many of whom will drop a tear to the mem ory of departed worth." A correspondent writing from Battleford, In addition to this tribute of esteem from orthwest Territory, on this subject, says .-St. Andrews, where Mr. Wilkinson was so

become, if such should ever be necessary, an effective force for the defence of the country. One of the objects of the school is to dissociate the boys from their former life and their parents, and to present them from acquiring a taste for the barbarous customs even now practised among all the tribes. These are great and essential primary objects,

the parents of some of the boys from the Stoney Reserve a few days ago while visiting their children demanded from him food for themselves. Mr. Clerke, of course, refused, as the Indians receive daily rations on the reserves from the Government. On this

Fredericton and Woodstock Water Works.

Mr. Crafts writes to the St. Croiz Courier. some interesting statistics and comparison on this subject, from which we make some

The Fredericton works are constructed upon what is called the direct pumping system, which means that the water is forced into Tork has proved true to her own young sons, and to which brief mention was the main pipes without the use of a reservoir or stand pipe. The machinery for doing this work at Fredericton is a Gaskill Duplex, cominterests, and ranged herself in line with the part of parts of progress and good government in Canada. The work of yesters are all parts of many and a half million gallons per day, (1,623-000) raised 102 feet, the average rate of speed being 32 4-10 revolutions a minute. The most of mine constituency. The left this his native city, to pursue his medical that Temple, undertook an apparently herculean task when they bolding the mine of the parts of mine hundred and seventeen. But

work of three of the best class of movable steam-fire-engines.

Three fires have occurred in Fredericton since the works have been in operation, and, in every case the machinery worked admirably. In one case, the hose was attached and a stream playing in three minutes from the time the alarm was sounded. At the Queen Hotel fire, which occurred at five o'clock in the morning with the weather istensely cold, there were five streams in use, and there is no queetion that, but 'for these five streams and the promptness with which they were brought into use, the entire block they were brought into use, the entire block would have been destroyed. The people are

machinery, however, are different. The water is taken from the River St. John at a point where there is eight or nine feet of water at the lowest stage of the river, and is drawn from a crib-well, as at Fredericton; but there is no intervening pump-well. The suction-maine is sixteen inches diameter and about ninety feet in length. The engines were designed and built by the Burrell-Johnson Iron Co., of Yarmouth, N.S. There are

this arrangement the pumps are placed some ten feet below the engine house floor, and the suction-lift is diminished by that amount. iament of this fine constituency, and we have the digcel that he will worthily wear the dignew that he will worthily wear the dignew the electors of York have conferred
noon him.

California wheat-growers are reckoning the pipes are all laid, the engines are in the pipes are all laid, the engines are in position, and the pipes will probably be filled in a few days. Something over six miles of pipe, from ten inches to three inches in opened.

A few short months ago, Mr. Temple in St. Andrews, the Bag Pulot says:

Of the appreciation in which he was held in St. Andrews, the Bag Pulot says:

California wheat-growers are reckoning the bigsest will shorten the long voyage which California wheat nount.

The works are not yet in operation, but the pipes are all laid, the engines are in position, and the pipes will probably be filled in a few days. Something over six miles of pipe, from ten inches to three inches in diameter, have been laid since Sept. 15th.

At Fredericton there are a little over nine the competition of India and Australia.

> equal to \$9,166.67 per mile.
>
> The engines at Woodstock are required to be of a capacity to deliver 1,000,000 gallons, 180 feet high, in 24 hours, with a consumption of about 3,800 pounds of coal.

> The present requirements will not be over 180,000 gallons a day, For fire-service, they are to be equivalent to two first-class able steam-fire engines. The Loss of the City of Columbus.

A terrible affair occured in the village Curran, Ontario, Sunday night. Mrs. Beau-lue, wife of Isidore Beaulue, merchant, died on Thursday and the body was laid out for burial. Last evening, the house caught fire an adjoining building. Herrible to relate the neighbors were unable to get the corpse out of the house, the fire having taken so suddenin the course of a few weeks at the beginning

reservas from the Government. On this they threatened to remove their children, though the latter were very averse to such an arrangement. The old people, however, were made submissive by a threat on the Rev. gentleman's part to invoke the aid of the Mounted Police.

I was particularly struck with the admirable discipline of the establishment. Everything account of a military training, so far as the regulations are concerned, and the daily fatigues that the lade get through, would astonish the fatigue parties of a regimental depot. The daily routine is carried out under petty efficers, promoted for their intelligence, and Mr. Clerke declares that this alan of advancement is an admirable.

how much has been effected, when it is and was totally consumed, with its contents, remembered that the whole establishment as well as a store and the stock of goods in Mrs. Belyes, Mrs. Atkinson and young Merril, of the Belyea family, have been found. They were brought to Woodstock, last week

mer months, bring to her ports many largeclass vessels which would otherwise seldom
be seen in her harbors, is a large and valuable
addition to her commerce. It is estimated
