### Care of House Plants.

In caring for house plants it should  
be borne in mind that they are of two  
classes and that such plants as ferns,  
palms and the rubber plant will do  
better in those parts of the room  
where the light is limited, while flow-  
ering plants, such as geraniums, tulips,  
marigold and cyclamen, may  
have as much light as possible.  
Plants are more like man in being  
more or less sensitive to the atmosphere  
of the room. If this is suitable even  
the soil is of secondary importance. The  
atmosphere must be kept at a suitable  
temperature and also for success,  
must contain plenty of moisture. A  
dry atmosphere, even when plants are  
well watered, is fatal to good growth.  
Regular watering is another important  
factor for success.

Plants will grow better in houses  
heated with hot water than they will  
in those heated by hot air or steam.  
The latter systems absorb the moisture  
from the atmosphere with the  
result that the plant either loses some  
of its leaves by withering or falls to  
stand on the radiators to give off  
moisture always improve the conditions  
of plants. The plants will last  
longer when the atmosphere is kept  
somewhat cool and moist. The ideal  
temperature ranges from about 50 de-  
grees to 70 degrees. Higher tempera-  
tures necessitate more frequent water-  
ing. Some plants need to be watered  
daily, others not more than twice  
or three times a week. A pot which  
rings hollow when tapped with the  
knuckle needs water. Over-watering  
is bad for plants and only one or two  
varieties, like the spider, will succeed  
if the pots are allowed to stand in water.  
All pots should be supplied  
with good drainage. In the case of  
broken crocks filled in at the bottom  
of the pots.

Break air is always beneficial, but  
in the form of direct draughts  
A temperature of 40 degrees or lower  
will often be lonely if the tender  
houseplants. Palms and ferns are the  
better for spraying once or twice a  
month. Never water a sticky plant  
too freely; it more often requires  
repotting. Most plants will be benefited  
by a yearly repotting. Healthy  
plants and plants in flower require  
much more water than those which  
are not growing. They should not be watered  
so often that it becomes soggy and  
cold. A plant with cold feet and a  
hot head dies.

Mr. Hoover does not think the Ger-  
mans are as near starvation as they  
pretend to be. Perhaps he thinks  
that to reduce them to the same diet  
as they forced on the Belgians would  
be no act of justice.

The British Government has warned  
Berlin that if British prisoners are  
abandoned to starvation the German  
people may meet the same fate. This  
is the only kind of argument the Ger-  
mans will understand.

Give The Boy A Chance.

Someone has said, 'Count no man  
happy until he is dead.' We may al-  
most say, 'Judge no boy a failure un-  
til he has had his chance.' A content  
young publication, *Tit-Bits*, is auth-  
ority for this.

Isaac Barrow, who turned out a man  
and a scholar, was a boy at Charterhouse  
noted chiefly for his stormy tem-  
per, proverbial idleness as a scholar,  
ungenerous habits and such un-  
happiness did he cause his parents  
that his father was wont to declare  
that 'it pleased God to take from him  
one of his children, he hoped it  
would be Isaac.'

When the Duke of Wellington was  
about to give his mother so much  
trouble that one evening she bit-  
terly rebuked him when asked what his  
wishes were to be. He had better go  
into the army. 'And He that is on-  
ly fit for the bullet!'

Black as Dirt  
About the Eyes

Liver Was All Upset and There  
Was Pain Under the Should-  
er-blade — Two Inter-  
esting Letters.

So many people suffer from dis-  
orders of the liver that we feature  
these two reports, just recently  
written, giving valuable information  
and many remedies.

Dr. Chase's Kidney-Liver Pill  
did wonders for me. I had taken one  
pill and had vomited, so I took another  
and the next morning I was well again.

Dr. Chase's Liver and Shoulder  
Pills are the best I have ever had.

He Comprised.

We know, Wash, I Peter 1st, but  
since I got religion I gave it up. Last

night, in Peter Smith's shoe-store I

wore a pair of cowhide boots just my

size, No. 14, and the devil says to me

'Take 'em, take 'em,' but the

Lord says, 'No, let 'em alone; let 'em

alone; it's a stinging.'

The devil said, 'Take 'em quick

now and stochastic. I knew I could

stick 'em under my coat, and get

right away, without nobody ever

knowin' it. But, bless the Lord, I stood

up, took a pair of shoes,

and took a pair of shoes.

Love is one of the few things that

are never displayed on the barge-

counter.

### Care of House Plants.

In summing up results, the authors  
state that the hay crop is some 20  
per cent below the average. This  
shortage is more serious because no  
surplus has been carried over from  
the previous year. Note the less  
farmers will probably have sufficient  
buy for their own use, except in a  
few localities where the supply has  
been held short.

There are not a large number of  
useful house plants and those which  
experience has shown are best suited  
for the purpose demand certain definite  
conditions. The fundamental condition  
relates to the atmosphere of the room.  
If this is suitable even the soil is  
of secondary importance. The  
atmosphere must be kept at a suitable  
temperature and also for success,  
must contain plenty of moisture. A  
dry atmosphere, even when plants are  
well watered, is fatal to good growth.  
Regular watering is another important  
factor for success.
