Poetry.

A LOVER'S TIMIDITY.

I dare not kiss that lovely cheek,
Least I should brush away
The bloom that rivals in the blush
The rosy lip of May.

I dare not press that snowy brow,
O'er which the tresses twine,
Least the whiteness of its lily-hue
Should be transferred to mine.

Those lustrous eyes give out the light
Of belladonna's beam:
To Coeur a Paris shadowy tint
Those lashes owe their charm.

And when I softly smoothe a tress
As first my love I told,
I tremble lest an awkward touch
Should lose it from its place.

When'er a timid, cautious kiss
From those red lips I steal,
A spicy-sweet, peppery taste,
Their coral hues reveal.

And when she sweetly smiled on me,
As first my love I told,
Amid her pearls I caught a gleam
A hidden gleam of gold.

Oh, woman! made but to deceive,
How'er so fair she seem,
Her beauty is a mystery,
Her loveliness a dream.

The very form we gaze upon,
With all its rounded charms,
Shrinks into paper, word, and tow,
Within our clasping arms!

Miscellaneous.

A BEAUTIFUL INCIDENT.

A poor Arab travelling in the desert
met with a spring of clear, sweet,
sparkling water. Used as he only was
to brackish wells, such water as this ap-
peared to his simple mind worthy of a
monarch, and filling his leathern bot-
tle from the spring, he determined to
go and present it to the Caliph himself.

AN ANCIENT CLOCK.—Mr. John E. Elliott
of Clinton, N. Y., has presented to the
Memorial Hall of Hamilton College a clock
which is 250 years old and is still a good
time keeper.

AN EXPENSIVE MULE.—The Texas Legislature
recently passed a bill which makes it a misdemeanor,
punishable by a fine of \$100, for a person
to use profane language within the hearing
of any private dwelling.

THINGS WE SHOULD LIKE TO SEE.—A
fruit tree that keeps away pilferers by
its own bark. Gas that would go out
at night and come in again in the
morning. A sauceman that would boil
over with rage when the cook is insulted.

Elephants as Railroad Travel-
lers.—When about eight miles out, one
corner of a bridge gave way, and five cars
of the third section ran off the track and
turned over into the soft mud.

South Norwalk, Conn., has a genu-
ine hermit. He lives in a florid hotel,
lighted by three windows made of a small
pane of glass each. Geese, ducks, wood-
chucks, fish, and other game are his food.

A young man admiring the deli-
cate fabrics for collars in a milliner's
store wished he was an Emperor of all
the rubes.

Profanity in Texas is against the
law, \$100 worth each time. They think
of enforcing the law for a month and pay-
ing the national debt.

During the great storm in Ohio
a train of cars ran into a tunnel near North
Bend, in which the water was so deep that
it put out the fire in the locomotive, and
over a hundred passengers were imperiled.

It is fearful, says the New York
Herald, to contemplate the amount of
misery that is hidden away in the tenement
dens of New York. In these forlorn
abodes, without hope of relief, although
with the least of the world's wealth, men,
women and children die of starvation.

DEATH AMONG CATTLE.—Seven milch
cows belonging to farmers in the parish of
Glantana, county Cork Ireland, have died
of a very rare disease called the charbon.

THE Sheffield House having engaged
the services of First-class Manufacturing Jew-
ellers, is prepared to make to order, Wedding
and Signet Rings, Ladies' and Gents' Gold
Chain, Gold Lockets, Brooches, Ear-Drops,

Agricultural.

LEAVE THE AFTERMATH.

Messrs. Editors.—Your correspondent,
W. J. F., has this passage in his article on
first page of Country Gentlemen of June 8:
'Many a field has been changed for pas-
tures or hay the second year, and has been
an almost total loss. Even when sowed
with timothy, the sod deteriorates after the
second or third year and is better plowed
up and resowed than kept longer'—all of
which is true, but need not be, as the writer
of this well knows from actual experi-
ment. Timothy can be permanently con-
tained, a good stand yearly, on a soil of
average fertility, and only by leaving the
aftermath. This has been tried on the old
homestead of the writer on a lot of seven
acres, for nearly a dozen years, with un-
abated success, the last year as good as the
any. The sod, which was a pretty heavy one,
was then turned down, and produced
the best crop the land ever yielded. Oats,
corn, fodder corn and potatoes com-
pensated the crop. The soil was a yellow
loam composed of sand, gravel and clay,
and never had carried a hay crop more
than a few years, before it ran out and had
to be replanted. The reason why the sod
was turned down yielding as well as it did,
was that the rest of the farm was in sod,
and treated in the same manner, proving
equally successful. The infection spread
into the neighboring farms, and seldom is
better grass seen than is afforded by these
fields. The exceptional cases, where the
grasses are fed off, show the effect, corre-
sponding usually to the extent to which the
feeding is carried. If fed close, harm re-
sults almost invariably.

