31	Sun.	6 35	4 53	11 44	2 05	3 28	8 50	23rd Sunday after Trin.

Farmers are asked to try this, from an able U. S. experience:—The manure is not removed during winter, but allowed to remain in the stalls. If this is accounted slovenly, the excuse must be its great utility, every day a little clean straw is laid down, which becomes mixed with the excrement, and is compressed into a solid mass forming the floor. The consolidated manure thus obtained is most valuable. No other farm-yard manure is equal to it, and for turnip crops, it is the very fertilizer, as not being exposed to the open air, and being well compressed, it retains its ammoniacal properties.

OCTOBER—So called from being originally the eight month of the old Album Calendar, was by our Saxon ancestors styled *Wyn moneth* or wine month.
