Stewart, W. W.
THE stringency of the money market has caused an 1 almost total suspension of business, every one endeavouring to narrow down his operations within the most prudent limits-following the example of the banks, who are giving out money very sparingly, and doing as little business as possible.
Flour-Has not maintained its value. For several days there were scarcely a hundred barrels sold; dealers who usually buy from one to two hundred barrels at a time, confining themselves to small broken parcels to supply existing and pressing orders. The price, consequently, ran down until ordinary and weak supers are pressing at about $\$ 6.25$, without finding purchasers to any extent, and it is doubtful if even $\$ 8$ would move them in quantity. Strong supers alone have maintained their value, and $\$ 6.50$ may be considered as the rate for choice and faveurite brands' which are scarce. Extras and lower grades are quite unsaleable, no concession in price enabling holders to force off any quantity; of extras especially, the stock is heavy, some parcels having been on hand for several months. Bag-flour is in small demand and supply at a slight decline from previous rates.
OATMEAL is dull and drooping; $\$ 4.75$ is the highost price lately paid for good samples.

Wheat is in small stock, and will all be required for the wants of the local millers before new comes forward.
Phasm-There is no demand at present for shipment the season being over.

Oats are scarce, and wanted for local use. The large quantity sent to Britain has left the market bare for the kome trade.

Pomk-Mess is very firm, and full rates are asked. Transactions are, however, merely by retail; other grades are not in demand at present.
LARD, HAMs, \&c., continue in small supply and demand.

BUTTER-A continuance of the unfavourable advices of the declining:tendency in British markets has caused a total cessation of the demand for shipment.

Stocks are, however, not heary at this point, and the lower prices which holders are now disposed to take will probably prevent accumulation until a demand. once more springs up. It seems now certain thata comparatively low range of prices will be current during the fall. The British advices will be narrowly and anxiously watched for the next three or four weeks, as upon them must depend the future of the article.
Holders in the West will do well to recollect tha from the end of September to the end of October is the most favourable time for shipment to this market for sale or otherwise.
If any demand exists during the whole season, it is almost certain to be most active about the time when there is no risk to the quality from heat, and when usually dealers at home go largely into stock. Later shipments are always more or less precarious, and on the average of years have been found to end in loss.

Ashrs-Pots have declined to 298 again in Britain, with a dull market. Here they are affected by the low rate of exchange and the scarcity of money, so that the price is barely maintained. Pearls : firsts have rather advanced in value, while supers are dull.
