

**Special
Lecture
Courses**

MISSIONARY
COURSE,
DOMESTIC,
SCIENCE, ETC.

Regular classes are organized under the direction of the Principal, supplemented by special lectures, for the systematic study of the English Bible and Missionary Literature, and known as the (a) *Missionary Course*. While specially designed for the benefit of students in preparation for the ministry, these classes and lectures are open to all students without additional fee. (b) The College authorities are arranging a Course of Lectures in *Domestic Science*, under a trained specialist, and at a nominal fee, for the benefit of the young ladies in attendance at the College, and which may be taken up concurrently with their other college work. Other Special Lecture Courses, helpful to the student, will be given during the progress of the college year.

**Alexandra
Ladies' College
Courses**

All the departments of Albert College are open to young ladies as well as to young men. Upon completion of the regular Collegiate course young ladies receive the Diploma of M.L.A., which gives them full first year standing at the University, so that it is of Provincial as well as Collegiate value.

Museum

The Museum has been gradually increasing in importance for the last ten years, and now in the elegant new rooms, which have been specially fitted for this purpose, is a matter of large interest. The Botanic Department comprises over 2,000 specimens of North American species, contributed by Prof. Macoun. The Mineralogical Department has been augmented by contributions from the Geological Survey and by purchase from Mr. Legatt, of Montreal, and now contains 10,000 specimens of economic and other minerals also 200 specimens of French rocks, obtained by Mr. Legatt from the French Government. The Geological Department has been enlarged by the purchase of a cabinet of geological casts of the most noted fossils of the European and American museums.

To these may be added the Canadian archaeological contributions by Rev. Thomas Webster, D.D., and others, besides many articles of interest and instruction to students.

It is the intention to make a collection which shall embrace, as far as possible, all the products of the country, and it is therefore greatly desired that any having specimens will contribute them to the Museum, and thus help to increase its value and interest.
