Mothers Unveiled Stone Three Years Ago Tomorrow

Lorne Avenue Mothers' Club First To Erect War Memorial.

Three years ago tomorrow an in-teresting little ceremony was held at the Lorne Avenue School. It was a Sunday afternoon; crowds gathered about the school and sought places of vantage on the near-by verandas; children's voices were raised in pat-riotic song. And all because it was the solemn occasion of the unveiling of the first war memorial stone to be erected in the playground of a

city school.

The stone which stands today in the school yard a witness to that event is a large unrounded boulder, lifted on a base of irregular stones. On it a tablet of bronze glistens in the sun. And on the tablet are inscribed the 23 names of former pupils who paid the supreme sacrifice in the war. An inscription above the names reads: "He lives in fame that

dies in virtue's cause."

The members of the Lorne Avenue Mothers' Club, and the teachers and children of the school are proud of the fact that their energetic efforts more than three years ago, put the Lorne Avenue School in the honored position of being the first school to

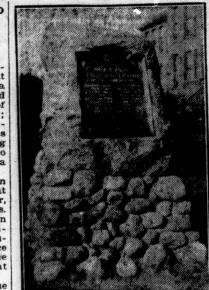

erect a monument to its fallen pupils The ceremony was conducted by the Rev. G. Q. Warner, As he ut-tered the solemn dedicatory words, little white clad school-girls pulled the flag which then concealed the stone. There was no hint of sadness in the ceremony. The dedication service seemed rather a festival of The presentation of the monument

ARE COLD FOODS COOLING IN HOT WEATHER?

That depends upon their composition. A cold food, after it is digested, may be very heating to the blood and a very hot tasting food may be cooling to it, depending upon whether food is acid forming or alkaline in nature. There is no difference in the blood temperature from either, acid-forming foods give one hot, "all in" feeling, while alkaline foods give one the clear brain and erect, energized body that disregards the hottest day. That is because the blood is naturally alkaline and alkaline foods keep it so, while acid foods turn the blood acid, which burns up and destroys the vitalizing elements of the blood and mental and physical energy must run down. Acid foods are white flour, refined cereals, meats, fats and white sugar, sweets. Alkaline cereals are whole grains, milk, beans, peas, green vege-
