

CHARLES CHANTEAUD'S

SULFHYDRAL

A Preventive and Curative Remedy for all Infections, Contagious and Epidemic Diseases, and in particular

Diphtheria and Croup

Price : \$1.00 Box

The marvellous results obtained by the use of Sulfhydral have been foretold by Dr. Fontaine of Bar-Sur-Seine, who the first one has made use of same as an antiseptic and parasiticide in cases of infectious diseases.

Never before the learned practitioner's discovery could a medical man address comforting words of hope to a mother or anxious relatives of a child affected with the hideous affections. Diphtheria and Croup.

Henceforth, a child suffering of Diphtheria and Croup will not be condemned to die without any hope of saving.

Dr. Fontaine has fully demonstrated that Sulfhydral is a specific against Diphtheria, destroying with certainty microbes of this disease.

Therefore, at present a medical man possess a powerful weapon which enables him to subdue this terrible *Diphtherical Membrane* even if it has reached the larynx.

In all cases of Diphtheria and Croup, Charles Chanteauds' Sulfhydral is indispensable to complete Dr. ROUX'S Serum Treatment.

But the beneficial action of Sulfhydral do not end here.

Wherever microbes or bacillas must be destroyed, wherever their proliferation must be stopped, it is used with the greatest of success.

In cases of whooping coughs, eruptive fevers it affords the most effective results. It overpowers the most violent erysipylis in a few days.

In brief, it is a precious remedy, harmless in itself and has been administered in great many cases with success before the physician's arrival.

The dose is from six to twelve Granules a day as a preventive. It must be given until the Saturation has produced the desired effect.

Antinauseous Granules of Chs. Chanteaud

A preventive and sure cure for "Sea Sickness"

Amongst a great many affections, there is perhaps none that medical men have given so little attention to, as to the fearful indisposition called "Sea Sickness." One hundred and more remedies have been repeatedly tried to overpower that helpless disorder, which in itself sometimes is worse than a real sickness, and has been abandoned as so many failures.

The *Dosimetric Medicine*, has formulated a genuine treatment for that "Sea Sickness" and the efficacy of said treatment leaves no doubts as to the results, in presence of numerous success. Experiments of many years have permitted to verify and still allows to verify this assertion every day.

Charles Chanteaud's Antinauseous Granules are composed of following formulæ.

Sulphate of Strychnine	$\frac{1}{2}$ milligram.
Hyociamine	$\frac{1}{2}$ do
Bromhydrate of Morphine	1 do

Nota.—The Granules being like all dosimetric remedies, preparations of great activity they only can be obtained at the druggist's on a physician prescription.

Price of Box : \$1.25.
