

The Weekly British Colonist and Chronicle.
Saturday, September 19, 1868.

Agricultural.

At the present moment, when the subject of agriculture is occupying so much attention in this Colony, and when we are encouraging the idea of Confederation with the Dominion of Canada, chiefly with the view of drawing immigration thence over the proposed new route, it would not be out of place to enter into some particulars as to the state and prospects of agriculture in British Columbia as compared with Canada and Oregon, and to point up what advantages we have to offer in this respect to intending settlers, that might reasonably induce them to choose this Colony in preference to other localities. It will be admitted on all hands that the climate, both of the mainland and Vancouver Island, is unrivalled; and is much more healthy and equable, i. e. not subject to the variation of intense heat and cold incident to Canada, nor to the sultry fever and ague atmosphere of the Columbia river. Our climate is moreover very suitable to the growth and harvesting of cereals; stock are enabled to stay out the whole winter, not only without detriment, but in almost every instance with advantage, one winter only in seven being severe enough to require the partial feeding of stock from February to March. But it is chiefly to the growth of cereals that we must look with confidence for the prosperity of the agriculturist in this Colony. In Canada the value of a bushel of wheat is \$1.25, the cost of raising it about 50 cents a bushel, whilst flour is worth \$6 a barrel. In Oregon wheat is now worth 70 cents a bushel, the cost of raising it, is 60 cents a bushel, and flour is worth \$6 a barrel. In Vancouver Island, wheat is worth at least \$1.50 a bushel, the cost of raising is about 60 cents, and flour commands a steady sale at \$9 to \$10. On the mainland, upper Fraser, wheat is worth \$3.60 a bushel, the cost of raising is about \$1.50, and flour sells at \$18 to \$24 the barrel. For the sake of illustrating the point we desire to establish, we will take the example of the usual sized farm in these parts, viz., 160 acres, and presume it is sown with wheat, and from the above figures calculate the result that would ensue in each country, deducting thence the superior advantages of farming in Vancouver Island, or the mainland as against Oregon and Canada.

Acres	Yield per acre	Result	Value at \$1.25 per bushel	Cost of raising at 50 cents per bushel	Profit.
160	20 bushels	3200 bushels	\$4000	\$1600	\$2400
160	30 "	4800 "	\$6000	\$2400	\$3600
160	40 "	6400 "	\$8000	\$3200	\$4800
160	50 "	8000 "	\$10000	\$4000	\$6000
160	60 "	9600 "	\$12000	\$4800	\$7200
160	70 "	11200 "	\$14000	\$5600	\$8400
160	80 "	12800 "	\$16000	\$6400	\$9600
160	90 "	14400 "	\$18000	\$7200	\$10800
160	100 "	16000 "	\$20000	\$8000	\$12000

It will be thus apparent from a comparison of the total and profits that a marked superiority exists in favor of farming in Vancouver Island or the mainland, over Canada or Oregon. We may state that the figures used in this statement have been carefully compiled from blue books and other official sources, and will be found at least, in the only particular where a doubt could exist, viz., the cost of raising per bushel, comparatively, if not actually, correct. We would earnestly call the attention of the public to these returns, for although it is impossible to state what the actual profits of any farmer would be on 160 acres of wheat, yet it is at once apparent that the profits are far larger in our own Colony than in either Oregon or Canada.

Bartholomew Corbin.—A man in San Francisco has made for exhibition at the Mechanics Fair an earthenware coffin, and for which he has taken out a patent. The idea is certainly not original as the patentees for something very like it in practice amongst the Romans. These coffins have the merit, however it is said, of being handsome, light and cheap; but these qualities would not compensate for the inconvenience they would soon cause, in every cemetery where they would be generally used.

Assault Case—Police Court.

