

Lost His Hair, Beard and Mustache

Terrible Plight of a Pennsylvania Man Reported by a Prominent Citizen :

"About two years ago my hair, beard and mustache started to come out in spots. These spots were entirely bare of hair.

Seeing PARISIAN SAGE advertised, I purchased four bottles and after using two of the bottles, the hair came in until now I have as good a head of hair as I had before this trouble started.

I can truthfully recommend this preparation to any one for what it is recommended for. Sam Galder, Jamison City, Col. Co., Pa. Oct. 11, 1911."

Please bear in mind that PARISIAN SAGE is not guaranteed to grow hair on bald heads.

In Galder's case the hair root was not dead and there is no good reason why PARISIAN SAGE should not do just

what he writes it did.

"The next time Mr. Galder came into my store after purchasing the PARISIAN SAGE," writes the druggist who sold him, "his appearance was so changed I did not know him."

PARISIAN SAGE is without doubt the most efficient hair grower, beautifier and dandruff cure in the world, and people who are wasting time with ordinary commercial tonics should wake up.

PARISIAN SAGE will banish dandruff, stop falling hair and itching scalp; will put life, lustre and beauty into faded hair or money back. It is a most delightful and refreshing tonic for men, women and children. Large bottle 50 cents at T. B. Taylor & Sons, and druggists the country over.

SAILING THE AIR.

How It Feels to Soar Aloft In a Balloon or Aeroplane.

ALL SENSE OF HEIGHT LOST.

Consequently There is No Feeling of Dizziness or Giddiness, and After Rising a Few Hundred Feet There is No Sensation of Speed.

Comparatively few persons can look down from a great height without a creepy sensation running through the nerves and chasing down the spine, and one would naturally think these unpleasant symptoms would be intensified if one were to rise several hundreds of feet in the air in a flying machine. But that idea is a mistake, according to Mr. Charles C. Turner in an article in the Pall Mall Magazine, in which he tells how beginners are taught the use of the aeroplane and describes the sensations of flight. He says:

"The manner in which a course of flight lessons begins depends chiefly on the weather. If it is fine and calm a pupil is at once taken out for passenger flights, sitting behind the teacher or beside him, according to the type of machine, and having nothing to think about except the novelty of his experiences and the new aspect in which he sees familiar things.

"His first flight is a great event in the career of the pupil, and when it is over he is anxious for the next. His estimate of the difficulties that lie before him is more modest, and he is ready to beseege his instructor with questions. He climbed into the passenger's seat and gripped the stanchions with both hands. He need not have gripped them quite so hard, for he soon found that the motion of the machine was not in the least disturbing.

"To start it a mechanic stood behind the main planes and gave the propeller a turn, and suddenly the engine was giving out a tremendous roar and making the machine vibrate. Other mechanics were holding on to the tail booms to prevent the aeroplane from shooting forward before the pilot was ready.

"But almost immediately the passenger observed the pilot hold up one hand as a signal, and on the instant the machine plunged forward over the ground like a swift motorcar. Before he had time to observe and note his feelings the sensations had changed. The machine was traveling forward with perfect smoothness, the noise of the engine had curiously softened down, the ground no longer raced beneath the machine, and he realized that he was flying and that already he was twenty, forty, fifty feet above the ground.

"Flying has been compared to many things, but in truth no comparison is good. Perhaps I may correct one or

two common but false notions concerning it.

"There is no sense of traveling at a great height. There is not the slightest danger of giddiness. To me this gave no surprise, for, as every balloonist knows, it matters not whether he looks down from 20 or 2,000 feet—the sensation of height is absent.

"To take my own case, I cannot look down a 100 foot cliff for many seconds before feeling unsafe, but I can look down from a balloon that is two miles above ground and can gaze at the scene below for half an hour without a qualm. It is the experience of every aeronaut.

"It is impossible also with reasonable accuracy without the aid of an aneroid to estimate one's height. You see trees far below you, and if you are high enough they appear to be mere bushes, but you cannot tell whether you are 400 feet up or 700.

"Again, the sense of speed is almost entirely lost when you have attained a height of 300 or 400 feet. The ground passes below you very slowly, while if you get up to 800 or 1,000 feet it is only by steadily watching the ground that you perceive that you are moving. Yet all the while there is that steady gale of wind upon the face that informs you of your speed.

"In descending a pupil notices that the speed of the ground rapidly accelerates. The chances are that he cannot distinguish the moment when the landing wheels again come into contact with the earth. The machine moves forward over the ground until its momentum is exhausted, and he and the pilot then descend from their seat."

Coughs, Colds Bronchitis

If there is an ailment in the throat or chest, it is surely essential that the remedy be conveyed direct to the affected part. It's because the healing vapor of Catarrhazone is breathed into the sore, irritated throat and bronchial tubes, because its balsamic fumes kill the germs and destroy the cause of the trouble. These are the reasons why Catarrhazone never yet failed to cure a genuine case of Catarrh, Asthma, Bronchitis, or Throat Trouble.

