BRAZILIAN VIES WINNIPEG GRAIN PRICES ADVANCE

Leftovers at Toronto Live Stock Unfavorable Weather Report Canada Steamships and Maple Advances From Two Aids in Bolstering Up Quotations.

> Canadian Press Despatch Winnipeg, Oct. 7.-Unfavorable weather in Western Canada, and in several states south of the international border, was the outstanding factor in a sharp price advance on the Winnipeg grain exchange today. Wheat prices advanced from 13-8c to 35-8c, with May the strongest position at \$1.291-4. October at 11 clock hit the extreme bulge at \$1.271-2. Snow, sleet and rain has halted threshing operations throughout the prairie provinces. The coarse grains commodities ecored moderate

gains. Canadian Press Despatch.

Winnipeg, Oct. 6.—Following a lastminute rally on the United States markets, wheat prices here today advanced sharply and closed at gains ranging from 2½c for October at \$1.25½ to 3½c for May at \$1.275½. Coarse grains followed the general advance and all closed substantially higher.

Early strength was recorded, with the buying largely "shorts" covering. Both local and eastern interests were in the market, but the export business was featureless. So far as could be learned, not a bushel was worked for export out of the local market. All declines were stubbornly contested, as there was no particular pressure, and offerings were light.

There was a good volume of trade in oats and barley, with shippers and exporters taking the offerings. Investment buying featured the flax market, and a strong tone prevailed.
