Police Charged Rioters With Fixed Bayonets

One Woman Killed in Lawrence, Mass., and Police Officer Stabbed - Governor Pass Orders More Troops to Protect Life and Property.

Lawrence, Mass., Jan. 29 - One woman was killed and a police officer was stabbed in the back by rioting strikers, or their sympathizers, who gathered to the number of nearly 1,000 about the Everett mills on Union street tonight. Police and militia were rushed to the scene and a free fire of clubs and rifle bayonets, resulted in the breaking up of the mob and the dispersing of the strikers.

The victim of the riot was an Italian woman. A man nearby was firing a revolver into the ground when the woman dropped. It is believed she was struck by a glancing bullet. An ambulance was summoned and the woman hurried to the Lawrence Hospital, but she died before reaching the institution.

POLICEMAN STABBED. Police headquarters was notified at the beginning of the trouble. At that time the mob was charging up and down Union street yelling and shouting with some of the crowd discharging revolvers.

Police Sergeant Spranger and four officers went to the scene, but could do little towards quelling the disturbance. Officer Oscar Benoit became separated from his companions, and while surrounded by nearly a hundred angry, threatening men, was stabbed in the back. He was taken to the Lawrence hospital, where it was found the wound was not serious and he was later taken home.

MANY RIOTERS HURT

Additional officers hurried to the scene, but although they used their clubs freely they made little impression on the crowd until two companies of militia on the double quick arrived with fixed bayonets. The leaders of the crowd seemed determined to stand their ground during the mix-up, and it is believed many of the rioters were seriously injured.

Neither the police nor the militia fired any shots. The rioters who discharged fire-arms could not be picked out by the officers and no arrests were made. An hour after the trouble started the streets were cleared at that point.

NOVA SCOTIA'S NEW OFFICIAL

E. H. Blois is Probation Officer to Look After Neglected Children, Inspect Reformatories and Watch Delinquents.

Halifax, Jan. 19 - The Nova Scotia Government have decided to appoint E. H. Blois, now in charge of the Proteant industrial school at Halifax, as chief probation officer of the province. He shall be known as superintendent of neglected and dependent children. He shall assist in the organization of children's aid societies throughout the province, visit and inspect reformatories, keep a record of all juvenile homes for children committed by children's aid societies, and act as chief probation officer for juvenile delinquents for the province. This is done under an act passed at the last session of the legislature.

For a sprain you will find Chamberlain's Liniment excellent. It aches the pain, removes the soreness, and soon restores the parts to a healthy condition. 25 and 50 cent bottles for sale by druggists and dealers.

C. P. R. to Have Model Farm in New Brunswick

Purchase Not Yet Made but Start Expected This Spring - Another Step in the Forward Movement.

A model farm for illustration purposes is to be started in New Brunswick by the Canadian Pacific Railway. The matter has been under consideration for about a year and the railway company has in view several farms which will serve their purpose. The actual purchase has not yet been made, but it is expected that a farm will be bought in time to allow the railway to commence operations this spring.

The principal motive of the company in undertaking this new venture is to show what can be done on a New Brunswick farm. Experts will be employed and the most scientific methods will be used. From the selection of the crops and the preparation of the soil to the harvesting and marketing, everything will be done on the most modern lines.

Not only will an effort be made to secure the best possible results from the crops which are now generally raised in the province but experiments will also be made with others which are not so common or which have not been introduced here, for the purpose of learning the success with which they can be adapted to our soil and climate.

The farm will be operated some what on similar lines to the government farms in other provinces and will be a valuable contribution to the agricultural interests of New Brunswick. It will be for the benefit of the farmers and in order to give as many as possible an opportunity to visit it and profit by the practical lessons taught there, excursions will be run periodically from different parts of the territory served by the C. P. R.

Part of the products of the farm will be used in supplying the dining car and hotel departments of the railway.

Gives Warning of Coming Conflicts on Pacific Ocean

Battles of the Future Will be Fought on the Pacific, "The Strategic Centre of Mankind" - Warning to Britain and United States - Yellow Race is Waking - Japanese Alliance may Cause any Time.

