"One story's good fill another is told."

BY CHARLES SWAIN.

There's a maxim that all should be willing to mind,
'Tis an old one—a kind one—and true as 't is kind;
'Tis systhy of notice wherever you roam,
And no worse for the heart, if remembered at home!
If sandal or censure be raised against a friend,
Be the last to believe it—the first to defend!

Say, to-morrow will come—and then time will unfold
That "one story's good till another is told."

A friend's like a ship, when with masic and song The tide of good fortune still speeds him along. But see him, when tempest hath left him a wreck, And any mean billow can batter his deck; But give me the heart that sympathy shows. And clings to a messenate, whatever wind blows; And says—when aspiration, unanswered grows cold—Wait—" one story's good till another is told."

SING TO ME, LOVE.

Sing to me, love! I'm sad to-night,
A weight of grief is on my breast,
And thy sweet voice alone can charm
My spirit to its wonted rest,
There's music in the song of birds,
Oft times they make rich melody,
But music from thy lips, my love,
Is sweeter than all else to me.

Sing ta me, love, and let thy voice Rise sweatly in some favourite strain, For mesic has a holy power. To charm my apirit from its pain. And when the stars begin to glow, How sweet the quiet hymn of eve! It whispers of some far off land, Where we at last shall cease to grieve.

Darieties.

A Missa's Legacy to Queen Victoria.—A Mr. Neild, recently deceased, has bequeathed to Queen Victoria nearly the whole of his property. It consists chiefly of land, scattered in various counties, and is valued at half a million sterling. Neild was a barriester at law, and died in Chelsea, aged seventy-two years. He was pussessed of an immense fortune, but was of very eigentric and penurious habits. At the death of his father, thirty years since, he came into possession of about \$1,250,000, which sum had not been touched up to the period of his death. The deceased was never known to wear a great coat. He usually dressed is a blue cest, with metal buttons, which he prohibited being brushed, as it would take off the nap and deteriorate its value. A few days before his death, the deceased told one of his executors that he had made a most singular will; but as his money was his own, he had done as he pleased with it. The executors, are the Keeper of the Privy Purse for the time being (Dr. Tattan), and Mr. J. Stevens, of Willesburough. After bequeathing a few trifing legacies, the deceased has left the whole of his immense fortune to "Her Most Gracious Majesty Queen Victoria, begging Her Majesty's most gracious acceptance of the same, for her sole use and benefit, and of her heirs," &c. The property is estimated at upwards of \$2,500,000. For some years before his death, Mr. Neild scarcely allowed himself the cummon necessaries of life; and has left a poor old housekeeper, who was with him for more than twenty-six years, without the smallest provision or acknowledgment for her protracted and far from agreeable or remunerative services.

DREAMS.—Dreams usually take place in a single instant, notwithstanding the length of time they seem to occupy. They are, in fact, slight mental sensations, being less or more intense, painful or agreeable, according to certain physical conditions. On this subject the following observations, occur in Dr. Winelow's Psychological Journal:—"We have in dreams no true perception of the lapse of tine—a strange property of mind! for if such be also its property, when entered into the eternal disembodied state, time will appear to us eternity. The relations of space, as well as of time, are also annihilated; so that while almost an eternity is compressed into a moment, infinite space is traversed more swiftly than by real thought. There are numerous illustrations of this principle on record. A gentleman dreamed that he had enlisted as a soldier, joined his regiment, deserted, was apprehended, carried back, tried, A genreman creamed that he had enlisted as a soldier, joined his regiment, deserted, was apprehended, carried back, tried, condemned to the usual preprations, a gun was fired; he awoke with the report, and found that a noise in the adjoining room had, at the same moment, produced the dream, and awakened him.

A friend of Dr. Abercrombie dreamed that he had crossed the Atlantic, and spent a fortnight in America. It embarking on his return, he fell into the sea, and awaking it the fright found that he had not been asleep ten minutes."

Practising for a Voyage to Australia.—The other day, some gentlemen eruising on a part of the Irish coast, observing that about the same hour every day a boat, containing two men and a woman, landed its passengers on the shore, and after a short time returned with them, inquired the reason for this daily accursion. "My man," said one, "what is it makes you come here every day? Is it that you like it?" "Oh, your honors, not at all, at all," was the reply; "but fairs, your honors, the wife and me 's going out soon to Australy, and we were just practising the say sickness, that we may be used to it when we start." "Well, and do you find yourselves improving?" "Ah, shure, your honors, the wife's sick every day; but she's getting on purtily, anyhow." So the worthy couple were left to qualify themselves for emigration, by practising to say sickness." PRACTISING FOR A VOYAGE TO AUSTRALIA.—The other day

DON'T GET INTO A HURRY .- A gentleman was separate DON'T GET INTO A HURRY.—A gentleman was separated the other day from his wife, in a most awkward manner, by simply being in too great a hurry. The gentleman alluded to, together with his wife, evidently had intended taking the steam boat for Albany, but arrived at the wharf, just as the boat was taking her departure. The simple-minded man, losing all judgment and self-command in his hurry to get on board, gave a tremendous bound, and gained the deck, leaving his better half behind, and didn't discover his mistake until, in seanning the space over which he had leaped, he discovered his wife standing on the dock.

