Local Chinese And the Crisis

Something About the Reform Movement in Aid of The Emperor.

The Local Association Watching Events With Keen Interest

The members of the Chinese Empire Reform Association, which has a branch in Victoria, are watching events in the Orient with keen interest. The officers of the local association are Yip Yen, president; Chang Chay, first vice-president; Yip Sang, second vice-president; Lo Chiung, recording secretary; Yip On, corresponding secretary; W. A. Cumpson, corresponding secretary.

Lo Pak Chiu, Chinese resident of Victoria, and a staunch supporter of the reform movement, expressed great concern to the Colonist reporter yesterday regarding the situation in Peking.

Asked as to what reform party is doing for China and the Emperor, the reporter stated that the Chinese in San Francisco, which in its issue of June 25, contained the following article:

"China gained her freedom through the loyalty and unselfish energy of the patriots, and the Chinese who have abandoned such ideas are making a strenuous effort to accomplish a similar result for their own country through the reformers. The rapid growth and development of this comparatively new organization is most satisfactory to the reasoning class of Chinese, and alarming to the reformers. It has ever been a thorn in the side of the privileged old order which is now the self-appointed ruler of the empire, which is pitted by her hostility toward all who favor reformers of state who have in any way severed their allegiance to the Emperor. She has taken upon herself to deprive all military and diplomatic officials who have been suspected of having the least sympathy for the reformers. The strange to relate, this system of coercion has only resulted in strengthening the love these patriots have always shown for their Emperor.

"This condition of affairs would not seem at all strange in any other part of the world, nor would it seem remarkable were any other people concerned. But it must be remembered that the Chinese are a people who for many centuries have been ground in the dust, not daring to utter the faintest protest against even petty local rulers, and now they are endeavoring to free their country from the grasp of the Emperor, who of the Emperor's imperial court and when the treaty was accomplished by Mr. Burlingame, 'this is a sorry day for China,' and for one in his indolent career this of croaker was correct in his forecast, so far as his China was concerned, for the birth of the new China, the China of the future, for which this band of brave fellows is making such a sacrifice.

"There seems no reason why the reformers should not succeed in this matter because they are doing the very thing which modern civilization has taught the Chinese. They are endeavoring to moderate the empire and teach their fellows to dissent and to dissent they are endeavoring to come in touch with the rest of the world. They are the people who do not believe in the old way of China, which is still considered the correct thing by many of the old school Chinese, and represents China as the central kingdom of the earth, with all the other nations dotting the ocean like a lot of insignificant islands of no particular consequence. Most of them have sailed across the ocean and personally bumped against these islands, only to find them rather important countries, ruled by powerful governments and defended by great armies.

"It may be argued that it has taken even these travelled Chinese a long time to discover that civilization was a thing to be emulated, which is so, but it must also be remembered that this is only another effect of centuries of abuse and ignorance, forced upon them by rulers so selfish that they cared little or nothing for the fate of their subjects. In fact, the immediate cause for the existence of the Reform party is the fact that for the first time in modern history, China has been fortunate enough to have a wise and honest ruler born on the throne, and just as he arrives at an age when he should consummate some of his ideas of reform, he has the old Dowager Empress, and with the help of her confederates, has the young monarch so completely shackled away that for some time it was a matter of speculation whether he still lived or had been destroyed by his political enemies.

"At the court stands to-day, the Reformers number at least five million staunch members living within the borders of the Chinese Empire, and it is estimated that at least seventy per cent. of all residents of Southern and Middle China are practically

White Horse a Busy Town

Mr. N. P. Shaw Says It is Building Up and Growing Rapidly.

The Yukon is Now High and Steamer Navigation is Good.

Mr. and Mrs. N. P. Shaw returned from the North on the Victorian yesterday morning. They came down on the City of Seattle as far as Port Townsend, where they took the Victorian for home. They went as far North as White Horse, which Mr. Shaw describes as a very busy town, and growing rapidly. Some very substantial buildings are being erected and the inhabitants regard the future of the place as assured, both because it is the main shipping point from rail to steamers, and because of the valuable copper mines that are being opened a short distance to the west of the town.

