knowledge of these principles and of the objects of the several books usually to be won by Thetis. ound in a merchant's office.

The elements of political economy may perhaps receive attention in the upper forms of the Continuation School; and here, too, the student may be introduced to the fire principles of commercial law; and, as an extension of the course upon experimental cience, new interests should be introduced into the studies of the pupils by occasional lectures on the subject of commercial commodities, as preparatory to the more ex-stative courses of study, which will be provided in the Higher Commercial School, in connection with its museum of economic products, and with the visits which will be rganised by the staff to docks and warehouses for the purpose of studying these

products in bulk. There is one other subject which should not be neglected in the Continuation School, and which should, perhaps, have been re ferred to under the head of geometry. I variable quantities by means of curves. The pupils should be encouraged to plot of the barometer from day to day, the cur rent prices for some selected commodities, the entertainments which she has so successfully rates of exchange with particular countries the number of students attending different classes at the school, or any other quantities which vary from time to time, so that they may acquire the habit of graphically representing, for the purpose of rapid comparison

Day Schools or the Evening Schools, nor have I touched upon the question of the local authority whose duty it should be to provide, maintain, or control such schools, and the central authority in which all control should ultimately be focussed. I have not even considered whether the commercial schools should be under the Central Educational Authority, or, as the agricultural schools and colleges are aided by the Board of Agriculture, a change of the commercial schools and colleges are aided by the Board of Agriculture, or the commercial schools and colleges are aided by the Board of Agriculture, or the commercial schools and colleges are aided by the Board of Agriculture, or the commercial schools and colleges are aided by the Board of Agriculture, or the commercial schools and colleges are aided by the Board of Agriculture, or the commercial schools and colleges are aided by the Board of Agriculture, or the commercial schools and colleges are aided by the Board of Agriculture, or the commercial schools and colleges are aided by the Board of Agriculture, or the commercial schools and colleges are aided by the Board of Agriculture. ouiture, so the commercial schools following the example of some commercial nations, should be placed upon the Board of Trade. I will only say that I am not advocating any such policy. There are questions which part II in Tableaux Vivants, which were word may, however, be said about the school and the teachers. There can be no sufficient reason why the buildings of the endowed econdary schools and of those public elemensary schools which are provided with labor atories for practical science should not be freely used for the purpose of evening continuation schools of a commercial type. at Regent Street and Woolwich Polytechnic. may have separate departments for technical and for commercial subjects; in other cases