THE facts here presented have been re-
ported time and again, and with some
results for the better; but still fall feeding
and trampling of the land is too common.
Our hay harvest is near at hand. Let
those who have timothy spare a field or
part of a field for the experiment. Take
land that will not bear out the grass in
the spring—dry or drained land. Cut the
crop early, if the season is dry, before the
flower has disappeared (to keep intact the
bulb), and let not a hoof touch it after the
crop is removed, as a general rule. When
the growth is quite heavy, the season and
soil favoring it, a little feeding will not
hurt, and will be of benefit to the stock.
Let it be a fair, honest trial, and no
more advice will be needed. It is protec-
tion and plant food that the aftergrowth
furnishes, reproducing itself in addition to
the usual crop without the aftermath, aid-
ed too by the benefit which the protection
affords. And it is this two-fold benefit
that sustains the crop and improves the
land.

GLASS! GLASS!
1000 Boxes Glass, in all sizes, at cheap
rates.
White Lead, Oils, Brushes,
Paper Hangings of a kinds,
WHOLESALE and RETAIL,
The trade supplied on reasonable terms at
22 Grenville St., St. John, N. B.

GILBERT'S LANE
DYE WORKS,
ST. JOHN, N. B.
It is a well-known fact that all classes of
goods get soiled and faded before the
material is half worn, and only require cleaning
and dyeing to make them look as good as new.
Carpets, Fashions, Curtains, Dress Goods,
Rugs, Woollen Goods, Linens, and
Satin, Gentlemen's Overcoats,
Pants, and Vests, &c. &c.,
dye on reasonable terms. Black Goods a
specialty.

FLOUR.
It is now certain that a considerable part of
the new crop of Wheat in Canada and the
United States has been harvested in a damp
and unseasoned condition, and that much of
the new flour will be soft, weak and unsatisfac-
tory. Inferior quality will not be apparent
to the buyer, for damp grain makes flour of
better color than dry, in consequence
of breaking up part of the bran of dry wheat
and admixture with the flour—the latter
making strong—while damp wheat makes
runny flour. The product of old wheat, or
choice sound new wheat, has become of more
value than that which looks quite as well made
from moist grain, and all markets report sound
grain to be scarce. The subscribers will use
their experience of twenty years in the trade
to procure reliable grades of Flour, preferring
sound good quality, even if at a little higher
cost. The following grades always in stock:
Canada Superior Extra, Canada Extra,
Canada Strong Bakers, Canada Fancy
Western U. S. Strong Bakers,
Patent Process Flour, Minnesota Extra,
CORN MEAL.

INFANTILE TUMOR SCISSORS.—The British
Medical Journal publishes an article by Dr.
Horace Dobell, in which that distinguished
physician states that he has observed a
peculiar and rather common deformity of
the chest is caused by the habit of sucking
the thumb in infancy and early childhood.
He says that the weight of the arm on the
thorax of the child, during sleep, produces
depression of the ribs in the line occupied
by the arm when the thumb is placed in
the mouth. The doctor thinks this a very
important effect of the habit of thumb
sucking, one which has never been pointed
out, and he regards it of sufficient con-
sequence to be put on record for the ben-
efit of other observers.

VENTILATION FOR CYPHOIDS.—In the con-
struction of old houses, and in two many
instances new ones also, a great defect is
to be found in the absence of any mode of
ventilation for the cupboards. This con-
dition is a serious one in all cases, but
especially in those which are devoted to the
reception of food or of dirty linen. In
such cases these closets, with the contents
of become laboratories for the manufacture
of polluted air, which, from time to time,
escapes into the living rooms and makes
itself unpleasantly apparent. The remedy
for this is not difficult; a few perforations
in the door will be found serviceable; but,
if found practicable, the wall of the cup-
board should also be perforated, so that a
through draft could be obtained.

DEODORIZING VALVES.—There are hard and
easy modes of doing things, and it is not
uncommon to select the hardest. We see
in the papers various remedies for dis-
infecting and deodorizing vaults, and among
them is to dissolve a pound of copperas in
a quart of water, and then to pour it down
where needed. This is doubtless effectual,
but there is a much cheaper way of doing
the thing, namely, to use road dust. This
costs only the scraping up, shovelling into
boxes or barrels, and drawing to where
wanted. A barrel will keep a common
vault perfectly free from odor three to six
months, if half a pint or so be each occupant.
Coal ashes, sifted, are nearly as good, but
more is required. The two substances
mixed together make the best purifier. Dry
chemical solution in that it renders the contents
dry, so that they can never affect drains or
sewers, but remain till shovelled out. The
cleaning out is easily done, and our work-
men say they would as willingly shovel
a dry, inodorous substance as to shovel
sod.