Mr. Shaw said that White Horse, the river was rising, and there was already plenty of water for all the steamers. The White Horse is a fine opening into the Sound, and there are seven other openings into the Sound. Following are the company's boats and their tonnage: "Canadian," 180; "Columbia," 180; "Valley," 180; "Sylbi," 180; "Yukoner," 250; "Baiter," 20; "Zealandia," 75; "Joseph Cloutier," 20; "Hudson," 100; "Columbia," 180; "Lightning," 180; "Sylbi," 180; "Light," 400; "Eldorado," 150; "Bonanza," 450; "Clifford," 180; "Hudson," 100. There are also other steamers on the river which are handling business, but those mentioned are directly engaged in the service of the railway company. The company also has engaged some that can handle 1,000 tons of freight. There were during the latter part of last week about 2,000 tons of freight being shipped to Dawson, and the railway authorities told Mr. Shaw that in the course of ten days or so it would all go forward to its destination. As after the middle of next month the water will be low, it is probable that the company will all persons having freight to send to Dawson to ship it as early as possible. The railway company does not guarantee delivery of freight consigned to Dawson, if it is not shipped by August 15. After that date shippers take their own risk.

Mr. M. J. Hooper, contractor for the railway, told Mr. Shaw that the line would be ready for travel between Bennett and Dawson by August 15, and after that date through trains will run from Skagway to White Horse. At present, freight and passengers are transferred from Bennett to Caribou by steamer. The connections are close at both ends and the sail on Lake Bennett is delightful. There is no beer money to be found there.

Most of the people are leaving Bennett for White Horse. Bennett will continue to be an important point for some time because travel and freight for some time will leave the railway here and take the boats to Dawson. General business conditions in the Yukon are pronounced by Mr. Shaw to be excellent. Fine reports have come out from Atlin and Klondike. New finds are reported from other localities, but he did not have time to make enquiries regarding them, so as to speak with any certainty on the subject. He is very sanguine of the business future of the North, and everyone seems to be doing well. His own firm have places of business at Bennett, Atlin, White Horse, and Dawson, and find business good at all these points.

COUNCIL OF WOMEN.
Governor Joly Accepts Invitation to Be Present at National Gathering.

The Local Council of Women met, as usual, in the city hall yesterday afternoon. A letter from Sir Henry Joly de Lothburi, accepting the invitation to be present at some of the meetings of the National Council to be held this month, was read by the secretary. Having been present at the first meeting in Quebec in 1894 and at several since then, he is well in touch with the work of this great body, and is so good as to say he is greatly pleased to see how well it is prospering.

The general convenor reported very satisfactory work on the part of the committee appointed to arrange details of the work and amusement of the busy week beginning on July 23. Great acknowledgment was made of the grant of \$200 from the city council for the entertainment of this important body. A consent to be in preparation for distribution among the visitors, which it is expected will prove a pleasant reminder of a part of the Dominion's yet little known to many of those coming.

PROTESTANT ORPHANAGE.

Meeting of the Board of Lady Managers Held Yesterday.

The regular monthly meeting of the lady managers of the Protestant Orphanage was held yesterday afternoon at the home, Hillside avenue. There were present, Mrs. W. E. McCulloch, in the chair; and Mesdames Higgins, Foote, Milne, McGregor, Hutcheson, Wilson, Carter, Fleming, and Goring.

After routine business, the offer of the Arion Club to give an open air entertainment at the Gorge on Thursday evening, July 12, and to take up a collection in aid of the Orphanage was accepted with general thanks.

A satisfactory letter from one of the orphans who had been placed out at service was received and read.

The matron reported that Eddie Edwards had returned from the Jubilee hospital, where he had received the kindest care, but his general condition was such that the doctor advised that his friends should be consulted with, and the suggestion was adopted.

The secretary was directed to convey to the Arion Club the thanks of the lady managers for their generous offer, and to inform the committee of their delectable entertainment.

Mrs. Foote and Mrs. Goring were appointed visitors for the month.

A cordial vote of thanks was extended to all those who had contributed to the marked success of the recent Puffin.

The following regular donations were reported by the matron, and acknowledged with thanks:

Mrs. Dr. Hagedorn, box of cakes.
Mrs. Spencer, clothing and bedding.
Mrs. Henderson, amusements.
Children of first division, Wellington public school, serap book.
Mrs. Puckie, lot of ribbun and 15 boxes cherries.
Y. W. C. T. U., 30 packages.
Mrs. H. Bowers, three boxes cream chocolates.
Mr. Campbell, clothing.
Mrs. Henderson, amusements.
Mrs. T. Earle, clothing.
Alex. Campbell, Craigden, Mt. Tobino, boxes strawberries, and 50 cents for cream.
Mrs. W. J. Smith, clothing and lime.
A Friend, clothing.
Mrs. Henderson, amusements.
Mrs. Morley, clothing.
Mr. and Mrs. J. B. McClure, two boxes cocoa.
Mrs. Erb, cherries.
Two Orphans, \$1.00 for the children.
Mrs. (Col.) Peters, clothing.
Mrs. Harriet Kent, coffee and two boxes cherries.
Mrs. E. E. Wootton, cherries.
Mrs. J. D. Pemberton, boxes, apples, and cream.