London, Jan. 24 - A gloomy prophecy as to the probability of conflicts in the Pacific Ocean was made today by the well-known lecturer on military strategy, T. W. M. Maguire, at a meeting of the Royal Colonial Institute.

THE ONLY SECURITY. Mr. Maguire described the Pacific Ocean as the "strategic centre of mankind" and warned both the United States and Great Britain that no thing could give them security but a race of military men, as with nations like Germany and Japan it was a word and a blow.

DEMANDS OF YELLOW RACE. Mr. Maguire, he said, were going to demand equality of treatment Japan was at present Great Britain's ally, but that would only last as long as the British alliance was worth having.

GET READY! Great Britain's territories in the Pacific Ocean were, he considered, no means safe, and "the Japanese might attack and defeat the Americans any day."

Tongue of Fire Leapt From the Sea

Pillar of Flame a Thousand Feet High Near Trinidad - What Lighted It?

(Literary Digest.)

What lighted the gas jet, a thousand feet high that burst out of the ocean recently near Trinidad, causing newspaper rumors that a new volcano island had risen near the coast, and that it was an active eruption? The matter appears to be more or less of a mystery. According to a letter written by Robert Anderson to Science (New York), the phenomenon is not really volcanic in the ordinary sense of the word, but is due rather to an eruption of natural gas from submerged strata. The real wonder in this case for such outbursts of gas are not frequent in that region - is its ignition, which has not yet been satisfactorily explained. The out-reak seems to differ from those resulting in the ordinary "mud volcano" of Trinidad chiefly in the great scale on which it occurred. Mr. Anderson quotes as follows from a letter written by Jefferson D. Davis, of Port of Spain, on Nov. 10th: "On last Saturday (November 4th) land was seen to rise from the surface of the ocean, three miles south west of Erin. The gas soon took fire, and the flames must have gone to an enormous height, because they were seen from Port of Spain to shoot into the clouds, and Erin is approximately fifty miles from this place. The country was lit up for considerable time, and great consternation prevailed among the natives. The Governor of the colony and a party of officials, with a number of prominent people from this place, went down yesterday to see the phenomenon and found a piece of land about three acres in area, about thirty or forty feet above the sea level in the centre of which was a crater. The ground seemed to be the ordinary blue mud, but was very hot, consequently hard. Some of the more adventurous visitors went on to the land and walked about for a while, and took home some samples of the clay. Large volumes of gas were coming from the crater at this time, but there was no fire. We learned today by telephone that it has taken fire again.

The birth of the new gas crater "volcano" was also witnessed by A. C. Yeatch, formerly of the United States Geological Survey, who was on board ship at Brighton, Trinidad, just about to sail for New York. Writes Mr. Anderson: "His interest was attracted by a great flame that shot up into the sky just at dusk, at ten minutes before six, Saturday evening. Every one thought it was an oil or gas well on fire. With the first puff the flame rose in a brilliant mushroom-shaped mass which immediately changed its form to a straight jet of fire, that must have risen to a height of at least 1,000 feet. No noise whatever preceding or accompanying the fire was to be heard from Brighton, which is across the low hills within fourteen miles of the place where the new island was formed. The fire disappeared below the horizon in about five minutes, leaving a cloud of smoke that drifted away. No light was to be seen in the sky the rest of the evening, which makes it certain that the flame either became reduced to a very small size or died out entirely."

The volcano is about two miles off Trinidad's south coast, and lies on the seaward extension of a line marked by previous outbursts, some of them still active. This line may possibly be a crack in the earth's crust. The "Golum" is the largest of these volcanoes, has formed a mound of ejected mud several acres in extent, and fifty to seventy feet high. The sides of this cone, as well as some others in Trinidad, notably the one called "The Devil's word-pit," are strewn with pebbles and rock fragments that have been ejected from a great depth. We read further: "A point of special interest regarding the late eruption is that the gas took fire. The reports so far received give no details bearing on this point; but it seems unlikely that the original ignition took place through human agency. If it did not the phenomenon is one which has seldom, if ever, been recorded before.