This Court was occupied for several hours yesterday in hearing the cross cases of assault between Howard vs. Tarte, and Tarte vs. Howard. As we have already said, the case sprang out of the recent charge of smuggling made against Howard, which, as reported, was sent to a superior court. In the case of assault, it appears the parties were on the wharf at Esquimalt, at the time of the leaving of the Captain of the ship Phoenix, when Howard said 'good-bye' Captain, take care of informers! These offensive words were decided to have reference to Tarte, who was standing by at the time, and who was accused of having given the information against Howard for smuggling, and finally led to a scuffle. The evidence was very contradictory as to the exact nature of the assault. Howard alleged no blows were struck, and his statement was supported by two respectable witnesses, Mr. Stewart and Mr. Liddell. Tarte alleged he received two blows in the face, and his statement was sworn to by Col Foster and Mr. Wilby, who had a better opportunity of seeing them given, than Messrs Stewart and Liddell. In summing up, His Lordship thought the aggression lay with Howard, because Tarte was, and is still employed by the Customs, and it was his duty, and the duty of every citizen, to give information of smuggling coming to their knowledge, and thus he could in no wise be regarded in the light of a common informer, which the offensive words of Howard were evidently intended to mean. Tarte, moreover, distinctly swore in his evidence, that he did not first give the information to the Customs Officers, nor did any of his family; that, in fact, he knew nothing about the smuggling until he heard of it from Mr. Wyke. His Worship further regretted these constant squabbles amongst the residents of Esquimalt, who, in spite of his advice, kept coming before the Police Court. Both parties in this case had previously been before him on a separate charge of a similar nature, and it showed the existence of a bad spirit in their little town. As Tarte was employed by the Customs, which would render any information he might give that department, right and proper, it was His Worship's duty to support Tarte, and he should therefore fine Howard \$25, or in default of payment, three months imprisonment. The Attorney General appeared for Tarte, and Mr. Bishop for Mr. Howard. In connection with this case, the Attorney General stated in court, that he should feel it his duty to follow up all cases where officers or employees of the Customs were interfered with in the performance of their duty, and he was desirous of the publication of the 25th clause of the Consolidated Customs Act, which declares the penalty of such offences. It is as follows: 'If any person shall by force or violence, assault, resist, or obstruct any officer of the army or navy, or marines, being duly employed for the prevention of smuggling, and on full pay, or any officer of Customs, or excise, or other person duly employed for the prevention of smuggling in the due exercise of his or their duty, or any person acting in his or their aid, every person so offending, being convicted thereof, shall be transported for seven years, or sentenced to be imprisoned in any House of Correction or Common Gaol and kept to hard labour, for any term not exceeding three years, at the discretion of the court before which each offender shall be tried and convicted as aforesaid.'

NANAIMO, WESLEYAN CHURCH.—On Sunday last, the Rev. T. Derrick, who was at Nanaimo for a few days en route to Cariboo, preached two eloquent discourses to unusually large congregations. The Presbyterian congregation, with their Pastor, the Rev. R. Jamieson, attended the evening service, as a mark of sympathy and respect for this popular Cariboo missionary. On Monday night a tea meeting was held in the School-room, and afterwards a public gathering in the Church, for the purpose of welcoming the newly-arrived Pastor, the Rev. E. White, and also to hear an address from Mr. Derrick. An opening speech from Mr. White, to whom a congratulatory welcome was given by Mr. C. Bryant, on behalf of the Church, and the Rev. Mr. Derrick's speech, rich in oratorical beauty and power, followed by a few appropriate remarks of fraternal greeting by the Rev. R. Jamieson, made it altogether an occasion of intellectual enjoyment and Christian sociality not soon to be forgotten by those who were present.

The steamer Sir James Douglas returned from Comox, Nanaimo and other way ports yesterday evening. At Comox, as in other districts, the crops are splendid. At Nanaimo, a large surplus of coal is being raised for the ships soon to arrive there, so that their detention will not be so long as usual. She did not bring much freight down, but she had about twenty passengers, amongst whom were Messrs. Trutch, Pearce, Nicol, Jamieson, Sabiston and several ladies. She reports that Capt. Roys' whaling party left Nanaimo last Wednesday morning. The body of John Holder recently drowned at Comox, was brought down on the Douglas for interment by the Independent Order of Odd Fellows.

LADY BARBERS.—The best results we have known from the teaching of the 'Womens' Rights Apostles, appear in the fact that for the future we are to have lady barbers. Six young and fascinating barbers are about opening a splendid establishment in New York, to be managed by themselves. Think of that ye hirsute brutes who do not shave. No more sense of degradation in having one's nose pulled, and having one's neck twisted half out of joint. Then the shampooing by divinities must not be overlooked. The millennium has come at last. Oh Moses! the union of beauty and bristles, loveliness and lather; that's the doctrine by which to redeem the country, and we feel it our duty to support it. The age of beards is gone.—*Am. Paper.*

THE CHAIN-GANG.—The body of men detailed by the Commissioner of Lands and Works for the thorough cleansing of our streets, have about completed that work and done it well. The improvement in the appearance of the streets speaks for itself; and will, it is to be hoped, inspire a determination to perform some other little works round the city, in which the public have an interest.

