"I Feel as Tho' I Could Not Drag Thru the Day's Work"

is the complaint of many a woman in the household, office or factory.

After suffering pain, feeling nervous, dizzy, weak and dragged-down by weaknesses of her sex—with eyes sunken, black circles and pale cheeks—such a woman is quickly restored to health by the Favorite Prescription of Dr. Pierce. Changed, too, in looks, for after taking Dr. Pierce's Favorite Prescription the skin becomes clear, the eyes brighter, the cheeks plump. It is purely vegetable and contains no alcohol.

Druggists sell it in tablets or liquid, or send Doctor Pierce, at Invalids' Hotel in Buffalo, N. Y., 10 cents for trial package.

BARRIE, ONTARIO.—"I was suffering from a run-down system some time ago, was unfit to perform my daily duties, and was advised to try Doctor Pierce's Favorite Prescription. I tried it, took two bottles, and was restored to my natural strength. I cannot praise Doctor Pierce's medicines too highly, and will be willing to write to anyone sending a stamped envelope."
—Mrs. A. H. BISHOP, R. R. No. 1.

ZAM-BUK HEALS

ZAM-BUK stops the burning and prevents blistering. Just as good for tender or blistered feet, aching muscles, mosquito cuts, bruises, and all skin injuries. A sure cure for eczema and all skin diseases. All druggists 50c. box.

FIT BEES FOR WINTER

Get Them in Shape for Their Long "Shut In."

Be Sure Your Queen Is a Good One—A Strong Colony and Plenty of Stores the Next Requisites—Pay Less for Better Bulls.

(Contributed by Ontario Department of Agriculture, Toronto.)

It is taken for granted that the beekeeper has introduced a vigorous Italian queen to every colony in which a failing or poor queen was found, late in July or early August. If this has been done and room provided, so that the queen could lay to capacity and the bees still store any surplus honey that might be harvested, then the beekeeper is in a fair way to winter the bees successfully. There are two other manipulations, however, which should be completed to assure successful wintering.

First, unless one has a first-class cellar, it does not pay to attempt to winter weak colonies in the cellar. Weak colonies or nuclei cannot be wintered outdoors with success at any time.

All colonies covering less than three frames, on both sides, should be united with other colonies. The best way to unite is to place a sheet of newspaper between each brood-chamber and allow the bees to unite without any further attention, except that in a week or two the paper should be removed and the bees left in one hive-body.

The second manipulation, and equally important, with having a good queen and a strong colony, is the question of the winter food supply. Beekeepers who are willing to make an investment of not less than fifty pounds of first-class honey per colony, are the beekeepers who next season secure the large crops of honey. If the fall honey is not of known quality, then it will be better to feed each colony from ten to fifteen pounds of sugar syrup, mixed in the proportion of two of sugar to one of water. The sugar should be thoroughly dissolved, but the syrup must not be burned. This syrup should be fed while quite warm in an inverted Mason fruit jar or honey pail with perforated cover; and, if fed inside an empty super, with the entrance reduced, there will be very little fear of robbing. Feed the warm syrup in the evening and before the end of September. Then if the colony has 50 pounds of natural stores and is headed by a good Italian queen, this colony will then be in shape to either pack for outdoor wintering or to place in the cellar.

In the winter of 1919-1920 the winter loss throughout Ontario was over 50 per cent, yet even in a winter when the loss was so heavy, many successful beekeepers wintered practically without loss. It is unnecessary to have a heavy winter loss in bees, provided the beekeepers will give the same thought and attention to the apian, which successful business men in all walks of life give to their individual business.

The office of the Provincial Apiarist, Ontario Agricultural College, Guelph, is always ready to assist beekeepers in any way to make beekeeping more successful. Consult him, if in doubt.—F. Eric Millen, O. A. College, Guelph.

Paying Less for Better Bulls.

A survey recently made in connection with the "Better Sires—Better Stock" campaign carried on by the United States Department of Agriculture shows a general ratio of one bull to every 18.9 cows. Experience, however, in Pennsylvania, the state which leads in the number of bull associations, shows that 93 bulls are sufficient for the 5,694 cows belonging to members of the bull associations, or an average of about one bull for every 60 cows. These figures are taken from the bull association directory recently issued by the Dairy Division, United States Department of Agriculture.

If the members of these associations owned their bulls individually, at the usual ratio of one bull for every 18.9 cows, they would need 296 bulls instead of 93. Yet the 93 bulls give the required service as effectively as 296 would do, and in fact better, because the resulting offspring are of better quality than the ordinary run of sires privately owned, and their daughters are apt to be better-producing cows.

Even this does not tell the whole story. After an individually owned sire has been used for about two years it is usually necessary to get a new one. In eight years, therefore, these Pennsylvania farmers, if they owned their bulls separately, would have to provide themselves with four times 296 bulls, or 1,184; whereas in the bull associations at the end of two years they simply move each bull to another block. The original 93 bulls, if they all live and do well, can be used for the whole eight years. There is quite a difference between the cost of 93 bulls and that of 1,184, to say nothing of the difference in their usefulness.

Children Cry for Fletcher's

CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

IF YOU PLAY

you will play all the better on our Mason & Risch piano. If you do not, you will learn all the more quickly on our Mason & Risch piano. It is an instrument which both accomplished and beginning musicians recognize as superior. Inquire about our easy payment plan.

It is our constant endeavor to reach the very highest standard of efficiency in our funeral directing. We give our personal service to every call, do everything we possibly can to make the occasion one of dignity and good taste and use our best efforts in every instance to reduce expenses to the lowest possible basis.

Victrolas Records **Harper Bros.** Pianos and Furniture

There is nothing repulsive in Miller's Worm Powders, and they are as pleasant to take as sugar, so that few children will refuse them. In some cases they cause vomiting through their action in an unobtrusive way, but this is only a manifestation of their cleansing power, no indication that they are hurtful. They can be thoroughly depended upon to clear worms from the system.

It will Prevent Ulcerated Throat. —At the first symptoms of sore throat, which presages ulceration and inflammation, take a spoonful of Dr. Thomas' Electric Oil. Add a little sugar to it to make it palatable. It will allay the irritation and prevent the ulceration and swelling that are so painful. Those who were periodically subject to quinsy have thus made themselves immune to attack.