"Two ways suggest themselves in which the gas might conceivably have become ignited through natural causes. One way is that sparks might have been produced by the friction of boulders against each other as they were shot out with the gas. Cases have been reported to me by oil men in which sparks were formed by boulders, projected under great gas pressure from wells, striking the casing and tools, but I have heard of no case in which the gas was lighted. Another supposition is that electric sparks might have been generated similar to those observed in the vapor clouds emanating from Mt. Pelee at the time of its great eruption."

Royal Bank at Vancouver Robbed

Transportation, What is Needed

Vancouver, B.C., Jan. 26 - The Royal Bank branch at Main street and Seenth Ave., was robbed of its cash by two robbers at eleven o'clock today. Manager A. A. Stevens and the members of his staff were backed into the vault and locked there while the robbers helped themselves to everything in sight. The sum taken will probably be high up in the thousands. One of the clerks made a show of fight. He was knocked senseless by a blow with a revolver. The robbers are believed to have left the place by the rear door. They walked out quietly and mingled with people on the street. The corner where the bank stands was thronged. As soon as the clerks were released there was great excitement, but no trace of the robbers was found.

Operation for Tiles Failed

ZAM-BUK WAS THEN TRIED AND WORKED A CURE.

Writing from Popular, B.C., Mrs. C. Hanson, wife of the proprietor of the Commercial Hotel, writes: "I suffered for years with bleeding piles. The pain was so bad at times that I could hardly walk, and ordinary remedies seemed utterly unable to give me any ease. Finally I decided to undergo an operation, and went to the Sacred Heart Hospital in Spokane. There they performed an operation and did all they could for me. For a time I was certainly better, but within twelve months the trouble started again and the piles became as painful as ever. I tried liniments, hot poultices, various 'pile cures,' and indeed everything I could think would be likely to do any good, but still I continued to suffer, and the shooting, burning, stinging pains, the swelling and itching, were 'worn-out' feeling that the disease causes continued as bad as ever.

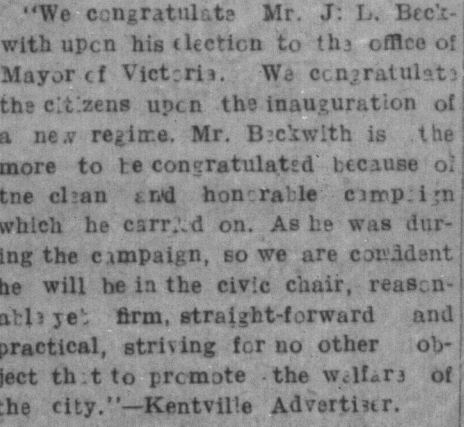

"One day I read about Zam-Buk and thought I would try it. The first one or two boxes gave me more ease than anything else I had tried, so I went on with the treatment. In a short time I began to feel altogether different and better, and I saw that Zam-Buk was going to cure me. Well, I went on using it, and by the time I had used six boxes I was delighted to find myself entirely cured. That was three years ago, and from then to the present time there has been no return of the trouble.

"Zam-Buk is a pure cure for piles, external, internal, hemorrhoids, cold sores, chapped hands, varicose sores, burns, scalds, bruises, inflamed patches, and all skin injuries and diseases. Druggists and stores everywhere, 50c. per box or Zam-Buk Co., Toronto, for Price Refuse harmful substitutes.

Here is a message of hope and good cheer from Mrs. C. J. Martin, Poone Mill, Va., who is the mother of eight children. Mrs. Martin was cured of stomach trouble and constipation by Chamberlain's Tablets after five years of suffering, and now recommends these tablets to the public. Sold by druggists and dealers.

ELECTED MAYOR OF VICTORIA.

