WHITE SALE.

P.F. COLLINS

WHITE SALE.

The Fogota Here

The s.s. Fogota, Capt. B. Barbour, arrived here at 8.15 p.m. yesterday from the northward. When she left here on Tuesday last she made a good run north, and arrived at Twillingate Thursday at 8 p.m. She left there again at 3 a.m. Friday. All the way coming up the ship had dense fog and had to run slowly, but considering the conditions did good work. A heavy N. E. wind prevailed and it was intensely cold. Thursday was the only clear day and a large body of ice was in sight off Fogo that day. The fog settled down again and she could not make Elliston or Grate's Cove as a sea ran high. She harbored

at Valleyfield Saturday night and left there Sunday morning. Her passengers for this port were Mrs. LeDrew and two children, Rev. Mr. Hann, Miss Day and 12 steerage. Several clergymen were landed at Wesleyville to attend the Methodist District Meetings.

MINARD'S LINIMENT is the only Liniment asked for at my store and the only one we keep for sale. All the people use it. HARLIN FULTON. Pleasant Bay, C. B.

Gasolene High.

Gasolene is an article which is going up in price by leaps and bounds. In January last it was only 12 cents per gallon, while now it is 19 cents, an increase in price of 75 per cent. This is owing to the enormous demand caused by the increased use of motors in boats, cycles, automobiles and motors for driving machinery. In New York state there are 1,000,000 automobiles in use, and 5,000,000 gallons of gasolene are consumed there daily. In England the cost has increased so rapidly that it is quoted at two shillings per gallon. It is a commodity which will command a big price shortly.

Train Notes.

The regular at 6 p.m. Saturday took out 150 persons taking advantage of the week end holiday. The local arrived here at 9.40 p.m. Saturday bringing J. A. Robinson, Dr. Paterson, Mark Chaplin, Mr. Barnes, Capt. T. Bonia, Mrs. M. F. Toole, Mr. Smith, Mr. Williams and 30 second class. The Bruce express arrived here at 12 noon, yesterday bringing Hon. W. C. and Mrs. Job. M. Hull, of the Gordon-Few Co., and about 30 second class. The 2.30 excursion train conductor Howlett took out 200 passengers and returned at 9.30. The Bruce express left here at 6 p.m. yesterday taking L. Hennessey, J. Baxter, Mr. Sinnott, Commander Coombes, Lieut. Bamber, Mr. Colville, F. Moore, W. H. Bartlett and wife, O. J. Emerson, J. F. Mitchell, J. Piercey, the Selman Stock Co. and about 80 second class. The S. S. Florizet left New York on Saturday last for Halifax and this port.

Crown of Gold for Nun

Sister Elizabeth Norris, of Chicago, Celebrates Fifty Year Jubilee in Order of St. Joseph. Chicago, June 8.—A golden crown, the reward of fifty years of a life dedicated to the altitudes, was placed on the head of Sister Elizabeth Norris, assistant superior of St. Bernard's hospital, today, when she celebrated her golden jubilee as a nun. The vows taken fifty years ago in the Order of St. Joseph will be renewed, and in place of the wreath of white flowers placed on the head of the young novice a half century ago, the golden jubilee witnessed another crowning, this time a golden crown of wheat and laurel and flowers, symbols of her faith.

CONFIRMATION SUNDAY—It was announced at the Masses in the R. C. Cathedral yesterday that the Sacrament of Confirmation would be administered next Sunday in the forenoon at the R. C. Cathedral and in the afternoon at St. Patrick's.

A Leaf from Boy Scouts' Book

BY RUTH CAMERON.

If you were on a train and there was an accident, and a everyting was thrown into confusion, and perhaps a fire or a darkness, would you know in what part of the train to look for the emergency tools and the fire extinguisher?

If you were asleep in your berth on a ship and were wakened suddenly by being told that the ship was sinking and you must get into a life-preserver, would you know where to look for one and how to put it on?

Two young women were taking a one night trip on a steamer. As they were preparing for bed, one of them paused to read the printed instructions in regard to life-preservers, and even took the pains to look under the berth to see if they were there and to make sure that she thoroughly understood the directions about adjusting them. The other girl was most amused at all this precaution—needed to say this was prior to April 14—and urged her companion to stop talking all that nonsense and come to bed.