To PREVENT A COW FAILING IN HER MILE.—Wash the cow's udder and teats with pure cold water before milking, and then milk her morning and evening as dry as possible; negligence in this latter precaution is one of the causes of cows failing in their milk. The cow should, if possible, be always milked by the same person; and while the process is going on, a small quantity of hay should be placed before the animal. This furnishes employment for the jaws, and draws her attention from what is going on, and the milk is, in consequence, yielded freely.—Am. Fet. Jour.

SHORT AND UREFUL RULE .- Solid feet multiplied by 45, and divided by 56, gives bushels of 2150 2-5 inches each.

Example.—How many bushels in a wagon-bed, box, or granary, eight feet long, four feet wide, and two feet deby?

Solution.—Eight, four, and two, multiplied together, make sixty-four solid feet, which, multiplied by forty-five, and the groduct divided by fifty-six, gives 51 3-7 bushels.

The lace Acc.—When we are drawn by iron horses, on iron roads, construct iron houses, build iron ships, sleep on iron beds, sit in iron chairs, drink from iron fountains, and those of us who have any money keep it locked up in iron asies, and those who haveth not are locked up in iron jails, may we not with propriety call this the " age of iron?"?

When the Hindoo priest is about to baptize an infant, he utters the following beautiful centment:—"Little babe, thou enterest the world weeping, while all around thee smile; contrive so to live, that you may depart in smiles, while all ground you weep."

paules.—Why is a philosopher like a cow? Because

Army Contract.
SEALED TENDERS will be received at the URDAY, the 6th November, 1852, until mentioned Supplies, viz :—

FRESH BEEF.

FRESH BEEF.

Such quantities of Ox or Heifer Beef, of the best marketable quality, as may be required for Her Majesty's forces in Prince Edward Island, for the term of one year, commencing 1st of April, 1853. JOHN M'GILL. JOHN M'GILL.

West River Mills.

West River Mills.

To BE LET, for such time as may be agreed upon, the MILLS at the head of the Elliot River, near Bonghaw, now in the occupation of the Subscriber. They consist of a Grist, Saw and Carding Mill, which will be let together or separately.

They are situated on one of the most powerful streams on the Island, being never without a sufficient supply of water, and are an excellent stand for business. For further particulars, apply to WILLIAM CROSBY.

Eliot River, Aug. 10, 1852.

TO BE LET OR SOLD, A CRES of LAND, a GRIST MILL, four Houses and other Buildings, situate five and a half miles from Charlottetown on the Malpoe Rond.

The whole Estate may be had in one, or the Mill by itself, and the Land in tracts of any size to suit Leaseholders or Purchasers.—For particulars, apply to

WILLIAM CURTIS.

Mr. J. W. IRISH.

DEAR SIR,—Please send us two more bartels of your Artificial Slate. We have seen some of the good effects of it at the last fire. Some of the Roofs covered with it did not catch at all, and when the walls were hard some of the roofs came down in one piece, and others were the means of saving the building, especially one roof alongside of the Bank B. N. A., which also was one means of saving the Bank.

Please see that it is on board of the first boat, as if might be neglected and second.

STEWART & NEILL.
ST. John, N. B., July 20, 1850.
John Ross, Esq., Patentes of the Purple Metallic Iron

JOHN ROSS, Esq., Patentes of the Purple Metallic Iron Paint, and I have just painted a new Ship with your Metallic Iron Paint, and I have much pleasure in stating that I never painted a Ship with so small a quantity of Paint and Oil, and look of well. From its adhesive qualities and the manner: it covers the wood, I have no doubt but it will be more durable and much chapter than any other paint used for such purposes, and would recomming it to the public generally.

Yours Str.

Yours, &p., ROBERT G. MORAN.

Ross Muzallic Paints.—We have already called public attention to the high estimation in which the Metallic Paints, manufactured by John Ross, Esq., Truro, are held by those who have had occasion to use them. Certificates of a highly satisfactory character in praise of these articles of Provincis manufacture appear elsewhere, in this issue, and from information afforded by parties who have similarly applied them, we can safely endorse the epinions therein contained.—Balifas Sun.

2007. The METALLIC PAINTS are mixed and put on like an ordinary paint.

THE ROAD TO HEALTH! HOLLOWAY'S PILLS.

CURE OF A DISORDERED LIVER AND BAD DIGESTION

CORP OF A DISORDERED LIVER AND BAD DIGESTION

Copy of a Letter from Mr. R. W. Errkus, Chemist, 7 Presco

Street, Liverpool, dated 6th June, 1881.

