IN MAY—KITCHENER

Cryptic Statement Attributed to Minister of War by British Gossip.

ROUMANIA NOW EQUIPPED

Has Obtained Necessary Supplies and Arranged For Financing War.

[Canadian Press.]

London, Jan. 11 .- 1:27 p.m .- There are increasing indications of the early participation of Roumania in the war, thus oringing into play another party to the combination against the Teutonic powers contemplated by Great Britaini,

France and Russiz. Difficulties confronted the Allies in the earlier stages of the war in furnishing munitions, equipment and other necessities of war beyond those required for their own actual needs. These difficulties now have been surmounted, and the bstacle which hitherto has blocked full Roumanian mobilization has been reved with the arrival in that country of the requisite supplies for the equipment of and provisioning of the 600,000 men which she is able to put into the Arrangements have been completed also for the financing of these

Will Begin in May. The lack of stirring battles at the present stage is attributed by British ommentators largely to the determination of the allied commanders to content themselves with holding their present positions until the projected ring o armies is considered sufficiently strong to strike a blow which they hope will prove

The British idea that operations up to the present are only preparatory to big events fits in with a bit of gossip now Lork Kitchener, when asked concerning he probable duration of the war, said: 'I don't know when it will end, but I do know when it will begin, and that is in

The opinion is expressed in some quarters, however, that the inauguration of more general advances will take place at an earlier date than is generally known, although persons in close touch with the army believe that the real crisis

will not be reached until summer. Russia Has the Men. Russia is still sending enormous

masses of men to within easy reach of various points on her long fighting line The levies of 1914, amounting to 1,200,000 men, are just leaving the training camps, which will be occupied immediately by the 1915 levies now called out, Germany's newest levy, just announced, mounts to 600,000 men of the age o 19, and her masses of reserves already under arms enable her to rush heavy reinforcements wherever required with out withdrawing troops already engaged at the front, in either the eastern or the vestern fighting zones. This was shown a few days ago in Alsace, when the Germans assembled a force sufficient to re-capture Burnhaupt from which point the

French were threatening Muelhausen. A Strategic Point. For the moment, the centre of interest the western field is Perthes, on acof the railroads in that region. which are of equally great importance to and the French. Should either side gain possession of the railroad now held by the other, lines of communication would be cut, and it would be necessary to evacuate trenches for a considerable distance. The Germans realized that danger when the French captured Perthes, and brought forces in an attempt to regain

the lost terrain. The fighting in Poland recently has been purely of a local character. The Germans are said to be contemplating an attack at a new point. Apparently the Russians are content for the present to maintain their straight line north and bouth without attempting to push west-

On to Cracow.

Further south, simultaneously with the Russian progress in Bukowina, an ad-

whether the Germans who are reported to have gone south, supposedly to assist Austria in the campaign against Servia. is suggested that their objective is Hungary, which is represented as much upset by the Russian advance against Transylvania and the activities of Rou-

Hope is expressed on all sides here that Sir Edward Grey's reply to the American shipping note will prove acceptable to the United States. There is some disposition to regard the statis lies in the reply as an indication that the British Government has been derelict its duty, in permitting large quantitles of commodities required by the elligerents to reach hostile nations.

ELUDED THE POLICE

"I'll Give a Couple of Yards of Pennies," Says Boy Pupi

The "Mile of Pennies" idea for the Belgian relief fund, will likely l taken up by the public schools, and a mile of coppers, or \$633.60 will

thus be collected to aid the Belgian sufferers. "Sure I'll give a couple of yards," said one boy pupil readily, when one of the Belgian relief fund committee explained the idea to him. The Canadian one-cent piece is exactly one inch in diameter, and so there are 12 in a foot, 36 in a yard, and so on. The mile of pennies would buy an entire carload of biscuits or flour, enough to keep alive several hundred starving persons for a while,