NEW SWIMMING BATHS.
Mr. St. Clair Fills a Long-Felt Want.

The swimming baths at Point Ellice bridge, constructed by Mr. Ian St. Clair, will be thrown open to the public on Saturday next. Every provision has been made for the comfort of patrons, and it will now be possible to enjoy the pleasure of a salt water bath without undressing.

The location is a good one, the water where the bathing is done is situated being invariably warm. The swimming bath is 120 feet long and 50 feet wide, and is in the mine showing to good advantage. Facilities are afforded for expert swimmers, diving to deep water if they so choose.

The charge of admission to the bath house is fixed at 15 cents, or seven tickets for 100 cents.

TEAT RESOLUTION.
Why Trades and Labor Council Considers Bishop Perrin.

Considerable local interest was aroused over the report from Vancouver appearing in the Colonist that the Trades and Labor Council of Vancouver had passed a resolution censuring Bishop Perrin for some remarks which he made to the Toronto Globe on the Chinese question. The full text of the resolution is as follows:

"Whereas Bishop Perrin, of Victoria, in an address delivered in Victoria with reference to Chinese and Chinese immigration in this country resented their coming; but added, 'I have generally found that the grumblers are for the most part those who are not very anxious to work themselves';

"Therefore, be it resolved that the Trades and Labor Council of Vancouver put on record its emphatic denial of such a statement, expressed by one holding the position of Bishop Perrin, and does in joining on the west, the Ruby and Idaho companies have made arrangements for the purchase of the two claims adjacent to the Ruby and Idaho claims, and expect to make arrangements soon for installing the additional ten stamps which the mill was built, and for which the mortar blocks are already in place. Contractors will be added to the work on an extensive scale. This property, better known as the Brett Bros' mine, should be paying dividends within 90 days.

"Be it further resolved that a copy of this resolution be sent to Bishop Perrin, and also an invitation to appear before a mass meeting of the citizens of Vancouver to prove the statement as expressed by him in Toronto, and which appeared in the Toronto Globe of June 14, 1900."

A TABLE DELICACAY.

Good Qualities of Shredded Wheat Being Demonstrated Here.

The Cereal Machine Co., manufacturers of shredded wheat, wheat biscuits, granulated wheat shred, wheat shred drink and wheat shred baby food, are just now pushing the sale of those articles in Victoria as such a manner as will compel Victorians to take cognizance of their efforts.

One of the large show windows in the new premises occupied by Messrs. Eskin, Wall & Co. is utilized for the purpose of making an exhibit of the goods, and at the corner just inside, Mrs. and Miss Bruce, special agents of the company, demonstrate to visitors the advantages and methods of treatment of the shredded wheat.

"A description of the process of shredding the wheat is most interesting. The best of wheat is bought directly from farmers, cleaned of chaff, dust, foreign seeds, etc. Then the rock and other substances of greater gravity than the wheat are removed by an ingenious mechanical device. After thorough washing in cold water, the wheat next goes into great wire tumblers which are rotated about their axes, where it remains in and under boiling water until thoroughly cooked, during which time the wheat has been constantly revolving. The boiling water loosens the woody bran, the fungi and all insect life and eggs, while the constant rapid revolving motion of the tumblers causes the water to be broken, one grain against another and the whole against the steel wire tumbler, to be broken into shreds and cleaned and the foreign substances to be carried off into the water. This operation leaves the wheat in a condition to be used for breakfast cooking. By further agitation the wheat is prepared for and spouted to the hoppers of the shredding machine, which is a mechanical process of shredding the wheat none of the original elements are lost, and no foreign substance enters the mass. The shredded wheat is then biscuit ready. They are simply whole wheat, all wheat, and nothing but wheat. They are as convenient as standard bread food put up in convenient form. Nothing like them has ever before been produced. They are short without shortening and light without yeast or other chemical. Thus it is found that the whole wheat is shredded without loss of its nutritive value, and the original elements left intact; and in shredded whole wheat biscuit it finds its fullest expression in nutrient, life-sustaining qualities.

