London, Ontario, Wednesday, August 31, 1921.

LONDON'S POPULATION.

There appears to be a decided lack of system in declaring the populations of the various cities in Canada, according to the new census. For example, the population of Halifax is given in the official returns just issued as 70,203, but the actual figures are only 57,674, owing to the fact that the population of Dartmouth, a suburb on the farther side of the bay, has been included.

In the case of London precisely the opposite procedure has been followed, the population being given at 53,592, when in reality more than 60,284 people reside within the limits of the city, the bureau of statistics having failed to include Ealing, Pottersburg, Knollwood Park and Chelsea Green as incorporated parts of the city.

An immediate protest from the Chamber of Commerce brought the official explanation that the London returns had been inadventently published before the neighboring census districts had been added, but it is felt

ndon does not wish to appear any bigger than it lly is, but it is a stickler for a square deal. There one of Esop's fables in which some young frogs in had come to drink. They were hugely frightened at the monster, and went and told their papa all about individual, and could not imagine that anyone could be bigger than himself, so he at once began to puff himself out. This indicates that Bacon was afraid of political or ecclesiastical persecution. He endured more or less of that, as it was, and both in and after his lifetime as big as this?" "Oh, much bigger, papa," replied the as big as this?" and the old frog little ones. "Was he as big as this?" and the old frog blew himself up a bit more. "Oh, he was much larger discoverable of the picture auction catalogues a "kindscape with out. This indicates that Bacon was afraid of political or ecclesiastical persecution. He endured more or less of that, as it was, and both in and after his lifetime had the ill fame of a sorcerer. It seems that he considered experiments in a laboratory.

In the classic language of the picture auction catalogues a "kindscape with out. This indicates that Bacon was afraid of political or ecclesiastical persecution. He endured more or less of that, as it was, and both in and after his lifetime had the ill fame of a sorcerer. It seems that he considered experiments in a laboratory. blew himself up a bit more. "Oh, he was much larger than that," was again the answer, and so it went on until the old frog blew himself up so hard in his

past and confident of her future to render such a course necessary, but she wants to keep abreast of things, and would wish all others concerned in her welfare to do the same.

MISCHIEF-MAKING BY POST.

Shakespeare has written to the effect that he who manded in the Good Book that one must not bear false Roger Bacon. witness against his neighbor. This solemn warning has stood forth throughout the ages, and yet there

are still many who heed it not.

In the old days scandalous statements involving the reputation of a neighbor were whispered behind closed doors or discussed at lonely street corners; but at the present time there is another medium, namely, his majesty's mails. It may not be generally known that majesty's mails. It may not be generally known that it is an indictable offence for any person to make use of the postoffice for the conveyance of communications of the postoffice for the conveyance of their object the service of the conveyance of their object the service of the conversion of the postoffice for their object the service of the conversion of the postoffice for the conveyance of the conveyance of communications of the postoffice for the conveyance of communications of the postoffice for the conveyance of communications of the postoffice for their object the service of the conversion of the postoffice for the conveyance of communications of the postoffice for the conveyance of commu of a scandalous nature having for their object the Ulster. undermining of the character of the person to whom they are addressed, or their persecution and annoythrough the mails are extremely difficult to detect, Western Fair are bound in calf. unless when in the form of postcards, but when such detection takes place the penalty is a heavy one, and

knowledge that in a rural community not very far from London there exists a person or persons who for over a year have been carrying on this insidious system of persecution. Those attacked are young in years, with the potato bug takes a back seat in the agricultural persecution. Those attacked are young in years, with lives full of promise, and the letters they have been receiving are of the most abominable kind. They are, of course, anonymous, and are apparently written by a person who is actuated by jealousy or by some ulterior motive yet to be discovered. Of course, no name is signed to any of these wretched epistles, as the writters of such, like lurking assassins, take cover behind the hedge of anonymity. One who endeavors to take away the character or to ruin the happiness of another by such means is quite capable of using more deadly weapons. As a matter of fact, the wielder of the steel or bullet only attempts to harm the body, but the person who uses the poisoned letters attempts to ruin both body and soul.

