

CONTENTS.

CHAPTER I.

INTRODUCTION.

Subjects to be considered, indicated.—Total extent of Hudson's Bay and North-West Territories.—They resemble Russia in Europe.—Canada, with them added to it, will much exceed European Russia in extent, equal it in fertility, and much exceed it in maritime advantages—which have been greatly increased by Confederation, with the Eastern Provinces.—Great increase of shipping and seamen thereby.—Importance of adjoining territories to Canada.—Evil of undervaluing even inferior territories.—Territories to be considered, classified 1

CHAPTER II.

EAST MAIN, OR THE PENINSULA OF LABRADOR.

Extent.—Parts appertaining to Canada, Newfoundland, and Hudson's Bay Company.—Early discovery of it.—Physical Character.—Wooded and barren parts.—Resembles Lapland.—Vegetables grow in south parts only.—Main Factory.—Hamilton Inlet; farm there.—Valuable fisheries on Atlantic coast.—Less so on west coast, except for seals 5

CHAPTER III.

SOUTH HUDSON'S BAY TERRITORY.

Extent.—Physical character.—Broad Silurian Plain around Hudson's Bay with clay soil.—Rocky Laurentian formation covers southern and western half after passing through Canada.—Laurentide Range described.—Declines in height northward.—Favorable passage through it for Railway to Red River.—Climate at York Factory.—Cultivation at Albany and Moose Forts, barley, potatoes and vegetables; also, at Ports of Henly, Martin's Falls, Osnaburg, on Albany River and Lac Seul, with oats and wheat at New Brunswick House, on Moose River.—Seasons at Martin's Falls.—Cultivation at Norway House, Lake Winnipeg, and of wheat and Indian corn at Fort Alexander and Lake of the Woods.—Boundary of Silurian Basin of Hudson's Bay.—
