Mayor Wenige is highly pleased with the record of the Western Ex-Moition, and was of the opinion today that the city council from present indications, would not be called upon to grant the Fair Board more than resolution of the council.

But City Treasurer James Bell points out that even this expenditure would involve no additional hardship upon the ratepayers, as this amount

"The results of operation showed conclusively that more centralized control, and less decentralization by ppointments of commissions and coards for the administration of civic activities, would prove economical and efficient. There are certain ad-ministrations, however, involving employment of many employees, and public utilities which should not be directly under the control of the council, elected by popular vote. The city manager's main asset is tact. The councils of Canada will not, at present at least, give up altogether their power to administer. The only feasible plan is to give the elected council the power to determine the policy, giving the manager advisory ower only in legislation, and the nanager the administrative, but with power to suspend employees only subject to an appeal to the council. Fred Landon, director of libraries of the University of Western Ontario, announces that as a result of negotiations carried on for some time, the library has been made a depository for the entire publications of the Smithsonian Institution at Washingon, and of the United States National Museum. These two institutions stand out prominently in scientific work in the United States, and their publications are extensive and in every way authoritative.

Everything they publish will, in future, be received by the university library, and be available for students and for the public at large. In addition, both institutions are supplying as many of their past publications as are now available, so that the university will receive a substantial ad-

dition to its resources at once. The university library is already a depository for the Carnegie Institu-tion, which annually publishes a large number of volumes, and of which complete set from the beginning is