ACCIDENT.—A man known as "Dutchy," who lives on Store street, was thrown from a buggy yesterday on Yates street, and had his knee severely hurt. The shying of a young horse caused the accident; considerable damage was done to the vehicle. Dr. Powell was called in professionally; the injured man was afterwards sent to the hospital, under care of Dr. Dickson.

THE STEAMER ENTERPRISE left at 6 o'clock sharp for New Westminster yesterday morning, with 80 tons of freight and between twenty and thirty passengers, including the Delegates to the Yale Convention. The Enterprise will return at an early hour this morning in order to assist in discharging the cargo of the Princess Royal.

DISSEMINATION.—We have been requested to say it was not on the farm of Mr. Williams, the Livery Stable keeper, that the Navy deserters were recently apprehended. As they were in plain clothes, however, no blame could be attached to any farmer hiring them to work.

THE LAST OF THE MOHICANS.—Yesterday the remainder of the Hydash shanties on the other side of the Bay were destroyed by fire. From the number of Indians leaving for other parts, there has been quite a lively trade in blankets for a few days past. Emigration still continues.

PANDORA STREET WESLEYAN CHURCH.—In consequence of a severe indisposition of the pastor, newly arrived—Rev. Mr. Rhea, the pulpit will be filled on to-morrow by the Rev. Mr. Somerville. Service will commence at 12:15.

A Public Market. Editor COLONIST,—Among the many wants from which the good City of Victoria at present labors, I know of none so great as that of a Public Weekly Market.

In England, if a farmer has any produce to dispose of, he wends his way on the appointed day to the nearest market, buyer and purchaser are thus brought face to face, prices are discussed and ready sales effected. But mark the difference here; suppose a farmer has a ton of potatoes, a dozen of pigs, 100 bushels of wheat or barley, an orchard of fruit to dispose of, he has to run round the whole country before he can find a sale, while those who are wanting to purchase the self-same articles, have to run from farm to farm in search of them; may be, crossing on their road a dozen times the person who is trying to sell. What wonder then, that merchants import from a foreign country at a high price, paying the customs duties on them in addition? The very articles that lie rotting in Vancouver Island for want of a purchaser, though superior in quality. I can testify to the fact, that last year the fruit laid and rotted in the neighborhood of Victoria, while the merchant was seeking an inferior article from a foreign locality. Now all this might be cured, and a lasting benefit conferred on the community by the establishment of a proper market, and I venture to recommend this subject to the consideration of those who desire the prosperity of the country, as I could recommend many other subjects, yet, even in preference to Convention, or the almost thread-bare topic of officialdom.

What, to my mind is required, is a suitable building, in a proper locality, capable of being enlarged at any time, in which producers and purchasers could meet once a week to settle prices and offer produce. To this might be attached, under the same roof, an actual daily sale market for fish, meat, vegetables &c., limited in extent at first, but also capable of enlargement as circumstances might require. I trust no one will call me to order with the mention of a market having been once established here and having failed; managed as it was, it never could have succeeded, and it was moreover, only a daily sale market, and the era of farming had not begun. It would of course be necessary, actually to interest every farmer in the Colony in the undertaking. I estimate that \$5000 would cover all necessary expenditure in the first place, this divided into 250 shares of \$25 each would I am certain, be eagerly taken up and prove highly remunerative, given proper and economical management, and I don't think there would be one farmer in Vancouver Island who would not be a shareholder. Farmers would thus see some prospect of ready sales, and not have to make a day's journey to sell a pig. Merchants would be enabled to learn at a moment's notice what was really to be had in the Colony, and would not be driven across the Sound to buy what is actually within arms length; and last, but not least, the community at large would benefit by the increased prosperity of her farmers, and the capital saved to ourselves, which now enriches our neighbours.

Yours,
A LOVER OF PROGRESS.

Cariboo Mining Intelligence.

(From the Cariboo Sentinel, Sept. 2.)

WILLIAM CREEK.
The low stage of water in all the creeks has put a stop to a great number of the paying claims. The returns, therefore, will foot up far below the average amount for the season. The wash ups for the week were: The Baldhead co. 180 oz.; Barker co. 29 oz.; Lilloet co. 35 oz.; Mosher co. 20 oz.; Cariboo co. 53 oz.; California co. 10 oz.; Tyack co. 95 oz.

