Brompton Has a Busy Market Pending the Dividend Declaration.

3. S. PREFERRED LOWER

Midsummer dulness seized the Toronto Stock Exchange yesterday and the dealings, speculative and otherwise were of small dimensions. There was an entire absence of buoyancy and some of the speculative stocks were easier. The market for Brompton shares was kept interesting in view of the expected announcement following the close. No new high price was made, but the fluctuations offered great opportunities to the floor trader, mainly on the Montreal exchange. The directors' announcement was just about as anticipated and as long as it lasts a dividend of 6 per cent. will be paid on a current valuation of the new stock at almost \$68 a share. In the purely local issues there was little business. Porto Rico fell back to 46. Brazilian about held its price, and Steamships preferred was again under pressure. Hamilton was in some demand in the banks owing to the adjustments necessary to take advantage of the new stock issue. The bond market was quiet with a falling off in the transactions for the government war issues.

HolMnger in the face of reasonably large earnings for the first five months of the current year was pointed to as confirmatory evidence of the rumor.

GOLD MINES TO CLOSE

In discussing the action of the gold stocks yesterday, one mining broker gave expression to the belief that an early shutdown of the Porcupine mines was a possibility. He had information, he said, that this action was certainly contemplated by the Hollinger directors, and from deductions he thought the other two large operating companies would follow suit. Queried as to the reason, he said that it was the opinion of mining men that only in this way could any proper solution of the labor situation be effectually obtained. The selling of Hollinger in the face of reasonably large earnings for the first five months of the current year was pointed to as confirmatory evidence of the rumor.