Previous to the terrible disaster that shocked and sobered a world of men who had been growing blantly confident of their superiority to nature and the elements wonder how many voyagers would have carefully read these instructions. Perhaps one in ten. Or had I better say one in a hundred?

For the next few years, until we have had time to forget, I suppose we shall all be more thoughtful in this particular direction. But what about giving a little forethought in regard to what we would do in case of other kinds of accidents?

Do you notice the exit signs in a theatre before you compose yourself to enjoy the play? It would take but an instant and it might mean your life. Fortunately the chance that you would need your knowledge is very, very slight, but on the other hand, you are not risking anything on that long chance except a moment's attention.

A car full of passengers probably owe their limbs, if not their lives, to one young man who thought it worth while to know what to do in case of accident. The motorist fainted when the car was on a steep down grade. Instant action was necessary as there was a hairpin curve at the bottom. This man had deliberately noticed the method of running the cars because he thought it would be a good thing to know, and he was able to throw on the brakes with lightning swiftness.

I am very fond of the Boy Scouts' motto which is "Semper Paratus"—"always ready." Surely a great many accidents might have been prevented or at least made less terrible if more of us lived that motto.

Someone may suggest that it is not a pleasant thing to be always expecting an accident. No, my friend; but you need not be always expecting an accident. Just "semper paratus," you know. Really that's quite a different thing.

Ruth Cameron

A BLOOD-MEDICINE WITHOUT ALCOHOL.

Recently it has been definitely proved by experiments on animals that alcohol lowers the germicidal power of the body and that alcohol paralyzes the white corpuscles of the blood and renders them unable to take up and destroy disease germs. Disease germs cause the death of over one-half of the human race.

A blood medicine, made entirely without alcohol, which is a pure glyceric extract of roots, such as Bloodroot, Queen's root, Golden Seal root, Mandrake and Stone root, has been extensively sold by druggists for the past forty years as Dr. Pierce's Golden Medical Discovery. The refreshing influence of this extract is like Nature's influence—the blood is bathed in the tonic which gives life to the blood—the vital fires of the body burn brighter and their increased activity consumes the tissue rubbish which has accumulated during the winter.

Mrs. Hayes

Dr. R. V. Pierce, the founder of the Invalids' Hotel and Surgical Institute, and a physician of large experience and practice, was the first to make up an ALTERNATIVE EXTRACT of roots, without a particle of alcohol or narcotic.

It is with the greatest pleasure, that I write to let you know of the great benefit I received from the use of your medicines and self-treatment at home. Mrs. Wm. Hayes, of Lansing, Mich. I suffered for three years from a running sore. Consulted four doctors but they failed to mend or give relief. Finally I was told I was in consumption and would have to consult a specialist concerning my eye, but the doctor said I must be cut out before the wound would heal. A kind friend advised me to write to Dr. Pierce, which I did, and after several months use of the treatment the sore is healed, and I enjoy better health than I ever did. I dressed the wound with Dr. Pierce's Alternative Extract and took the Golden Medical Discovery and Pleasant Pellets for my troubles. I shall always recommend your medicines.

Dr. Pierce's Pleasant Pellets regulate liver and bowels.

Mrs. Hayes

Household Notes.

A blot of ink on your paper may be easily removed by means of one of those little emery cardboard strips that are used for manicuring the nails. Just rub it lightly over the ink after blotting carefully, and it will remove every trace, yet leave the paper in good condition.

Go over the entire stove while it is slightly warm with a cloth wet with kerosene oil, allow it to dry, then blacken the stove; you will find it will last twice as long and have a polish greater than ever before. Each morning rub it over with an old piece of flannel and see how it will shine.

A use for an old wash boiler is to stand it in a convenient place on the back porch or near the back steps and put all old papers in it. When the boiler is full, set it in the path and apply a match to the papers. Keep the lid of the boiler on until the paper many times comes to burn the waste.

