* Discrepancies between these figures and those appearing in the Recapitulation Issue of CANADA AT WAR are due to a new basis of computation recently adopted by the Dominion Bureau of Statistics.

- (1) Excludes forest products originating on the farm, whether used or sold by the farmer.
- (2) The difference between the marketed value of fish and the net value of production is the cost of salt, containers and other materials used by canning and curing plants.
- (3) Value of wild furs only--fur farm figures included in agriculture.
- (4) Includes sawmills, pulp and paper mills, fish processing and certain mineral industries, which are also included in other headings above. This duplication is eliminated from the grand total.
- (5) Includes duplication mentioned in footnote 4.