STOUT GULCH.

The Macho Oro co. 30 oz.; Jenkins co. 65 oz.; Taftvale co. 145 oz.; Alturas co. 50 oz.

CONKLIN GULCH.

The Reed co. washed up 32 oz.

MOSQUITO CREEK.

We failed to get our regular report from this creek, and also from Red gulch. Very little, however, is being done, on account of the scarcity of water. The Minnehaha took out about 200 oz.; and the Hocking also had a good wash up. The Hiawatha had for the week 30 oz.

LOWEE CREEK.

The Calaveras co. washed up 60 oz. One other co. getting small pay.

MARTIN GULCH.

The Tryagain co. and the New Brunswick co. are still getting good pay.

BEES GULCH.

Four co's working, but one only is getting pay.

RICH GULCH.

Four co's prospecting; no pay yet.

HARD SCRABBLE CREEK.

Hilton & Co. are pushing on with their tunnel, and many eyes are turned in that direction as being a point which will decide the mining value of an extensive country.

GROUSE CREEK.

The Bed-rock Flame co. washed up for the week 140 oz. The Ne'er-do-well co. 92 oz. Gannett bottomed their first shaft and found the bed-rock pitching. They have commenced a second shaft and are down about 30 feet. The Hard-up are still drifting across the channel, with no new developments. Lund & Co. are getting about an ounce to the hand. Little else is now doing, for want of water.

GAYET RAVINE.

The claims are all paying, but much less than usual, on account of the scarcity of water.

ANTLER CREEK.

Alex. Porter's co. making wages. Two other men below making pay. Murphy's co. making good wages. Harkin co. washed up for the week 104 oz.; one piece weighed \$36. The Johnson co. Boyd & co. and the McBride co. are all making good wages.

HORSEFLY CREEK.

Several men prospecting, some making small wages.

CEDAR CREEK.

Anron co. making good wages, but water short. Barker taking out good pay out of the old Discovery claim.

FORKS AND CHINA CREEK.

Several companies are making good wages at the Forks and China creek is paying well.

KATHLEEN CREEK.

Grotto co. taking out good pay. Cascade co. making wages. Several Chinese co's are making good wages.

HARVEY CREEK.

Owens, with a number of Chinamen, is making good pay. Nic Brady is running a tunnel, with a prospect. The Minnehaha co. have struck a good prospect, just below the falls.

LIGHTNING CREEK.
The Great Western co. have been sinking a large hole, about 40 feet square, but have not bottomed yet. The Lightning co. have sunk a shaft, set sluices and dump-box and commenced a drift for a supposed bench, on which they expected to find pay, but have been driven back by the slum. They now intend continuing their main drive up stream.

JAWBONE CREEK.

One company prospecting.

PETERS CREEK.

Things are pretty full at present, the reaction of the late excitement having commenced. No strikes have been made as yet; considerable prospecting going on.

BARFORD CREEK.

The Harvest co. bottomed their shaft and got a prospect. Commenced washing this week.

DAVIS CREEK.

Smeaton & Co. are at a standstill on account of the scarcity of water. Homeward Bound co. have struck a falls in the channel, which have impeded their progress. Moon Raker co. have succeeded in getting under the slum and are now drifting in blue clay, and are under cover 360 feet.

OUTLYING CREEKS.

Companies on Last Chance, Burns, Nelson and other small creeks are laying idle for want of water.

THE GRAND PROMOTERS OF HEALTH.

HOLLOWAY'S PILLS.

The grand secret of attaining happiness is to secure good health, without which life is stripped of its pleasure. The first irregularity of any function should be checked and set right by appropriate doses of these pills, which strengthen the system by thoroughly cleansing the blood from all impurities. They balance disordered action, remove the cause of disturbance and restore its normal and natural power to every organ, without inconvenience, pain or any other drawback.

Derangement of the Bowels, Liver and Stomach Complaints.

This medicine is so well known in every part of the world, and the cures effected by its use are so wonderful as to astonish every one. It is a permanent remedy for biliousness and liver complaints and derangements of the stomach and bowels, is no longer a matter of dispute or doubt. In these diseases the best effect of Holloway's invaluable Pills are permanent and extensive, that the whole system is renovated, the organs of digestion strengthened, and all and every accumulation of disease, both physical and moral are increased.

Determination of Blood to the Head.

