

**A Quality Proposition:**  
First quality cream sells for the highest market price. Secured or third quality cream being a much lower price. Ask any creamery man in the country if this isn't true. Quantity of quality cream means big money.

**The Improved Frictionless Empire Cream Separator**  
the quality separator, will get it for you. The Empire proves these claims. Let it prove them to you; to your pocketbook. Send for our new catalog and prove facts.

## Weatherproof Cartridges

Dominion Ammunition stands the severest extremes of weather without change.

"Sovereign" Shells—(smokeless) or "Crown" Shells (snap shot Black Powder) are not only waterproof, but are loaded with damp proof powder. No matter how damp the weather you can always rely on their perfect and instant action—their accuracy and great stopping power.

Made in Canada and guaranteed by the

Dominion Cartridge Co. Ltd.,  
MONTREAL.

## Lost Strayed or Stolen—One Cow

That is about what happens each year for the man who owns five cows and does not use a Tubular cream separator. He loses in cream more than the price of a good cow. The more cows he owns the greater the loss. This is a fact on which Agricultural Colleges, Dairy Experts and the best Dairywomen all agree, and so do you if you use a Tubular. If not, it's high time you

did. You can't afford to lose the price of one or more cows each year—there's no reason why you should. Get a Tubular and get more and better cream out of the milk; save time and labor and have warm sweet skimmed milk for the calves. Don't buy some cheap rattle-trap thing called a separator; that won't do any good. You need a real skimmer that does perfect work; skims clean, thick or thin, hot or cold; runs easy; simple in construction; easily understood. That's the Tubular and there is but one Tubular, the Sharples Tubular. Don't you want our little book "Business Dairywomen" and our Catalog A. B. both free? A postal will bring them.

## Gossip

A remarkable year's record of milk and butter production for a two-year-old heifer has been made by the Guernsey, Penthesilia, owned by Helendale Farms, Milwaukee, Wisconsin. She freshened, July 23rd, 1906, and commenced her record when she was two years and eighty-five days old. The record was made under the requirements of the Advanced Registry for Guernseys, being supervised by the Wisconsin Agricultural Experiment Station; and her year's record is as follows: Total milk, 9,922.4 lbs.; butter-fat percentage, average 5.43 lbs.; butter-fat, 539.07. This, it is claimed places her at the head of the two-year-old class of year's record of any breed in the world, made under the requirements of an Advanced Register and with the supervision of a public institution.

## JUDGING THE JUDGE.

Those of our friends who are in the habit of acting as judges at shows are doubtless aware of the many times in which they come in for judgment at the hands of the critics whom they fail to please. There must be times, of course, when exhibitors, and even outsiders, fail to see eye to eye with judges, and in the same way there is such a thing as a judge being wrong, because according to an old saying, "a man who never makes a mistake never makes any thing." It is a good thing to criticize in a proper way the work of judges, because it shows interest, and we like to see an exhibitor who may be disappointed, asking the reason why certain rewards are made, because he wants to know, and more often than not, when the points are explained to him, he is satisfied. On the other hand, we cannot stand the exhibitor who has apparently acquired a good deal of knowledge but has not yet learnt how to lose. We frequently meet with him in the showyard, and if he does not happen to have won first prize he is generally fretting and fuming and pouring the story of his wrongs into the ears of anyone who will listen to him.—Mark Lane Express.

## SUCCESSFUL SWINE RAISING.

The above subject was discussed recently by Mr. C. C. Pervier, at the Illinois State Farmers' Institute. Mr. Pervier's methods are largely followed in successful swine raising and the following extracts from his address will be interesting:

"We ought to pay more attention to the selection of the right type of feeders, regardless of breed. It took me five years to bring up the average gain of a hog to 30 pounds a month from birth to time of sale. If we have 40 young brood sows we would select for breeding the 20 which have made the greatest growth and development. It is important to have hogs that will grow rapidly and mature early. Select those that are long in the body, broad across the back, with good hams and shoulders, and that stand squarely upon their feet, not those whose hind feet come close together, or extend forward under the body. They should be straight on the top, side lines and under lines. Do not keep breeding stock that will not produce pigs that can be made to weigh 300 pounds at 12 months of age.

"I have obtained the best results by feeding grain but twice a day, and only what the hogs will eat up clean at each meal. Every shovelful is counted, and if there is any left uneaten in an hour or two, the amount is cut down at the next meal. In feeding too heavy there is a large waste of grain. I regard it just as essential for the hog as for the steer, that he should have an abundance of pasture the year around, if possible. The ideal hog pasture is alfalfa, or a mixture of clover, with an abundance of green feed throughout the season. Hogs drink often, but little at a time, and it is absolutely essential that they have all the water

**Bog Spavin**  
Cure the lameness and remove the blemish without scarring the hock—have the part looking just as it did before the blemish came.

**Fleming's Spavin Cure (Liquid)**  
is a special remedy for soft and semi-solid blemishes—Bog Spavin, Thoroughpin, Splint, Curb, Capped Hock, etc. It is neither a liniment nor a simple blister, but a remedy unlike any other—doesn't irritate and can't be imitated. Easy to use, only a little required, and your money back if it ever fails.

**Fleming's Vest-Pocket Veterinary Adviser**  
describes and illustrates all kinds of blemishes, and gives you the information you ought to have before ordering or buying any kind of a remedy. Mailed free if you write.
