KING'S COLLEGE COMMENCEMENT.

This interesting occasion, which was celebrated with the usual observances on Thursday last, was the Second Triennial Commemoration. Although the weather was unfavourable, the attendance was large, and the Hall, indeed, did not seem to us to have lost many of its wonted assemblage.

> SEPTEMBER CONFIRMATIONS. (Continued from our last.)

On Tuesday the Bishop proceeded through a capi-(or plaster of Paris) dug in its neighbourhood. We observed, also, traces of of the clay fit for making the white bricks, and found that it is not entirely unknown applied it to its proper use. The walls of the Church, and some of the houses of the place, are faced with large round pebbles, or boulders, placed in layers, and have accordingly a very neat appearance. Some of the houses are built in one of the peculiar fashions which prevail on the other side of "the lines;" and although the is due to such a place, as to one solemnly dedicated to pattern be not very admirable in itself, it certainly adds to the picturesque in the appearance of the Thus, for instance, persons bring their dogs to such town. The Church is not strong here; but we trust a place without feeling any impropriety in so doing; produce a steady improvement. We noticed several persons in the congregation, whom we afterwards understood to be dissenting ministers; we therefore trust they will be profited by the Bishop's exposition of the claims of the Church of England. One of the candidates for confirmation here was a student in the Diocesan College at Cobourg. By what accident his confirmation could have been so long delayed we did not hear.

Through some misunderstanding we had to return the next morning to Princeton, a village through which we had passed on our way to Paris. There the Church is just struggling into light. The inhabitants have hitherto been under the charge of the Rev. W. Bettridge, and have erected a frame Church. It was, however, so unfinished that it was with difficulty that a firm position could be found for the chairs near the altar; and the carpenter's bench was still within the walls. There were not withstanding a few candidates, all, for a wonder, of the male sex. The Bishop exhorted the people to make strenuous exertions to render Six were admitted to the Degree of M.A., which, their Church somewhat more worthy of God's service. FIRE. We are indebted to the Globe for the following injury to one of the first of our mercantile establish-

" A fire broke out about four o'clock on Sunday morning last, in the shop occupied by Mr. E. H. McSherry, hatter, on King Street, one door east of Yonge Street. The fire began in the back shop, but soon spread throughout the building, none of the contents being saved. The flames rushed with great violence of the contents flames rushed with great violence out of the window of the house next to the shop of Messrs. Betley & Kay, and we regret to say, the window sash of the show room, and we regret to say, the window sash of the show room, on the second story caught fire, which communicated to the light goods lying about, and the room filled with the richest fancy articles, of great value, was speedily enveloped in flames. The fire also communicated to the dwelling on the story above. The engines were now on the ground, and the devouring flames were speedily stopped in Messrs. Betley & Kay's premises, but much damage was done by the water, and in the removal of the goods.

The fire spread but little to the east, the shop of Mr. Ellis, watchmaker, being but slightly injured, though that gentleman suffered severely in the removal of his goods.

As to the loss of property it is difficult to arrive at any near estimate. The building in which the fire broke cut, which he little wars the which has little more than the walls standing, and that occupied Mr. Ellis, are owned by Mr. Walker, of Messrs. Walker & Hutchinson, who is insured for £700 in the British America, and £200 in the Quebec, which will cover the loss. Mr. McSherry, or rather Mr. M. O'Donehoe, to whom the stock had been assigned, was insured in the Hartford Protection Company for £400. As to the loss we cannot tell. Messrs. Betley & Kay were insured for £5800 in all; in the British America and Montreal £1500 each; in the Mutual and Phænix, £1000 each. This may cover the loss of property, but the interruption to their trade at this, the busiest season, must be a serious injury to them, in which affliction their fellow citizens sincerely sympathise. We trust that the interruption will be of short duration, and that the firm will soon resume its business, with its usual energy and activity. Captain Strachan, the owner of the building, was insured for £200 in the British America, which will amply cover the loss on the house. Unnecessary damage was done to it by the mad zeal of some of the parties who dashed in two of the splendid plate glass windows instead of seeking ingress by the doors.'

