

- Breech or pelvic presentation— *contd.*
incomplete, with extension of
legs, 322
knee and footling presentations,
322
lateral extension of anterior arm,
338
management, 330
mechanism, 327
occurrence, 322
positions in, 321—326
prognosis in, 330
showing how to hold body of
child, 331
showing lateral flexion of spine,
328
Bregma or anterior fontanelle, 210,
265
Brim, pelvic, or inlet, 226
axis, 228, 230, 231
diameters, 228
inclination, 227, 228
plane, 227, 230
British Medical Association, 486
Broad ligament phlegmon, 531
Brow presentations, 319
diagnosis, 320
management, 321
mechanism, 320
Budin, 683
Bunn, 215
operation, 60
Bürger, 413
CESAREAN operations, prognosis of,
670
Caesarean section, 654
after-birth being squeezed out, 662
after-treatment of, 668
closure of abdominal wound, 666,
667
deep sutures introduced, 661
extraction of child by feet, 661
extra-peritoneal, 656, 670
for eclampsia, 481
history of, 654
indications for absolute and rela-
tive, 656, 657
in treatment of placenta previa,
454
operation, 659
Porro, 655
simple or conservative, 655
squeezing uterus through a hot
sterilised towel to promote con-
traction, 663
sterilisation of patient, 668
uterine incision closed with alter-
nate deep and superficial
sutures, 665
vaginal, 604, 655, 669
Caesarean hysterectomy, 655, 668
indications for, 658
Caesarean hysterectomy— *continued.*
pauhy-sterectomy, 669
supra-vaginal amputation, 669
Cameron, 555
Caput succedaneum in first vertex
position, 275
secondary, 276
usual location of, 276
Carcinoma syncytiale, 511
cervical, in pregnancy, 192
in labour, 396
Carter, 555
Carns, curve of, 231
Caseinogen or coagulable proteid,
558
Cavity of pelvis, 230, 231
Cells, granulosa, 2
Cells, lutein, function of, 6
lyoline degeneration of, 6
origin of, 5
Cellulitis, pelvic, 531
Celsus, 612
Cephalhaematoma, 577, 654
double, 577
Cephalotribe, applied to head after
crushing, 677
Anvard's, 677
Braxton Hicks's, 675
Winter's, 677
Cephalotripsy, 675
Chamberlain's forceps, 625
