TEXAS LEGISLATURE.

Austin, Tex., Oct. 1.-The Texas legislature met at noon with a quorum present. The governor in his message reviews the laws against prize fighting in therein, and closes by saying: "All per- law-abiding." sons have been given notice that the Corbett-Fitzsimmons fight would not be permitted, that whatever has been done by its projectors was with full responsibility for the consequences, the public interests require that this exhibition especially should be suppressed. Discountenanced by Mexico, outlawed and driven from every state, it is proed to assemble a horde of ruffians and gamblers and offer this state this commanding insult to public decency. Against it the interests and pride of the people revolt, and your prompt and resolute action will spare them this ignominy and shame.

He recommends the passing of a law making prize fighting with gloves felony. There is a strong lobby here from Dallas, and leaders of it claim to have votes enough in the house to defeat the emergency clause.

Several bills of a strictly anti-prize fight nature were introduced in both houses to-day, and an adjournment was had till to-morrow morning.
As the matter now stands, it has de-

veloped into a political row between the governor and his opponents in the legislature, of whom he has quite a num-There are ninety-four members of the house at present and twenty-four senators. C., Oct. 2.-Secretary Smith was asked to-day if he would take any steps to prevent the Corbett-Fitzsimons fight taking place in Indian Territory, and replied that if an attempt were made to have the fight take place on any reservation which is directly under the control of the interior department, and not set apart as a separate government, he would most certainly prevent it. He knew of nothing, he said, that would give the department, authority to prevent the fight upon the lands controlled by the five civilized tribes if the Indians consent. He added that it would call atention to the condition of affairs in Indian Teritory, and perhaps bring a pressure to bear which will bring about a change of affairs there. If the Indians of the five civilized tribes, or any nation of them, should call upon the department to prevent the fight, then the department would prevent it. The secretary said that he did not know that there was

any disposition to have the fight in Indian Territory, but he had seen something to that effect in the newspapers. Wykeham, Archbishop Warham and Its Origin.

An interesting correspondence has been provoked by a letter in the London given special study to the subject tell us Times from Mr. J. Y. W. Macalister,

who wrote:-Last year I paid my first visit to Cornwall (Sennen and Land's End) and one, were the recognized language of the again and again during my intercourse with the less sophisticated inhabitants I they are not America's orts. Again, was struck by their decidedly "Yankee" twang. It set me wondering whether in Cornwall might be found the original manner born, the eccentric compositions source of that peculiar nasal inflection of Artemus Ward, the American humorwhich is so characteristic of the New | ist. But it would seem that many Eng-Englander (the true "Yankee"), and in a less degree of all United States folk, lects, cannot make head or tail of his except perhaps the Virginian. Why the business of catching fish in the open waters should be considered not only a legitimate pursuit, but one to be encouraged, in every possible manner, even by the payment of government bounties if need be, while the parallel, but more dangerous and physically laborious pursuit of hunting seal in the open water should be classed as "poaching" and next door to piracy, is hard to imagine.

The truth is that the whole agitation ever the question of pelagic sealing was systematically worked up in the interest of the lessees of the Priblioff islands. Naturally a monopoly of the sealing catch is what they want, and the competition of the pelagic sealers interferes with that monopoly. The company is a strong one, its stockholders are close to men prominent in government affairs, and by a judicious system of "working up" an artificial public feeling against a legitimate industry, the livelihood of as good a class of men as ever followed the sea.

The distinction between the pelagic sealers and the lessees of the islands in the reaper of making the catch is this: The call it musical, but then I am biassedpitch, and with a decidedly nasal tone.

I have often heard the word used in North Devon, in a sentence such as this: "He's a-gone tu 'Merica vor'ees betterment, tu see if he can't make 'ees vorchin, vor'ee can't du nothing yer." (He has gone to America for his betterment, to see if cannot make his fortune, for he can do nothing here.) "Better" is often used as a verb-e. g., "Well, 't zims to me that I can better thickee.'

The Rev. W. S. "Pedestrian," however, observes he has found similar nasal characteristics in the South Lincolnshire district. During a recent walking tour in that dis-trict (he says) I was frequently re-minded of my American friends, and can hardly believe that some of them with whom I conversed were "born and bred in Lincolnshire." It is well known that the bulk of the Pilgrim Fathers were drawn from Boston, Lincolnshire -a fact they strove to accentuate by naming one of their earliest New England towns after it."

Finally, one correspondent traces the "nasal twang" to a habit of the Puritans, without respect to locality; and another considers the "Yankee twang" very largely a misnomer or myth. Is not (this correspondent asks) the "so-called nasal inflection" common among the rural population of all England, ex-cept in the London area and Northumbria? Was it not, still more nearly universal among the people in the days of the trek to New England; and is the "Yankee twang", therefore, anything more than "quite English" of the old sort?

NEW CARTRIDGE FOR SPORTSMEN. The Invention of an Ingenious Australian. No Heat or Dirt.

An ingenious Australian has invented and ntroduced a new mica cartridge for sporting and military guns. The filling inside the cartridge is visible. One advantage is that, instead of the usual wad of felt, a that, instead of the usual wad of felt, a mica mat is used. This substance, being a non-conductor, unaffected by acids or fumes, acts as a lubricant. Where smokeless pawders, such as cordite, or other nitro-glycerine compounds, are used, mica has, it is said, a distinct advantage over every other material used in cartridge manufacture. Being transparent, any chemical change in the explosive can be detected at once. The peculiar property it has of withstanding intense heat is here utilized, the breech and barrel being kept constantly cool. The fouling of the rihe is also avoided, the wad actually cleaning the barrel. Any tampering with cartridges can also be detected.—Pall Mall Gazette.
