

The number of species that have been recorded from the several states, territories and provinces is here enumerated:

Maine.....	151	La.....	8
N. H.....	74	Minn.....	8
Vermont.....	6	N. D.....	8
Mass.....	62	S. D.....	12
R. I.....	5	Nebr.....	39
Conn.....	14	Kans.....	107
N. Y.....	209	Okla.....	3
Penn.....	143	Texas.....	73
N. J.....	123	N. Mex.....	41
Del.....	1	Ariz.....	70
Md.....	46	Colo.....	268
D. C.....	65	Wyo.....	7
Va.....	17	Mont.....	7
N. C.....	112	Utah.....	61
S. C.....	121	Idaho.....	3
Ga.....	40	Nevada.....	8
Fla.....	128	Oregon.....	11
Ohio.....	89	Wash.....	21
W. Va.....	2	Calif.....	178
Kentucky.....	15	Mexico.....	15
Tenn.....	242	Quebec.....	94
Ala.....	12	Ontario.....	121
Miss.....	40	Alaska.....	11
Ind.....	11	Manitoba.....	6
Ill.....	63	Vanc. Isd.....	19
Wisc.....	208	Brit. Col.....	43
Mich.....	43	Greenland.....	1
Iowa.....	161	Nova Scotia.....	4
Mo.....	155	Newfoundland.....	1
Ark.....	9		

From the figures presented above, the most striking fact that will be apparent is not the number of species found in any one region, but the meagre information that we have concerning the Cicadellid fauna of the majority of the states and provinces. The value of state and even local lists is here quite apparent, through the service that they render in extending the known distribution of species.

It is quite evident that certain sections accommodate a considerably larger number of species of Cicadellidæ than others whose climatic conditions are less varied, but it may be estimated that nearly all of the states should give from 150 to over 250 species. Considering the meagre collecting that appears to have been done in certain parts of our territory the total number of living species of this group will undoubtedly be found to be greatly in excess of one thousand.
