Suicide of an Artist.

READING, P. A., July 5.

The quiet and peaceable Quaker community near Lionville, Chester county, just south of this city, is in a high state of excitement, owing to the tragic suisian artist, who made his advent among a favor by sending in their names and that community a short time ago. board. His hands were small and delicate and he could do no hard work. He obtained employment on the farm of THE CARBONEAR HERALD John Fetters.

Residing with the family of Fetters was a young lady of prepossessing appearance, named Mary Stine. The young Russian fell in love with Miss Stine, and it appears that she gave him encouragement. Her Quaker friends, however, interfered, as it is against their rules to permit outside marriages; besides, the young Russian was not known. He was thought to be a fugitive from justice. Miss Stine, having more respect and regard for her friends than love for Byron dismissed him. dumb to his entreaties.
