

# Hollinger Up 70 Points—Other Gold Stocks Firmer

## Hollinger Takes Another Flight Whole Market Turns Brighter

### Star Performer of Porcupines Gives Another Exhibition of Buoyancy —Some Advances Shown in Cobalt Issues.

**World Office.**  
Thursday Evening, April 20.  
A rapid upward swing in Hollinger shares served to change sentiment in connection with the whole list of gold stocks to-day, and the gold stocks gave a better account of themselves than for some days past. There was in reality nothing on which the movement in the cheaper issues could be founded, outside of the turn in the trend of the larger shares, consequently the advance was set down as a pure reflection of the appreciation in values elsewhere in the market.

Hollinger sold at the opening of the exchanges around 82 1/2, which point the closing sales were made yesterday, but it was not until the stock was soaring, the price touching 83 1/2 before the closing supply of stocks was reached. The advance has been rather quiet of late, and to-day's action was taken as another of those erratic movements, which call for explanation in view of the results at the mine and the exceedingly small amount of stock available in the market.

The cheaper Porcupines recorded advances running from large fractions to two and three points from yesterday's closing levels, but in numerous instances the top prices made yesterday were not regained. The buying was of a responsible nature throughout, but the floating supply of stocks was too large to permit of anything but small advances, and these were not carried to any great extent in consequence of the small volume of stock.

In the Cobalt higher prices were made by such issues as Ophir, Timiskaming and City of Cobalt, while the shares of the cheaper stocks, such as Gifford, turned slightly firmer. The movement in the silver mining shares was brought about by the improved call for stocks at a time when the offerings were none too free. Trading fell off considerably, but this was due to a shrinkage in the volume of stock, selling orders more than anything else.

### MINE IN GOOD SHAPE And Ophir Stock Begins to Pick Up on Good News.

The sharp upward movement in Ophir shares yesterday followed directly on the announcement that this property was being shown up by the shape than ever by recent development. At the 300 foot level some 500 feet of cross-cutting has been done on the Ophir, and the work cut in this work, owing to the lack of power, however, the management were forced to discontinue operations at this level for the time being. The volume of the power companies are able to renew the supply of energy for the mines, the company will put the force of men to develop this strike, and interesting results are expected.

Only about one-third of the Ophir property has been prospected up to the present time, but the results which have so far been realized the management expect to put the mine in shape to become one of the big things of the Cobalt camp.

**Circular on Ophir Mine.**  
In order that the shareholders of the Ophir mine should have more accurate information as to the recent developments on the property, Mr. W. Murray Alexander has issued a circular letter which goes into detail regarding the conditions at this mine.

**Porcupine Prospects.**  
Prospectuses of the Apex and Moneta Porcupine mines were issued yesterday and are being distributed to the shareholders and the public who are interested in the properties.