To Professor Holloway:

Sin,—Your Pills and Gistment have stood the highest on our sale list of Proprietary Medicines for some years. A customer, to whom I can refer for any equivies, desires me to let you know the particulure of her case. She had been troubled for years with a disordered liver, and bad digestions. On the last occasion, however, the virulence of the attack was so alterning, and the inflammation net in so severely, that doubte were entertained, of her not i-ting able to bear up noder it; fortunately she was, induced to try your Pille, and she informs me that after the first, and such succeeding dose, she lind great relief. She continued to take them, and although the used only three Boxes, she is now in the enjoyment of perfect health, I could have sent you many more cases, but the above, from the seventy of the attach, and the appendy cure, I think, speaks much in favor of your antonishing Pills.

AN EXTRAORDINARY CURE OF RHEUMATIC FEVER, IN YAN DIEMEN'S LAND.

Copy of a Letter inserted in the Hobart Topin Courier, of the of the 1st March, 1831, by Major J. Welch.

Margares McConsigna, nineteen years of lage, testiding at New Town, has been suffering from a violent rheumatic lever for sprairing of two months, which had entirely deprived her of the use of her limbs; during this period, she was under the care of the most emissed hedded man in Hobart Town, and by them her case was considered hopbels. A friend prevailed upon her to try Hollowsy's celebrated Pills, which she consented to do, and is an incredibly short apoc of time they effected perfect cure.

CURE OF A PERBEGON As VERBER OR ARCH.

prevailed upon her to try Holloway's celebrated rims, which sine consented to do, and is an incredibly short space of time they effected perfect cure.

CURE OF A PAIN AND TIGHTNESS IN THE CHEST AND STOMACH OF A PERISON 84 YEARS OF AGE.

From Messrs. Thew & Son, Proprietors of the Lynn Americar, who can vouch for the following statement.—August 2, 1851.

To Professor Holloway.

Sin,—I desire to bear testimony to the good effects of Holloway's Pills. For some years I me sed severely from a pain and tightness in the stomach, which was also accompanied by a shortness of breath, that prevented me from walking about. I am 84 years of age, and notwithet standing my acvanced state of life, these Pills have so relieved me, that I am destrous that others should be made acquested with their virtues. I am now rendered, by their means, comparatively active, and can take exercise without inconvenience or pain, which I could not do hefure.

(Signed) HENRY COE,
North Street, Lynn, Norfolk.

AN EXTRAORDINARY CURE OF THE GRAYEL, AND A MOST DANGEROUS LIVER COMPLAINT.

Copy of a Letter addressed to J. K. Heydon, Esq., Sidney, New South Waltes, dated Pabruary 25, 1851.

Sin,—A Mr. Thomas Clark, a cettler at Lake George, was for a considerable time seriously afflicted with a complaint of the Liver, together with the Gravel. His medical attendants, after trying all their skill, candidy told him that his case was hopeless, and any further efforts useless. In this situation, and when expecting every day would terminate his existence, a friend recommended him to try Holloway's Pills, and an a forlor hope he did so, the first door gave him considerable relief, he therefore persevered in taking them according to the directions, and is now restored to perfect health. Ho will deel great pleasure us confirming this statement, or even make an affident to the same effect, should it be required.

The c

The principal ingredients are Alumina, Silica and the Oxides of Iron. The adhesive quality of the latter not only binds and attracts the particles together, but the substance covered also. The longer exposed to the weather the more powerful the struction, and consequently the harder the Slate. As various shades of colour are obtained, Brick buildings may be made impervious to moisture, and the fashionable colours of either Free Stone or Granite. The oil must be evaporated by the action of the weather before it is Fire proof, which will take from nine to twelve moisture.

The METALLIC PAIN IS, Purple and Red, are effered as Weather Proof solely. Their base being Irons, secures them from Galvanic action so fatal to lead and other Paints on Iron work—and their chemical combination makes it impossible, that any change should take place from atmospheric influence or the cation of Salt Water and Suphureted hydrogen so prevalent in Sen Ports and Tidal Harbours. They surpass all Paints yet discovered in Cheopness and Durability, which render them, pre-eminently adapted to the covering of all kinds of Iron work, such as Shipping, Mills, Bridges, Steam Machinery, Railway Cara, and Iron Railing. The METALLIC PAIN I'S have been analysed by Professor Hays of Boston. The following is an extract from his Certificate:—"As a permanent pigment, this mineral must rank with the most indestructible and unchangeable bases. For covering Metallic Ware, its composition shows that it is eminerally fitted.

(Signed) AUGT. A. HAYS, State Assayer." Directions.—Artificial Slate. Mix the powder with pure Boiled Linssed Goli and a little Spirits Turpentine to the consistency of very thick Paint, and apply with a common Brush, being careful to keep the mixture well strree while patting it do.
