27 world-wide tests establish proof of Studebaker Light-Six economy

LIGHT-SIX
\$1375

The fuel economy of the Studebaker Light-Six has been positively proved by 27 world-wide tests, which established an average of 26.9 miles to the gallon of gasoline.

Light-Six consumption of gasoline and oil is low. Tire mileage runs high. And its low repair cost will be attested to by Studebaker's limited volume of repair parts sales, which in 1922, averaged only \$13 per car for all Studebaker automobiles in operation.

When you consider that the cost of the Light-Six is but \$1375, and that your purchase will enable you to enjoy the economy, smoothness of operation, and the flexibility of a perfected six-cylinder engine, isn't it sound business to invest in a Studebaker Light-Six—just as thousands of other buyers have done?
