# Water Purification Plants and Their Operation

By MILTON F. STEIN, Assistant Engineer of Design, Cleveland Filtration Plant.

A manual for operators of water purification plants, and also of interest to waterworks chemists and engineers.

This book gives instructions for the operation of water-purification plants as simply and concisely as is consistent with reasonable completeness.

Includes all information and data required in the operation of the plant, such as instructions for preparing standard solutions, making bacterial and chemical tests of the water, handling coagulants, washing filters, keeping records, etc.

Also contains a chapter giving detailed descriptions of the various types of plants and their component parts.

Have a copy sent on approval.

**247 pages, 6 x 9. Cloth, \$2.50 net  
(10s. 6d.).**

**A General Survey of  
Sewage Problems**

## SEWAGE DISPOSAL

By LEONARD B. KINNICUTT,  
C. E. A. WINSLOW and R. WIN-  
THROP PRATT.

Discusses the fundamental principles of chemistry and bacteriology, and includes the more important aspects of the engineering works designed to carry them into operation.

The engineer and public health official will find in this volume much of interest to them concerning the operation of disposal works after they are built.

**435 pages, 6 x 9, 113 figures.  
Cloth, \$3.00 net (12s. 6d.).**

## SEWER CONSTRUCTION

By Professor H. N. OGDEN, Cornell University.

**335 pages, 6 x 9, 192 figures.  
Cloth, \$2.75 net (11s. 6d.).**

By the same author.

## SEWER DESIGN

Second Edition

**248 pages, 6 x 9, 71 figures.  
Cloth, \$2.00 net (8s. 6d.).**

### ON APPROVAL OFFER

Copies of any of these books will be sent on ten days' approval, if the order is accompanied by cash, and if found unsatisfactory may be returned when the money will be promptly refunded.
