Tell-Tale Figures Regarding Tariff Exactions.

What the Canadian Consumer Loses by the Trade Restriction Policy.

To the Editor of the ADVERTISER:

The census bulletin devoted to the exposition of our progress in manufactures during the past ten years shows that the town of Petrolea has the highest record of all Canadian towns and cities as regards output per head, it reaching the figure of \$455, though ten years ago it was \$496. Petrolea naturally feels somewhat proud of her high standing, and the oil magnates are preparing a grand reception for the Dominion Ministers to show their appreciation of the National Policy, which imposes on American oil a duty which is higher than the price the oil sells for in the States. The duty is eight cents per gallon. This is a good thing for the oil producer, but what is sauce for the goose is not always sauce for the gander, as can be shown. While the Ministers and their friends fellicitate one another at the Petrolea demonstration, they might be invited to consider the following:

Umbrella No. 1-I am in great trouble

The entries in every department exceed those of any previous year, and the offices of the association on King street east are crowded all day with exhibitors, necessitating a good deal of night work on the part of the attendants. It is going to be the best Fair ever held in Toronto, and that is saying a good deal. The Northwest, Manitoba and British Columbia will make a grand show, the exhibits from those distant parts of the Dominion being now en their way east. Special excursion rates will be given by all roads, good for several days, and no farmer in Western Canada should miss seeing this great exhibit on.