At the civic elections held in Victoria, B. C., last month, Mr. J. L. Beckwith was elected Mayor with a vote of 2030. Mr. Beckwith is well known at Kentville, having formerly been in business under the firm name of Beckwith & Dodge. Mr. Beckwith has entered largely into the commercial prosperity of Victoria and his election to the highest position in the city is a fitting response to his ability and energy. The Victoria Daily Colonist says editorially of his election: "We congratulate Mr. J. L. Beckwith upon his election to the office of Mayor of Victoria. We congratulate the citizens upon the inauguration of a new regime. Mr. Beckwith is the more to be congratulated because of the clean and honorable campaign which he carried on. As he was during the campaign, so we are confident he will be in the civic chair, resolute, practical, striving for no other object than to promote the welfare of the city." - Kentville Advertiser.

A bite of this and a taste of that, all day long, dulls the appetite and weakens the digestion.

Restore your stomach to healthy vigor by taking a Na-Dru-Co Dyspepsia Tablet after each meal - and out the 'peeping'.

Na-Dru-Co Dyspepsia Tablets

are the best friends for sufferers from indigestion and dyspepsia. 50c. a Box at your Druggist's. Made by the National Drug and Chemical Co. of Canada, Limited.

Old Age Pensions

Howards Bligh & Sons Urge Better Facilities and Protection for Shipping Apples.

To the Editor of Chronicle:-

Sir - Very much has been written and published about the splendid facilities of Nova Scotia as a fruit growing country, producing some of the best fruit in the world. This is admired and liked by the buyers in the great markets of Europe, etc., besides winning gold medals for its superior quality and appearance again, it comes. All of this is quite true; but Mr. Editor and Fruit Growers of Nova Scotia, after putting forth every effort to grow such fine fruit by cultivation, spraying, etc., careful picking and packing, and growers investing money in frost proof warehouses at point of growth to protect the fruit from frost until ready for shipment, what happens? The apples are taken from these places of safety and loaded in cars, the majority of which are not suited at all for the fruit trade and sent forward to Halifax to be put on board steamers for England, etc. Upon arrival at Halifax the cars are usually unprotected from the cold weather anywhere from ten to forty-eight hours or longer. As soon as the steamer is ready to receive cargo the fruit is taken from the cars and put on board, the work often being done in zero weather and with the large hatches of the ships being open in such weather. The temperature of the ship's hold has been found to be as low as twenty-four degrees, which is a very cold place for apples or perishable goods.

The remedy for this, in our opinion is as follows: 1st. Better cars should be provided by the railway to bring the fruit to Halifax. Every car should have slips of boards on the floor, of the car to keep the barrels off the bottom of the car and to allow a circulation of air under the bottom tier.

2nd. A large frost proof shed should be built at some place at Halifax that would hold one hundred or more cars, into which shed car-loads of apples could be placed until such time as the steamer was ready to load them. 3rd. All steamers carrying apples should be compelled to have some means of having the holds of the ship heated in cold weather, so that all risk of freezing the fruit after being out on board and while loading will be avoided.

We believe that the Board of Trade at Halifax and other places through the Province should take up this matter at once, in connection with the Fruit Growers and get what is required from the railway, steamship people and this port, to protect and make this business more successful. The apple trade, with its one million and a half barrels for export as a big help to the port of Halifax. Thousands of dollars have been lost by the fruit growers of Nova Scotia by bad transportation and more will be lost if better protection is not provided.

CONFIDENCE

We Back up Our Statements with our Personal Reputation and Money. We are so positive that we can relieve constipation, no matter how chronic; it may be, that we offer to furnish the medicine free of all cost if we fail.

We think that it is worse than useless to attempt to cure constipation with cathartic drugs. Cathartics may do much harm. They may cause a re-act, irritate and weaken the bowels, and make constipation more chronic. Constipation is often accompanied and may be caused by weakness of the nerves and muscles of the large intestine or colon. To expect a cure you must therefore tone up and strengthen these parts and restore them to healthier activity.

The discovery of the active principle of our remedy involved the labor of skillful research chemists. This remedy produces results such as are expected from the best of the best-known intestinal tonics, and it is particularly prompt in its results.