The wonderfully soothing vapor of Catarrhazone instantly reaches the furthest recesses of the lungs, produces a healing, curative effect that is impossible with a tablet or liquid, which goes merely to the stomach, and falls entirely to help the throat or lungs.

To permanently cure your winter ills, your coughs, sneezing, and Catarrh, by all means use a tried and proven remedy like Catarrhazone. But beware of the substitutor and imitator. Look for Catarrhazone only. 50c and \$1, at all dealers.

Catarrhazone Just Breathe It, Cure is Sure

FOR SKIN IRRITATION

We Guarantee Relief. Your Money Back If Not Satisfied.

We have an ointment possessing extraordinary power to permanently relieve all forms of eczema, skin eruptions, pimples, blotches, ringworm, acne, tetter, scaly scalp, hives, all forms of itching and irritation caused by skin bites. Its power to soothe the ulcers, sores and wounds is very pronounced.

We are so positive that Rexall Eczema Ointment is unequalled for overcoming these ailments that we sell it with our personal promise that it will not cost the user anything unless it in every way gives satisfaction. We exact no promise and in no way obligate the purchaser. You must admit that we could not afford to make such a broad liberal guarantee, except we are certain we could substantiate our claim.

Rexall Eczema Ointment is a grayish-white, pleasant smelling, antiseptic, cooling healing salve that is strongly germicidal. It destroys the germs that penetrate the skin and cause eczema and other tormenting skin ailments. A remedy must do that to be effective, for in no other way can such diseases be overcome.

Rexall Eczema Ointment is ideal for the treatment of skin irritations peculiar to children, for barber's itch, and for sore itching feet.

It is positively the best remedy we know of, and we urge you to try it at our risk. Two sizes, 50c. and \$1.00.—The Rexall Store.

C. J. W. McLAREN, WATFORD.

Fireproof Wood.

Though there are a number of different kinds of wood, ebony, ironwood, etc., of such close, hard fiber that even the fiercest fire has difficulty in "getting hold" of it, there is only one sort, so far as now known, that is practically fireproof. This is a small scraggy tree, a native of South America, called the shopala, with thick, tough, stringy bark full of a sort of fire resisting sap. This curious shrub grows largely on the great, grassy savannas, which are swept by fire almost every year during the heat of the summer. There it thrives splendidly, for the annual scourge kills off only its bigger and harder competitors and leaves the ground free for the growth of this vegetable asbestos.

The Ship of State.

Sir Wilfrid Laurier once took a fall out of Sir Charles Tupper, for years leader of the Opposition, and Sir John Macdonald. Bantering them on their self praise for their own political services to Canada, he admitted that they had sailed the ship of state fairly successfully, adding: "Sir John was at the helm and supplied the brains, while Sir Charles supplied the wind. His blowing filled the sails."

Not Long.

Binks (who ordered a pancake half an hour previously)—Er—I say, will that pancake be long?
Waitress—No, sir; it'll be round. Then he waited patiently another half hour.

We never desire earnestly what we desire in reason.—La Rochefoucauld.

KERWOOD ROLLER MILLS.

OUR FLOURS:

Ladies' Choice, Silver Leaf and Scotch Thistle.

The Best on the Market. All Tried and Proven.

FEED OF ALL KINDS.

Including a Big Shipment of Corn Just Arrived.

Best Attention Given to Gristing and Chopping
HIGHEST PRICE PAID FOR WHEAT.

Thanks for past favors, and we solicit further orders which will receive our prompt and careful attention.

WRITE your name and address in the lines above, clip out this ad, and mail it now. We will send, by return mail, a book that tells how to make yours a "Twentieth Century" farm.

You wouldn't be satisfied to use a scythe to cut your grain, when a modern harvester can do it so much better, would you? Nor to use the old soft-iron plough-share that your ancestors walked behind, when you can get an up-to-date riding plough? Every Canadian farmer realizes the advantages of Twentieth Century implements. The next step is

The 20th Century Material—Concrete

Concrete is as far ahead of brick, stone, or wood as the harvester is ahead of the scythe or the riding-plough is ahead of the old iron plough-share.

Concrete is easily mixed, and easily placed. It resists heat and cold as no other material can; hence is best for ice-houses, root-cellar, barns, silos and homes. It never needs repair; therefore it makes the best walks, fence-posts, culverts, drain-tiles, survey monuments, bridges and culverts. It cannot burn; you can clean a concrete poultry-house by filling it with straw and setting the straw afire. The lice, ticks and all germs will be burned, but the house is uninjured.

It is cheap—sand and gravel can be taken from your own farm. Cement, the only material you must buy, forms from one-seventh to one-tenth of the whole volume.

Do you want to know more about Concrete on the Farm? Then write your name and address in the lines above, or on a postcard, mail it to us, and you will receive by return mail a copy of

"What the Farmer Can Do With Concrete"

Not a catalogue, but a 160-page book, profusely illustrated, explaining how you can use concrete on YOUR farm.
