

## List of Illustrations

| FIG.   | PAGE        |
|--|-------------|
| 63.—Adrenal Medulla, showing Small Round-celled Infiltration   | 244         |
| facing page  |             |
| 64, 65.—Views in a Zone of Chronic Inflammatory Cell Infiltration  | 245         |
| facing page  |             |
| 66.—Chronic Inflammatory Cell Infiltration in a Case of Gonorrhœal Salpingitis . . . . .                         | 247         |
| facing page  |             |
| 67.—Portion of a Capillary Wall in an Inflammatory Area in a Case of Chronic Interstitial Appendicitis           | 247         |
| facing page  |             |
| 68.—Portion of an Intestinal Lymphoid Follicle, from a Case of Typhoid Fever . . . . .                           | 273         |
| facing page  |             |
| 69A & B.—Diagrams to show the Double Action of Noxious Agents on Tissues and Blood-forming Organs . . . . .      | 280, 281    |
| 283  |             |
| 70.—Chart representing the Inter-relations between the Phlogocytes   | 295         |
| . . . . .  |             |
| 71.—Steric Chemical Interchanges . . . . .   | 302         |
| . . . . .  |             |
| 72.—Splenic Pulp in a state of Myeloid Metaplasia  | facing page |
| . . . . .  |             |
| 73.—Splenic Tissue in a case of Acute Lymphatic Leukæmia   | facing page |
| . . . . .  |             |
| 74.—Mononucleate and Binucleate Forms from the Pulp Tissue of the Spleen in a case of Chronic Lymphatic Leukæmia | 305         |
| facing page  |             |
| 75.—Germ-centres with well-marked Endothelioid Cells .. . . . .  | 305         |
