

distancing itself from such destabilizing activities and by promoting its traditional role as the honest broker in peacekeeping.

Science for Peace and all Canadians, including the Liberal party, call upon the Conservative government to discontinue testing of the cruise missile over Canadian soil.

TRADE

Mr. David Barrett (Esquimalt—Juan de Fuca): Madam Speaker, recently a documentary film was made in the United States that attacked the president of General Motors. The name of the film was *Roger and Me*. Canadians who saw the satirical documentary felt chagrin and anger with American workers who suffered under Roger Smith's arbitrary closure of Flint, Michigan.

Now we discover that the same Roger Smith is pulling the same stunt here in Canada with the Boisbriand closure and 1,700 jobs down the tube. In the film we saw the slogan: "What's good for General Motors is good for the U.S. government". We are getting the supplementary here in Canada: "What's good for General Motors is good for the Mulroney administration."

The government loaned \$220 million to General Motors and now it is closing down this plant. If it is a bunch of what you say it is, why does the government not do something about it? It is caving in to General Motors again.

GLOBE 90

Mr. Stan Darling (Parry Sound—Muskoka): Madam Speaker, from March 19 to March 23, I had the honour and privilege of attending Globe 90 in Vancouver, British Columbia. The Globe 90 conference and trade fair provided a forum and focus for global opportunities for business and the environment.

Close to 4,000 persons were in attendance, and some 60 countries exhibited in the trade fair. There were many

S. O. 31

outstanding presentations made by experts from every conceivable field of the environment.

All levels of government were represented with about 20 members of Parliament and senators in attendance. Premier Vander Zalm of British Columbia and his Minister of the Environment, the Hon. John Reynolds, were keynote speakers at the opening, together with Maurice Strong, an outstanding environmentalist.

I also wish to acknowledge His Honour, the Speaker of the House, the Hon. John Fraser, who was also a keynote speaker and honorary chairman of Globe 90.

Madam Speaker, I left Globe 90 with a great feeling of optimism about the future of the environment. Between the creative approaches of the private sector and the commitment by all levels of government to make the environment a high priority, we may all yet look forward to a brighter future.

WOMEN'S WORLD ICE HOCKEY CHAMPIONSHIPS

Mrs. Marlene Catterall (Ottawa West): Madam Speaker, a historic event took place in the nation's capital last week, demonstrating once again that Canada can welcome the world with flair and style, that Canadian women can compete with the best in the world and, further, that Canadian women are ready to take their place in any job, any profession, any role the world has to offer.

I want to congratulate Team Canada on winning the gold medal yesterday at the first ever International Women's World Championships in hockey.

With strength, speed and style, our hockey players skated to a five to two victory and came out of their five game tournament undefeated while competing against the best from around the world.

Organizers and sponsors of this world class event, held right in this city, can be commended for their excellent efforts. We are well-known around the world for our love of hockey, and this landmark victory for our women's team proves that Canada is determined to make hockey history. If we ever needed proof we have it now that women's hockey is ready for the Olympics.
