

SAVE YOUR HORSES

WHEN a wagon is designed for light draft, and the workmanship carries out that design, you have a wagon that is easy on horses. You need not be afraid to make your IHC wagon work. That's what it's built for. Loads and roads that make hard hauling are expected conditions for IHC wagons. IHC wagons have every advantage that first grade material and skilled labor can give them. They back up with actual results every claim we make for them. They haul heavy loads, with least strain on horses. Ask any farmer who has driven one of them. IHC wagons:

Petrolia Chatham

will do all the work you would ask of any wagon. IHC wagon wheels—the foundation of wagon service—are built from selected, air-dried wood. Hubs, spokes, felloes and rims are designed for strength and service, and the workmanship on them carries out the plans of the designer. Hubs are accurately bored and mortised. Boxes are forced to position in the hubs by hydraulic pressure. Therefore, they fit accurately, and, the skeins and skein boxes being paired, easy running is assured. The wheel has the proper amount of dish to make it as strong as a wheel can possibly be made. The care and thought given to wheel construction and tire setting is evidence of equal thoroughness in the building of all parts of IHC wagons. Let the IHC local agent show you the extra value of other strong IHC points of construction. You can get literature and full information from him, or by writing the nearest branch house.
