

Tire Rolled Flat, 192" Long.

The illustration represents the tire and lugs of a Hart-Parr 60" drive wheel, rolled flat like a ribbon, with the lugs placed end to end. In this form the tire is 192" long and the lugs 252" long. The difference in favor of the lugs is 60", showing that they have 31% greater surface contact.

Lugs Rolled Flat, 252" Long.

BIG POWER FOR SPRING WORK

The size and quality of your 1913 harvest will depend, largely, on the start you give your crops this spring. The earlier the start, the better the crops. So this season, if you have a lot of spring plowing and seeding to do, don't depend on horses. Don't start with the odds against you and realize, too late, that your power supply is sadly over-taxed and inadequate. You need big, dependable power all year 'round, but you need it most in spring. You get it, too, if you own a

HART-PARR OIL TRACTOR

It furnishes you the combined power of 5 men and 15 to 30 horses. It will plow 25 to 30 acres a day, full plow depth. Work day and night and plow 50 to 60 acres daily. If it's sod to break or stubble to plow, with a Hart-Parr Oil Tractor you can jump right into your spring work as soon as the ground is fit to plow and stay with it until every furrow is turned and the last seed safely in its bed. The tractor does each operation in quick succession, without delay. Perfect plowing and a seed-bed, ideal for seed germination and growth, result. You finish weeks ahead of your neighbor who plows with horses. And this early start may mean the difference between profit and loss when your crops finally reach the elevator.

FIRST ON THE JOB IN SPRING

Unlike tractors with smooth tired drive wheels, fitted with wedge-shaped lugs, a Hart-Parr Tractor doesn't cut into the ground and dot it with a net work of small holes, with hard packed soil between. The drive wheels are equipped with wonderful wave formed lugs which afford 31% greater surface contact than any other form of lug. (See Illustration No. 2).

These lugs clean perfectly in soft ground and afford a bulldog grip without injuriously packing the soil. They do not chop up the ground but roll over it. Harrows, drills, discs, etc., cut the lug marks at right angles and thoroughly stir up the soil, leaving it in fine condition. These lugs really enable a Hart-Parr Tractor to work on ground so soft that it would force other tractors to stand idle for many days; in fact, you can put this "Modern Farm Horse" to work as soon as spring opens up.

This is only one of the many features that make Hart-Parr Oil Tractors the best tractor value on the market.

Farmers! Investigate This Best of All Tractors and Best of All Service

We want to send our brand new catalog and other literature to every Canadian farmer who ought to do tractor farming, but is still using horses. We want them to know why our tractors operate successfully on **cheapest kerosene**. We want them to learn of the advantages of our oil cooled engine. We want to show how our expert service **really serves**; how our quick delivery of repairs protects against serious delays and loss.