Many colds would be prevented if every cold were regarded as infectious, says a doctor. A person suffering from a cold should sleep alone and

if possible, in a separate room. Towels, soap, etc., used by the patient should not be touched by any other person, and kissing should be absolutely prohibited. Laundries generally iron linen collars flat, and as a result a good many people have trouble in getting them to set right after attaching them to the shirt. This difficulty can, in a large measure, be overcome if each collar from the laundry is taken at the end, rolled up as tight as possible and held in this position for a minute or two. The most difficult part of a waist made of allover embroidery to iron satisfactory is that part of the sleeve that is too narrow to permit the use of a sleeve-board. To overcome this difficulty, turn the sleeve wrong side out, insert a sea towel or padding folded the width of the sleeve and press both sides. The result is perfect work. When making apple dumplings, lay a round of paste on the baking board, set the apple on it, and with a sharp knife cut out V-shaped bits before tucking the paste in at the core. This makes the dumpling more shapely; it also does away with lumps of raw dough that one finds occasionally when an entire round is bunched about the apple. A very helpful article when sewing is to be done is a pincushion fastened to the top part of the machine arm. It is made by winding several thicknesses of flannel around the arm and fastening same in place with a few stitches. This cushion is always in place and saves much time and bothersome moving about when one is sitting at the machine and needs pins or needles. In washing very fine muslins, they should be soaked in tepid water in which borax has been dissolved, one tablespoonful of borax to a gallon of water being sufficient. After half an hour they can be rubbed gently in soap suds made of fine white curd soap, and boiling water then poured over them and left to cool. They should be well rinsed and squeezed rather than wrung out. Here are two good remedies for removing scorch marks: First—Boil one ounce of fuller's earth in a quart of a pint of vinegar, add eight grains of shredded castile soap and spread over the scorched places. Second—Boil half a pint of vinegar with two ounces of soda, two ounces of ful-

Ladies' Hats

Just opened and on Sale to day a new shipment of Ladies' and Misses' Hats.

SOOPER & MOORE

ter's earth and a finely chopped onion. Strain, and when cold apply a thick layer of it on the scorched surface. Wine and fruit stains must be taken out before the material is washed. Powdered starch applied thickly and left on for half an hour will generally obliterate the marks, or a mixture of salt and lemon juice is another good remedy. Neglected stains must be thus treated. Rub the part each side with yellow soap, then cover with a paste of starch and cold water. Rub in well and expose to sun and air. Unvarying results may be had with scotch-boiled eggs without the trouble (and uncertainty) of timing them or the necessity of hurry in serving. Place the eggs in a vessel—tin, or granite ware being best—that can be covered. Do not put the vessel on the range. Pour sufficient boiling water over the eggs just to cover them; then place the cover on the vessel and let it stand till ready to serve. The eggs will never harden to more than a creamy consistency.

Heroic Action of Auto Driver.

WINDSOR, Ont., June 11.—Deliberately choosing what seemed certain death, George McCarthy, a tester employed by the E. M. F. Company of Walkerville, and his mechanic, Edward Last, ditched their car while running at high speed on Howard Avenue, outside the city limits, late yesterday, to avoid colliding with a horse and buggy driven by a woman, which crossed the path a few yards in front. The car was smashed into junk and both men pinned beneath the wreckage. McCarthy will die from his injuries, while Last is still unconscious and will be a helpless cripple if he lives.

Why Don't You Try a 25c Bottle of

108

Nox-a-Cold in One Day

It will stop your cough in a few minutes; Nox-a-Cold in a few hours; relieve bronchitis and asthma. Try it. 25c. a bottle. Sold by McMurdo & Co.

Keep Sober or Walk Home.

Pittsburg Court Virtually Bars Intoxicated Persons From the Street Cars.

Pittsburg, Pa., June 6.—In future Pittsburg when a man becomes intoxicated he must call a taxi cab or walk home. In an opinion handed down by Judge McKenna, conductors of the Pittsburg Railways Company must not permit intoxicated persons to ride on their cars to the annoyance of other passengers.

Aged Woman Burnt.

Amherst, N. S., June 11.—Mrs. Rufus Coates, an aged resident of Amherst, met with a serious accident this morning while burning waste paper in the stove. Her wrapper caught on fire and she was almost in a moment surrounded in flames. She rushed out of the house screaming for aid, which was to hand in quick order, but not until the unfortunate woman was severely burned. She is about 80 years of age and one of our oldest and best known citizens.