TOO LATE FOR THE BOAT.
From the Detroit Free Press.]
The woman who arrived at the wharf
just as the excursion boat had a start of
ten feet did not comprehend the situation
for a moment. She didn't know but that
boats had a habit of starting off and back-
ing up to keep the machinery from getting
rusty. When she realized that she was
being left, she jabbered a man in the back
with her elbow, knocked a hat off with
her parasol, and squealed at the top of her
voice:
'Hold on there—you haven't got
me!'
'Make a jump!' screamed one boy;
swim for it!' called out another; while
the 'left woman' fiercely shouted:
'Why don't some of you folks up there
tell the Captain?'
The people on the upper deck replied by
laughing and waving their handkerchiefs.
The woman on the wharf worried this
question among the crowd, and pointing
her parasol, directly at her holding
it extended, as if taking aim, she shout-
ed:
'You want to understand, Mrs.
Baker, that you can never, never
borrow any more butter or flat-irons of
me!'
What is nothing? A footless stocking
without a leg.

Jokers' Corner.

SUNDAY DINNERS.

The Journal of Health says that talking
at the table is one of the very best diges-
tants. This, then, accounts for the tre-
mendous appetite everybody has for the
Sunday dinner. We never could understand
why, with scarcely any exercise on Sun-
day, the dinner of that day should be heart-
ier than any other dinner. Many real
good Christian people will sacrifice Sun-
day-school, where it is a non sequitur, in
order to get home for a something to eat.
Although the breakfast has been later than
any other of the week, still non brings a
most ravenous appetite. But it is all ex-
plained now. Talking at table does it.
Everybody knows that the Sunday break-
fast is the longest on the coast and is
more talked over than any of the week.
This is the way it comes about. The chil-
dren are to be got up and get ready for
church. It is immaterial to them what
people have been married, the women always
gets the breakfast ready as soon as she
has called the children. They don't come,
a general thing, when they people will
no woman allows this to influence her
actions. She gets the breakfast just as
punctually as if she had never had to wait
for her own children. It occurs to him
that the greatest illustration of the sublime
faith of woman to be found on record.
With one or two of the older children
in the family, the breakfast is a very
surrounding of the breakfast would make
it a repeat of lead were it not for the con-
versation which flows smoothly on. And
the great variety of subjects discussed is
an important element in the development
of the gastric juices. There's her husband
who, getting the breakfast about ready,
thoughtfully arranges his shaving article,
and falls to lathering his face just as he
is called to the table. It occurs to him
that there should be some explanation of
why the meal is always brought on just as
he is called to the table. It occurs to him
that there should be some explanation of
why the meal is always brought on just as
he is called to the table. It occurs to him
that there should be some explanation of
why the meal is always brought on just as
he is called to the table.

What's that, sir?'
'No response.'
'Don't you never let me hear you
talk like that again, sir, or I'll give you
something that'll make your tongue
crawl.'
'There's the other boy, who perceives
some there's no more sugar in it, and
hits upon the bold experiment of de-
claring that there has been no sugar put in it
at all.

'I know better. You stir it up, and
you'll find it sweet enough.'
'But I am stirring it up, an' there ain't
no sugar in it all.'
'There's all you'll get, and you can
drink it or I will. I've got some-
thing else to do besides doctoring you
for worms.'

'Then the father sits down, and is being
held, when another child comes in, and
seeing his mother occupied, looks up to
her to have her apron buttoned.
The temerity of this proceeding although
somewhere near its thousandth perfor-
mance, never becomes sufficiently familiar
to be understood by the mother, and she
bustly observes:
'Get away from here, don't you see I'm
busy?'
The child sniffs.

'Shut up that yawp, or I'll give you
something to amuse for!' volunteers the
father.

'Why don't you snap the young one's
head off, and be done with it?' roars the
mother, dropping her occupation to attend
to the apron.

The father stares morosely around the
table. A moment of silence succeeds.
Then the mother's affectionate eye catch-
ing the vacant expression on the face of
the eldest boy, who has a piece of bread
poised uncertainly in the air, and is evi-
dently allowing his mind to stray beyond
the home circle, she observes:
'Come now, stupid! finish your break-
fast and get ready for church, and
don't sit here gormazing all the forenoon
and afternoons.

He returns to business at once, and an-
other pause follows. Then came the fol-
lowing:
'What you fingers out of that dish?'
'Take me missing!'
'Where's your collar?'
'Have you washed the back of your
car?'
'Why on earth don't you sit up
straight?'
'I'll box your ears till they ring if you
drop anything on that floor.'

'Get out of that gutter!'
'Stop muzzin' that bread!' One would
think you were a drove of young hogs to
see you at the table.'
'Come, now, get right away from this
table! You've eaten enough for twenty
people. I shan't have you muzzin' and
gammung up the victuals. Clear out, I
tell you, and get your Sunday-school les-
sons!'

Appropriate response being made to
these observations by the parties ad-
dressed, the family return from the table
to most again at dinner with rousing ap-
petites.

Let's have more conversation at meals
if we wish to enjoy perfect digestion.
Dumbary News.

What is nothing? A footless stocking
without a leg.
