as the

So many homes lack proper heating that it is often thought houses must either be cold in winter or hot and stuffy. Yet the heating of a home can be like the natural warmth of June-the air as warm, as healthfully humid, as fresh and pure.

The Sunshine Furnace radiates the healthful heat of the sun. Pure air is sent evenly over the house, warm, fresh-and clean. The dust and fine ashes, so often seen whenever most furnaces are shaken down, never get out of the Sunshine Furnace.

Dry air not necessary

The Sunshine Furnace supplies air as balmy as summer. This comes from a large water pan so located that it can be refilled easily.

Firing up and closing the dampers of the Sunshine Furnace does not send coal gas into the house. The volume of gas freed from the new coal is drawn off up the chimney. The Sunshine not only keeps the whole house warm and cosy, but continually circulates clear, pure air.

M<sup>c</sup>Clary's

Our Heating Engineer will tell you what a thorough heating system for your home will cost. More than that, he will tell you, without charge or obligation, out, so that your heating how to plan your heating system so as to get the most out of it with the least engineers can tell me how to order expenditure. If you send the coupon to-day we will send you our booklet and install a system that will properly "Sunshine." At the same time, ask for special information about

heating your own house.
