EARTHQUAKE IN CALIFORNIA

Los Angeles, Cal., July 30.—This city was shaken by an earthquake last night. Most of the movement was more of an upheaving than of an undulatory obaracter. This was a sharp shock, but did not do much damage. At Acton there were three distinct shocks, the most severe ever felt in that region, but no special damage is reported. A peculiar feature of the shock at that place, however, was that immediately after the vibrations passed a large meteor, similar to the one which attracted attention on Friday night here, was seen to fall to the north. It appeared like an immense ball of fire rapidly moving from the zenith to the north. Los Angeles, Cal., July 30.—This city
