

## BUTTER

Still keeps scarce and demand is good from all sources for a fresh made article. We think prices will be maintained until after 15th of next month, at least, and would advise customers to ship often, in small lots, to feed the market while demand is good.

## EGGS

Are more plentiful and at reduced prices. There is a good demand.

We are in a good position to handle large quantities of all kinds of farm produce with advantage to our customers.

WINNIPEG

## POTATOES

The present demand for potatoes is entirely from American markets, and will not last for more than another 10 days. New stock from Texas and other Southern points will commence arriving about May 15th when old ones will not be wanted. If the farmers in your district are carrying any good hard stock impress upon them the necessity of marketing at once, as the country is still full of potatoes and so soon as the demand from the States falls off they will be poor property. We expect to see very low prices the latter part of May and June. If you can pick up a car or more for shipment about May 10th wire us on receipt and will give you a price on at your station in bulk.
