NO. 41.

When You Think

Of the pain which many women experience with every month it makes the gentleness and kindness always associated with womanhood seem to be almost a miracle. While in general no woman rebels against what she regards as a natural necessity there is no woman who would not gladly be free from this recurring period of pain.

Dr. Pierce's Favorite Prescription makes weak women strong and sick women well, and gives them freedom from pain. It establishes regularity, subsides inflammation, heals ulceration and cures female weakness.

Sick women are invited to consult Dr. Pierce by letter, free. All correspondence strictly private and strictly confidential. Write without fear and without fee to World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y. If you want a book that tells all about women's diseases and how to cure them at home, send 3 one-cent stamps to Dr. Pierce, M. D., 103 North Second Street, St. Louis, Mo. A Common Sense Medical Adviser—revised, up-to-date edition—paper covers, in handsome cloth-binding, 26 stamps.

The First Really Important Introduction of our Millinery Opening

For Saturday, April 8th, Miss Reynolds has specially prepared fifty hats, and so very sweet and stylish are they, and such is the value of them, that we simply cannot help giving them the place of importance in our plans for the season.

Essentially Easter Suits and novelties.

All Are Invited to Attend the Opening

D. BASSEN'S

Carleton St.,

St. George

FARM TOPICS

The Utility of the Silo.

One of the unmistakable signs of progressive agriculture in live stock communities is the presence of the silo. As a factor in reducing the cost of production upon dairy farms nothing has approached. From whatever point of view it may be considered its advantages are overwhelming. There is no comparison between the silo and the old system of dry-curing and storing feed for winter and summer use. It costs less to put the corn crop, for example, into the silo than into the crib and mow; and, further, it is common knowledge that the silo preserves the food elements in digestible form far better than dry-curing. No other building can be erected for the same cost to store the same number of tons of feed. No other method of handling the corn crop is more economical, and, it may be added, no other feed will bring the farmer greater proportionate returns than ensilage.

In ninety-nine cases probably out of a hundred where cows in a herd are not producing satisfactory profits the results are due to a lack of system in the management. In the first place the breeding of the herd may be faulted, but this is not always a criterion, and the farmer is not justified in jumping to hasty conclusions. The cow is really a machine for the purpose of turning roughage, meal, grass, roots, etc., into milk. One does not know whether or not a machine has a profitable capacity until it is put to the test. If a farmer weighed the milk of his herd of say, ten cows and fed the cows alike he might come to the conclusion that all the cows were doing well, or he might come to the very opposite conclusion, that they were all unprofitable. In both cases he might be wrong. The only correct basis on which to estimate the yield of a herd of cows is individual performance. Then he knows that certain cows are making good use of the food they consume; others are making poorer use, and perhaps

crib and the stocks placed in a mow. It would cost at least \$50 to harvest the crop. It is worth while to work out these calculations from time to time and ascertain accurately the exact differences in the cost of harvesting a corn crop according to the methods in use. The results are certain to prove illuminating, and if carefully computed will show beyond question the economy of making ensilage. The advantages of feeding ensilage over that of feeding dry fodder are so great that few farmers are willing, after a trial, to discard the ensilage for old time methods.—Tor. Globe.

Feeding Cows for Milk.

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure. E. J. Cheney & Co., Toledo, O. We, the undersigned, have known E. J. Cheney for the last 15 years, and believe him perfectly honorable in all business transactions and financially able to carry out any obligations made by his firm. W. A. Wallace, Druggist, Toledo, O. Hall's Catarrh Cure is taken internally acting directly upon the blood and mucous surfaces of the system. Testimonials free. Price 75c per bottle. Sold by all Druggists. Take Hall's Family Pills for constipation.

