When we walk, or talk, or act, we call into play a certain set of nerves—nerves which obey our mental commands. That is why the arm can be raised, or the mouth opened, or the eye shut, at the slightest desire. That is why your fingers can delicately pick up a

It is the inside nerves that manage and govern and actuate the heart and the stomach, the kidneys and the liver and all of the vital functions. You cannot control these nerves. By no supreme effort of mind can you make your heart stop or start-nor can you even make it vary by a single beat a minute. And so with the stomach and the liver and the kidneys and the bowels—they are automatic—they do their work at a certain set speed whether you are awake or asleep-whether you want them to or not, It is on these inside nerves that life and health depends.