The ladies are distributing a pretty little booklet which tells all about shredded wheat and contains valuable recipes for preparing the same. Opportunity is also given visitors to test the good quality of the biscuits prepared with shredded wheat. The exhibit and demonstration will continue at Eskin, Wall & Co.'s establishment a salt water bath without undressing.

MISQUOTATIONS.
Some Familiar Phrases That are Frequently Wrongly Given.

From the Pall Mall Gazette.

"The tongue is an unweary member."
"The man that hath no man's name; it is an unruly evil." (James III, 8.)
"Charity covereth a multitude of sins." (1 Peter, iv, 8; Rev. Yer. "Love covereth a multitude of sins.")
"A little learning is a dangerous thing."
"A little learning is a dangerous thing." (Pope, "Essay on Criticism.")
"The man that hath no man's name; it is an unruly evil." (James III, 8.)
"Charity covereth a multitude of sins." (1 Peter, iv, 8; Rev. Yer. "Love covereth a multitude of sins.")

McGILLIVRAY CREEK.
Extra Stamps and a Concentrator to Be Added to Mill.

The Anderson Lake Mining and Milling Co.'s mill on McGillivray creek ran a few days last month, the value of the ore in the mine showing to good advantage. The mill is not yet in good condition and the large loss of gold in the tailings shows that the machinery for treating the pulp mill have to be installed as an early date. At the lowest point reached in the mine, about 200 feet and about 300 feet in on the lower tunnel, one that shows gold freely is found, the ledge being 10 to 12 feet wide and all pay ore. The mill is running this month on about half time under local management.

The mill is owned by the Ruby and Idaho companies, and is being built and managed by Mr. Butte, Montana. The company have made arrangements for the purchase of the two claims adjacent to the Ruby and Idaho claims, and expect to make arrangements soon for installing the additional ten stamps which the mill was built, and for which the mortar blocks are already in place. Contractors will be added to the work on an extensive scale. This property, better known as the Brett Bros' mine, should be paying dividends within 90 days.

"Be it further resolved that a copy of this resolution be sent to Bishop Perrin, and also an invitation to appear before a mass meeting of the citizens of Vancouver to prove the statement as expressed by him in Toronto, and which appeared in the Toronto Globe of June 14, 1900."

Value of Tourist Travel
A Montreal Trade Journal Points Out Some Valuable Lessons.

From Canadian Trade Review.

When we see a great metropolis like New York, with all its wealth and its manifold advantages for business or pleasure to attract travel from all quarters of the world, feeling the necessity of special effort to bring more people into its borders and taking steps to encourage the formation of tourist associations, we can recognize the absolute indispensability of such a body to every Canadian city and town. If it were possible for any city to stand independently and feel no need of special effort in that direction, it should be New York. And yet, the fact is that, over a year ago the Merchants Association of New York was organized, and it now has between 2,000 and 3,000 members, chiefly New York business men, who pay an annual fee of \$25, and the efforts of the association are concentrated on diverting travel to New York. They have issued 200,000 copies of an attractive booklet "Summer Days and Nights in New York," besides other literature, and now have another book in preparation, "The most attractive lesson for us, whose powers of attraction must necessarily be less than those of a large metropolis."

We have before dwelt upon the mercantile value of tourist travel in Switzerland, where it forms one of the principal sources of wealth to the country. And yet Switzerland does not reap one-half the advantage from her tourist travel that Florida does. In Florida also nearly every village has a tourist bureau, and would need to improve nothing. It is the same with Florida. In Florida also nearly every village has a tourist bureau, and would need to improve nothing. It is the same with Florida. In Florida also nearly every village has a tourist bureau, and would need to improve nothing. It is the same with Florida.

FAITH CURE BARRED.

Insurance Societies Beginning to Re-use Unbelievers in Medicine.

The Philadelphia Medical Journal, in calling attention to the dangerous growth of belief in so-called Christian science and faith cure, remarks: "We are glad to see that the list be extended to our insurance societies beginning to realize the evident fact of the heightening of the risk of applying to the insurance companies the work of scientific medicine in saving and lengthening life. Because they are bad risks, the supreme judge of the Knights of Honor in session in Buffalo last week voted to exclude Christian scientists and faith cures from the order. We would suggest that the list be extended to our insurance societies beginning to realize the evident fact of the heightening of the risk of applying to the insurance companies the work of scientific medicine in saving and lengthening life.