Ordinary corn crops ought to yield ten tons to the acre of ensilage, while an outside estimate of forty cents a ton ought to cut the corn and fill the silo. The crop is handled green and its qualities are preserved. If this corn were cut by hand and husked, the ears drawn to

still others better use. As soon as the question of individual production is solved he is at once in possession of the data necessary to determine whether or not he is feeding the cows, so they will have a chance to show what they can do. Many farmers feed cornstays, hay and some roots, and expect their cows to yield large quantities of milk. Often the quantity of hay is limited, sometimes it is only timothy, and the whole ration is lacking in protein, which is essential to milk production. When cows are milking they need meal. A very good meal ration is wheat bran, corn meal and oilmeal mixed equal parts by weight. This should be fed twice daily. Each cow should receive as many pounds of this grain ration a day as she produces pounds of butter fat in a week. For example, if a cow produces nine pounds of butter fat in seven days she should be fed nine pounds of grain a day, or four and a half pounds night and morning. If one does not know how much butter fat his cows are producing or how much milk each individual yields he is in the dark as to how each should be fed. When the meal ration is settled, then the roughage, whatever form it takes, may be fed with a liberal hand. If the ration he well balanced good cows will do justice to themselves, and yield a profit to their owner, even on dry feed.—Tor. Globe.

For World Peace.

The barbaric arbitrament of war always looms in its hideousness as the court of last resort in the issues between nations. The force that must stand behind all the law has seemed lacking in schemes for international arbitration. The man who loses before a civil tribunal does not yield because he regards the decision just. He probably regarded it as unjust. But he knows that the whole force of the nations stands behind the decision and can be employed if necessary to carry it out. This force has seemed lacking when contemplating the possibility of a powerful nation refusing to submit an issue to an arbitration tribunal or to accept a decision rendered. The hope of peace lies in the growth of higher sentiments that will crystallize in an international opinion. This may lead to an organization that will enforce decrees among nations as effectively as the single nation now enforces decrees amongst its individual members. Even more important than any such practical work of organization is the growth of a spirit of peace and good-will, a mutual understanding and appreciation through which the barbaries of older and lower ideals will be seen in all their repulsiveness. The nations are growing to recognize each other as friends and the pride of strength and armament is giving place to pride in leadership toward conditions in which war will be impossible.—Tor. Globe.

How's This?

The contract for the superstructure of the Quebec bridge has been awarded to the St. Lawrence Bridge Co. The cost will be \$8,580,000.

Job Printing at The Greetings Office.

Turkey
Yearning for a better life, the people of Turkey are gradually improving their condition. The Garden of Eden, as it is called, is now a reality in the province of Mosul. The province of Mosul is one of the most fertile in the world, and the people are now enjoying the benefits of modern agriculture. The province is now producing more than enough to supply its own needs, and is beginning to export its surplus.

For World Peace.
The barbaric arbitrament of war always looms in its hideousness as the court of last resort in the issues between nations. The force that must stand behind all the law has seemed lacking in schemes for international arbitration. The man who loses before a civil tribunal does not yield because he regards the decision just. He probably regarded it as unjust. But he knows that the whole force of the nations stands behind the decision and can be employed if necessary to carry it out.

Japan's Gorgeous Fire Brigades.
The fire brigades of Japan are organized into companies, and each of these companies carries some striking emblem as a kind of rally banner. The emblems are various, including clubs, spades, hearts, diamonds, and other symbols. The brigades are well equipped and highly trained, and are able to respond to any emergency with great speed and efficiency.

How Timber Is Selected.
Timber is formerly selected according to its external appearance. The diameter and length of the piece, the straightness of grain, sometimes the weight, sufficed to determine both its commercial value and its destination. The diversified industries of the present day require a corresponding diversity in the wood employed. For one purpose the important quality is hardness; for another, elasticity; for a third, ease of working or resistance to attack by external agencies. The compound microscope is now used for the purposes and careful examination of longitudinal and transverse sections of specimens of timber.—London Telegraph.

An Artist's Criticism.
Probably no two artists ever criticized each other more severely than did Fuseli and Northcote, yet they remained fast friends. At one time Fuseli was looking at Northcote's painting of the angel meeting Balaam and his ass. "How do you like it?" Northcote asked after a long silence. "You see an angel at an ass, but an ass at an angel."