THE FIFTH OF NOVEMBER. On Sunday first this anniversary occurs, - and we cannot doubt but that it will be fittingly commemorated and improved, by every English Catholic Churchman. There is much in the present aspect of affairs, to call forth our special supplications on this occasion. In Ireland a conspiracy has just been beautiful samples of raised work, embroidered chairs, frustrated, which had it been successful, would, like &c., in juxtaposition, with patchwork quilts, worsted the Gun-powder-treason, have struck a stern blow stockings, and other articles of the more useful desagainst the Church of Christ. And the ministers of our Protestant Queen have proclaimed their intention of endowing, if possible the schismatical Popish Bishops in that land, where the waters of the Boyne, and the war-worn wall of Derry bear witness, that the last of an ancient line of monarchs lost his Crown for water colourings and oil paintings, and a greater proa corresponding, but not more aggravated attack upon portion, remarable more for their absurdity than for our Constitution, Civil and Ecclesiastical,

NOTES OF AN EXCURSION IN THE UNITED STATES. Addressed to the Editor.

New York, Sept., 1848. My dear Friend,-I must wind up with all speed and brevity my review of this city, for I have a flying

I said in my last, I would describe to you the process of organizing a Church in these parts. First of all, the congregation is to be gathered. A Bishop sends a clergyman to a particular spot, or a clergyman with an unwieldy population on his hands, canonically nvites a brother-clergyman to come, and commence the formation of a new parish. Observe that "parish' means not a district as in England, but persons-the persons worshipping in a particular church. Or, a clergyman in a city, finding in the course of time, that many of his congregation have removed, or from one cause or another reside at a distance from the church, himself begins to establish a new congregation in a locality more conveniently situated for these his parishmpelled by a similar feeling to that which already thrusts forth colonies from the old States to advance westward and establish new homes in the vast unoccupied regions towards the Rocky Mountains, a clergyman, without having any positive necessity for so doing, relinquishes into other hands a charge which in the world, he has brought to a degree of maturity, and proceeds into some populous and necessarily neglected quarter of the locality where he laboured before, and commences the formation of a new parish.

In every instance the mode of gathering the ἐκκλησια proper situation, generally some "large upper chamber"

tion, and the general inability to afford the expenses of a small log cottage which still exists within the town, &c., being in a good Church style—by a young lady, his remains to the grave, and much kindly regard has tinction last year—in the other description of grain, rate body for holding lands and other civil purposes; there was very much competition. One remark too I have to make in respect to the does also so lamentably with us, that it is sufficient

only to display the skill of an organist and the splendour of two or three voices, the music to me was not satisfactory; was not at all answerable, in my opinion, to the will and intention of the Church, which desires that the great congregation should take loud and united part in all portions of divine worship.

As arrangements generally stand now, there are, you may be sure, numbers in every congregation who have sufficient musical ability and taste to join in a psalm or a chant, but who, from an innate diffidence, are afraid to do so, because their voices, when they exert them, seem to be, as it were, so exposed. This would no longer be the case, there is reason to believe, were the leaders of the singing, the inanimate as well as the animate, - I mean both the instrument and the would then feel themselves encouraged to sing.

As you meet with great intelligence in Churchmatters, and indeed in most other matters, among the lay-people here, so you find also, that there necessarily exists great intelligence on the same subject among the clergy. I have, indeed, been fortunate enough to be thrown among some of the elite of the clerical body. You find among these, principally, I imagine, through the influence of the General Theological Seminary, men who, in addition to being personally pious, are also as the Apostle would have Christians to be, ov παιδια ταις φρεσιν,-men who have studied the subjects of Christianity and the Church as scholars and real philosophers-men who have advanced beyond the region of mere feeling and opinion, and who can delightfully and instructively converse with you on the common tangible ground of historical research and scientific knowledge.

I assure you I shall come back to my humble and bscure labours in -, [the M.S. is not clear; quære Mono? where still, alas! even in this intelligent and enlightened day, to too great an extent
