COST OF PUBLISHING

Too many people have the idea that a weekly newspaper should publish every item of news handed in, because it is local news not withstanding that the "news" referred to is in its way an advertisement announcing a meeting of some organization or society, "Here's something to fill up" is often what accompanies the handing in of such an item. Perhaps newspaper publisher is no more a public conven blame for this impression, for they too often accept such items and publish them while mentally protesting. The sources of income to a weekly newspaper in a small town are very limited and the cost of production is just as great as in a large town. The newspaper publisher is no more a public conven ience than any other business man and you might as well ask the rail way company to carry you free to the next town because the trains

are going there anyway and there

are a number of empty seats, as to