Nipped.
"Dad," asked the defaulter, who was arranging for transportation to Mexico, "when you see something special for tourists?" "No," replied the ticket agent. "Pardon me, but I have," chimed in the detective, appearing at that moment with a pair of steel bracelets. "There's something special for two tourists. Suppose you try 'em."—Catholics Standard and Times.

CAITHNESS
Miss Alice Barry, who has been quite ill with Lagraisse is recovering.

Capt. Jas. McLeod made a business trip to St. George Thursday.

On Friday afternoon a chopping bee was held at the home of Fred Henry. In the evening the young ladies were invited and all enjoyed games, etc., after which refreshments were served, the party then broke up all voting it a good time.

Quite a number of young folks attended the social at S. Goodell's on Tuesday evening.

Ernest McDougall has returned from Letang where he has been employed with R. Burgess.

Our teacher, Miss Wallace of Jerusalem, Kings Co., left for her home on Thursday for the holidays.

Miss Irene Seaman was a recent guest of Mr. and Mrs. G. Taylor.

Hubert Seaman has purchased a fine graphophone.

Mrs. Hilary of Mascarene called on Mrs. P. S. MacDougall Thursday.

Miss Irene Seaman called on friends in St. George recently.

G. MacDougall was the guest of Mr. and Mrs. A. McVicar on Good Friday.

John Ayers was in town Monday.

J. W. Murray who has been on the sick list is improving.

Our Sunday school is progressing quite favorably, quite a large number attend regularly.

Turkish Navy To Be Built in Britain
Constantinople, April 9. The Chamber adopted a motion to-day, by a vote of 115 to 40, confirming the Government's action in awarding the contract for the construction of the new Turkish navy, consisting of three battleships of 16,500 tons each and serving smaller craft, to Armstrong, Whitworth & Company, Limited of London.

Very Plausible.
Magistrate (severely)—You are charged with kissing this young lady against her will, and on the public highway.
Prisoner—She was in a bicycle costume, and I mistook her for my long lost brother.
Magistrate (briskly)—Discharged! Call the next case.—N. Y. Weekly.

A Deadlock.
"The only way to swim," said the man who assumes to give instructions about everything, "is to have confidence."
"Yes," answered the novice, "and the only way to have confidence is to be perfectly sure you can swim."—Washington Star.

Germany has fifteen political parties. There must be many sides to every question in the isotherland.

Sealed Tenders submitted to the undersigned, and endorsed "Tender for Wharf at Trynor's Cove, N. B., will be received until 4 p. m. on Tuesday, May 9, 1911, for the construction of a Wharf at Trynor's Cove, Charlotte County, N. B.

Plans and specifications to be seen on application to E. J. P. Shewen, Esq., District Engineer, at John N. B. O. Stead, Esq., District Engineer, Chatham N. B., the Postmaster at Penfield Centre, N. B., and at the Department of Public Works, Ottawa.

Tenders will not be considered unless made upon, and in accordance with the conditions contained in forms furnished by Department.

Each tender must be accompanied by an accepted check on a chartered bank, payable to the order of the honorable the Minister of Public Works, equal to ten per cent, (10 p. c.) of the amount of the tender.

By order,
D. C. DESROCHERS,
Secretary,
Department of Public Works,
Ottawa, April 8, 1911.

To Mrs. Emma Barker,

Dear Sister—We the officers and members of Golden Rod Lodge No. 212 desire to express to you our warmest sympathy in your hour of sorrow in the death of your father. We realize the fact that when we are called upon to part with those we love, it is hard to say "Thy will be done." While we grieve for our lost ones we must try to realize that he has reached that better world where grief and parting are unknown. While we know that death is the lot of all, we know is none the less heavy when it comes. We hope that where our father is under this dispensation of Providence may meet the departed in the grand Lodge above where partings are a matter known and thus the partings are above where ever with partings are clear, and sorrow will pass away and be no more.

Signed in behalf of the Lodge,
T. T. B. A.
Mrs. Lizzie Le-mann, W. M.
Mrs. Jennie Smith, D. L.