We want you to try Rexall Orderlies on our guarantee. They are exceedingly pleasant to take and are ideal for children. They apparently act directly on the nerves and muscles of the bowels, having it would seem, a neutral action on other organs or glands. They do not purge or cause inconvenience. If they do not positively cure chronic or habitual constipation and thus relieve the myriads of associate or dependent chronic ailments, your money will be refunded. Try Rexall Orderlies at our risk. Three sizes of packages, 10c., 25c., and 50c. Remember, you can obtain Rexall Remedies in this community only at our stores - The Rexall Store, Roy. I. Hartney, W. A. Warren.

Old Age Pensions

E. M. MacDONALD AND W. F. CARROLL STRONGLY ADVOCATE OLD AGE PENSIONS.

Ottawa, Jan. 24th - The debate on the old age pensions resolution was resumed by Mr. E. M. MacDonald, M.P. He said that Canada had been somewhat laggard in dealing with this social question. It might be that Canadians had been too busy laying the foundations of national progress to deal with the problem of how men and women, too old to work, might be guaranteed against the humiliation of going to the workhouse or the poorhouse. There existed a category of the rich and a category of the poor. Among the former, the young men always depend upon the old. In the latter the old must of necessity depend on the young.

DUTY OF THE STATE.

Mr. MacDonald stated that no matter how hard a man might work to lay by savings for his failing years, epidemics of sickness, continued illness and other misfortunes were unforeseen conditions which might sap them all and only the intervention of the State could save the old under such conditions from penury, want and humiliation.

The member for Pictou stated that all the annuity system could only reach those people who had a reserve fund and were enabled to speculate. The question of technical education had not yet been solved, and the old man at present was being driven to the wall. Two things ought to be provided for, the man or the woman who came to the age of sixty-five or over, namely, personal comfort and independence of action.

THE FOUNDATION STONE.

There were three conditions under which these might be obtained: - First, by accumulation of savings; second, by engagement and occupation of a person over the age of sixty-five, and, third, by assistance from children. It was impossible, however, that such assistance should be absolute in character.

In conclusion he said: "While we are laying the foundation of an industrial future, we should lay firm the foundation stone of our social system."

Mr. W. A. Carroll of South Cape Breton, in outlining the schemes advocated in other countries was of opinion that the deserving poor schemes should commend itself to this country.

At the conclusion of the debate the motion for the appointment of a committee to investigate the advisability of the establishment of an old age pension system, along the lines adopted by the British Government was carried.

Do you know that the real danger lurks in a common cold than in any other of the minor ailments? The safe way is to take Chamberlain's Cough Remedy, a thoroughly reliable preparation, and rid yourself of the cold as soon as possible. This remedy is for sale by druggists and dealers.

DUKE OF FIFE DIED IN EGYPT.

The Duke of Fife, son-in-law of the late King Edward VII, who married in 1889 the Princess Louise, died suddenly of pleurisy at Assuan, Upper Egypt, on the 29th. The exposure and shock of the steamer, in which he and family were being taken to Egypt, more or less affected the Duke's health. The Duke of Fife had been delegated to represent the crown at the consecration of the Cathedral at Khartoum, in memory of General Gordon. This sad and sudden death will greatly modify the grand festivities, that were to take place in England as a welcome to our King and Queen on their return from India. The Court will at once go into mourning.

NOW I CAN SAY I AM CURED

AFTER TAKING GIN PILLS

BRIDGEVILLE, N.S. For twenty years, I have been troubled with Kidney and Bladder Trouble, and have been treated by many doctors but found little relief. I had given up all hope of getting cured when I tried Gin Pills. Now, I can say with a happy heart, that I am cured after using four boxes of GIN PILLS.

DANIEL F. FRASER.

Just think of it! Four boxes of Gin Pills cured Mr. Fraser - and he had suffered for twenty years and he had been treated by doctors, too. It is just such cases as his, which prove the power of Gin Pills to cure Kidney and Bladder Trouble, Burning Urine, Suppression or Incontinence of the Urine, Backache, Rheumatism, Sciatica and Lumbago. Try Gin Pills on our positive guarantee of a cure or your money back, see a box for \$2.50. Sample free if you write National Drug & Chemical Co. of Canada, Limited, Dept. N.S. Toronto. 93