In mediaeval times there existed among other appliances for dealing with gossips and scandalmongers the ducking stool and the "branks." The former apparatus explains itself, and the latter was what was otherwise called a "scolding bridle," or a sort of muzzle which was fixed over the jaws of the offender. For those staged and specific the person who uses the offender. For those staged are always and an alderman. It was fixed over the jaws of the offender. For those staged and specific the person of the woodstock jail, including returned soldiers, retired farmers and an alderman. It was fixed over the jaws of the offender. For those was fixed over the jaws of the offender. For those was fixed over the jaws of the offender. For those of the woodstock jail, including returned soldiers, retired farmers and an alderman. It was fixed over the jaws of the offender. For those of the most always in the person to the proached the means are the possible of the most always and soul.

In mediaeval times there existed among other applications for the governorship of the Woodstock jail, including returned soldiers, retired farmers and an alderman. It was fixed over the jaws of the offender. For those of the possible properson. Months the was fixed to the discovery the nead t

was fixed over the jaws of the offender. For those turned soldiers, retired farmers and an alderman. It guilty of maliciously outraging the laws of decency seems strange that this position should appear so by using the post as a means of getting at their victims desirable. We thought it was only the position of the there is unfortunately no such remedy available at prisoners that was easy-going. the present day, but when such machinations have been brought home to the perpetrator the punishment, such as it is, ought to be swift and sure.

CHILLED BEEF FOR BRITAIN.

London draws attention to the good market for Cana- and dead men's bones"?

dian chilled beef in the United Kingdom. He states that competition in frozen beef is out of the question but that there is a good demand for the chilled product, which, unlike frozen meat, does not drip when cut. The first Canadian shipment of 1,000 quarters, marketed in Liverpool at the beginning of this month, sold keted in Liverpool at the beginning of this month, sold readily. All buyers were delighted with it, and will continue to buy it if a regular supply is available. Opportunities exist for beef so lightly chilled that it will approach the quality of the home-killed article, and something of its morality. The standard when we have thrown off this old something that it will approach the quality of the home-killed article, and something of its morality. The Believe not that all living seed Must fewer above the surface. instead of challenging comparison with the Argentine chilled, the shorter voyage from Canada affording considerable advantages in this direction. siderable advantages in this direction.

market, despite the embargo on live cattle.

AN EARLY SCIENTIST.

Considerable interest has been excited among scholars by the deciphering of an old thirteenth century M.S. found a few years ago at Parma. It seems probable that the M.S. was the work of the English Franciscan, Roger Bacon, and his already high reputation for intellectual attainments is materially enhanced. For it would appear that Bacon had a larger knowledge of lenses and their use for magnification than was formerly supposed.

The problem of the conference which President Harding has proposed for the reduction of armaments by land as well as by sea is momentarily the most important engaging the attention of the world. It connotes a new type of cooperation between the two great Anglo-Saxon nations and this in turn means a noriginally intended and what seemed to have been frustrated by the non-relative of the United States is now on the point of being accomplished by a special method outside of the league and yet within its fundamental principles. Let us not say that it does not concern us, our navy being at the disposal of the allies and our army demobilized.

It is a matter of prime importance in the problem of the conference which President Harding has proposed for the reduction of armaments by land as well as by sea is momentarily the most important engaging the attention of the world. It connotes a new type of cooperation between the two great Anglo-Saxon nations and this in turn means a new policy on the part of France and Japan. What the League of Nations originally intended and what seemed to have been frustrated by the non-relative proposal of the United States is now on the point of being accomplished by a special method outside of the league and yet within its fundamental principles. Let us not say that it does not concern us, our navy being at the disposal of the allies and our army demonstrate proposal of the allies and our army demonstrate engaging the attention of the world. It connotes a new type of cooperation between the two gr

DRUG SMUGGLING IS PREVENTED BY AID OF CANADIAN AIRMEN

Ottawa, Aug. 30 .- Air patrols have been instrumental in frustrating to a large extent, at least, the efforts of smugglers to land huge quantities of drugs illegally on the Pacific coast, according to reports reaching air board officials from the customs department at Vancouver, where seaplanes have been placed at the disposal of the cus-toms officials in their fight against the dope smugglers. In a recent patrol a longshoreman was arrested while tryto smuggle ashore \$1,500 worth of m from one of the vessels traveling een Canada and the Orient.
