Daniel T. Phillips, United States Consul at Cardiff, in a report describes at length recent tests of the agglomite process of manufacturing fuel in Wales, and declares that there is no reason why a pound of coal dust, whether bituminous or anthracite, should be wasted in the United States.

By this process the coal and agglomerants are subjected to heat and pressure in a sealed vessel, by which a chemical combination of the ingredients is effected, the result being an entirely new fuel compound.

Welcome

Sir Hibbert Tupper Receives Finest Political Welcome Ever Seen There.

Address.

Pictou, N.S., Oct. 19.-There was no ncertain sound in Pictou last night. Sir Charles Hibbert Tupper arrived in the evening and was met at the station by an immense throng. The Conserva-tive Workingmen's Club had prepared a reception, turning out with torches and transparencies. It led a monster procession of citizens, numbering 3,000, while the streets were lined with cheering peopie. It was the grandest political recep-

tion in the history of the country. In Market Square Sir Charles Hibbert Tupper spoke briefly, thanking the people for the magnificent ovation, and especially the workingmen, who had organized the affair, carrying it to such a success. He spoke on the prospects of the party in the West as pointing to the triumph of the Conservatives. He referred to the debate with Mr. Sifton in Brandon, and said that whatever the Crit press might say it was a grand suc-

what startling proposition to the effect that the militia manoeuvres should take piace on Sundays from time to time during the year. Col. Mason, who some time ago suggested rifle practice on Sundays, seconded the proposition, but Canon Ferneret, chaplain of the 13th Regiment, who was the only chaplain present, warmly condemned the proposition.

The weather was grand and the holiday altogether a success.