This is generally occasioned by some irregularity of the stomach and bowels, which, if not quickly attended to, frequently terminates fatally. A few doses of the pills will never fail to give tone to the stomach, regulate the bowels, and thereby remove the cause of the disease of the head and other indications of approaching apoplexy, are entirely dispelled by a course of this admirable medicine.

The Female's Best Friend.

For all debilitating disorders peculiar to the sex, in every contingency, from the life of women, youthful or aged, married or single, this pill, so speedily and so successfully recommended by the authorities, will correct all functional derangements to which they are subject.

Scurvy and all Skin Diseases.

For all skin diseases, however inveterate, these medicines are a sovereign remedy. While the Pills act upon the blood, which they purify, the ointment passes through the pores of the skin, and every structure, as water saturates the soil or salt penetrates meat. The whole physical machinery is thus rendered healthy, regular and vigorous.

Coughs, Colds and Asthma.

No medicine will cure coughs of long duration or such as are settled upon the chest, so quickly as these famous pills. Even in cases where the first stage of asthma has appeared these Pills may be relied on as a certain and never failing remedy, particularly if the complaint be simultaneously well rubbed into the chest and throat.

Indigestion—Bilious Headache.

These complaints are sometimes considered trifling, but it should be borne in mind that by indulging in such subjects, they often end most seriously. Give early thought to a deranged stomach take Holloway's Pills, rub the celebrated ointment over the top of the stomach, and you will shortly perceive a change for the better in your digestion, spirits, appetite, strength and energy. The improvement, though it may be gradual will be thorough and lasting.

Holloway's Pills are the best remedy known in the world for the following diseases:

- Female Irregularities, Scarcity of Menstruation, Bilious Complaints, Dropsy, Rheumatism, Nephritis, Catarrhs of the Bladder, Stricture, Gonorrhea, Syphilis, Eruptions of the Skin, Itch, Scald Head, Ringworm, Tinea, Pimples, Bores, Ulcers, Hemorrhoids, Piles, Fistula, Cancer, Consumption, Inflammation, Jaundice, Liver Complaints, Lumbago, Dropsy, Pleurisy, Rheumatism, Nephritis, Catarrhs of the Bladder, Stricture, Gonorrhea, Syphilis, Eruptions of the Skin, Itch, Scald Head, Ringworm, Tinea, Pimples, Bores, Ulcers, Hemorrhoids, Piles, Fistula, Cancer, Consumption, Inflammation, Jaundice, Liver Complaints, Lumbago, Dropsy, Pleurisy, Rheumatism, Nephritis, Catarrhs of the Bladder, Stricture, Gonorrhea, Syphilis, Eruptions of the Skin, Itch, Scald Head, Ringworm, Tinea, Pimples, Bores, Ulcers, Hemorrhoids, Piles, Fistula, Cancer, Consumption, Inflammation, Jaundice, Liver Complaints, Lumbago, Dropsy, Pleurisy, Rheumatism, Nephritis, Catarrhs of the Bladder, Stricture, Gonorrhea, Syphilis, Eruptions of the Skin, Itch, Scald Head, Ringworm, Tinea, Pimples, Bores, Ulcers, Hemorrhoids, Piles, Fistula, Cancer, Consumption, Inflammation, Jaundice, Liver Complaints, Lumbago, Dropsy, Pleurisy, Rheumatism, Nephritis, Catarrhs of the Bladder, Stricture, Gonorrhea, Syphilis, Eruptions of the Skin, Itch, Scald Head, Ringworm, Tinea, Pimples, Bores, Ulcers, Hemorrhoids, Piles, Fistula, Cancer, Consumption, Inflammation, Jaundice, Liver Complaints, Lumbago, Dropsy, Pleurisy, Rheumatism, Nephritis, Catarrhs of the Bladder, Stricture, Gonorrhea, Syphilis, Eruptions of the Skin, Itch, Scald Head, Ringworm, Tinea, Pimples, Bores, Ulcers, Hemorrhoids, Piles, Fistula, Cancer, Consumption, Inflammation, Jaundice, Liver Complaints, Lumbago, Dropsy, Pleurisy, Rheumatism, Nephritis, Catarrhs of the Bladder, Stricture, Gonorrhea, Syphilis, Eruptions of the Skin, Itch, Scald Head, Ringworm, Tinea, Pimples, Bores, Ulcers, Hemorrhoids, Piles, Fistula, Cancer, Consumption,
