large sections of the country that have few or no factories woul

smoothed out if about two-thirds of an average salary for each teacher in the township were levied upon the whole municipality, thus giving parents the privilege to send their children to the nearest school. The address concluded with a pleasant reference to the continued success of the Guelph Agricultural College. SECOND DAY—WEDNESDAY.

As adopted it set forth that wheat had been raised at a disabisavatage during the past few years, and farmers were recommended to give stock-rising and dairying their attention. The cause of the unprofitableness was in the poorness of the soil, which stockraising would help to enrich. The last clause of the report was as follows: "We are sorry to note that our American cousins have imposed such a high duty under the McKinley Bill on much of our produce for the sale of which we have to go to their markets. Chiefly among these articles are horses, fat stock, barley, eggs, etc. We would also further say that we hope the time will come when the barriers of high tariff shall be broken down and trampled under foot, and we think that it would be a time for great rejoicing among the farmers.
