

PHARMACOLOGY AND THERAPEUTICS.

Examiner PROF. JAMES STEWART, M.D.

1. Describe fully how the process of digestion may be influenced by alcohol, opium, quinine, strychnine, bicarbonate of potassium and hydrochloric acid—

- (a) In small doses.
- (b) In large doses.

2. Take any drug that has a distinct action when (a) applied locally to the skin or mucous membrane; (b) when absorbed into the blood; and (c) while being eliminated. Describe fully such action as the agent you choose may be possessed of, and write a prescription (metric system) for any use that can be made of—

- (a) Its direct local action.
- (b) Its internal action.
- (c) Its remote local action.

3. In sleeplessness, the following agents have been shown to be of value, viz., Strychnine, Opium, Sulphonal and Electricity. Explain their mode of action and point out in what particular forms of sleeplessness are they indicated.

How should they be administered?

4. Give a sketch of the dietetic treatment of Diabetes Mellitus and Acute Bright's Disease. Explain the reasons for adopting the form of diet you recommend.

5. In what conditions may stimulants of the respiratory centre prove useful? Write prescriptions for the uses you mention.

6. Explain the mode of action of alcohol, cold water and antipyrine in fever.

M.D. C.M., FINAL EXAMINATION.

PRINCIPLES AND PRACTICE OF SURGERY.

Examiners { PROF. G. E. FENWICK, M.D.
PROF. F. BULLER, M.D., M.R.C.S.E.

1. To ligature the right common Carotid Artery, mention the structures to be cut through, the part of the vessel usually selected for the application of the ligature, and the relative position of contiguous structures to be avoided.

2. Trace the anterior Tibial Artery from its origin downwards. In wound of the vessel in the middle third of the leg, what structures would
