

MINIMIZE THE FIRE PERIL BY USING EDDY'S

CHEMICALLY SELF-EXTINGUISHING "SILENT 500'S" The Matches With "No Afterglow." EDDY

is the only Canadian maker of these matches, every stick of which has been treated with a chemical solution which positively ensures the match becoming dead wood once it has been lighted and blown out.

Look for the words "CHEMICALLY SELF-EXTINGUISHING" on the box. THE E. B. EDDY COMPANY LIMITED HULL, CANADA

SAYS ALCOHOLIC BREATH OF HUBBY KILLED DOGS

New York.—The details of the matching from this life of four brindis Boston bulls in the prime of their puppyhood were recited when Mrs. Esther Kipner reviewed her married life in the court of domestic relations. She made it clear that the quality of mercy needs in some instances, to be strained, lest it fall like a gentle half barrel of distilled liquor upon the unaccustomed thirst of an infant bulldog.

After explaining that Mr. Herman Kipner, her husband, does not return to his home until every other place is closed; that he has given her to have and to hold \$9 since they were married in 1909, and that he regards work as a viper to be strangled with indifference, Mrs. Kipner described the demise of the four puppies.

"Only last week," she said, "our bulldog, Ida, had a family that would have been worth \$200 if it had grown. My husband went to a veterinarian and the doctor told him if they wouldn't take milk out of a saucer to put some milk in his own mouth, put a nipple in his mouth and feed them that way, just like dog fanciers do. At first he didn't even want to do it."

"Wah!" said the court, "and what has that to do with the case?" "Because when he did do it, I tell you, the dogs died of alcoholism. I want him to stop drinkin', that's what I mean."

HE'D BE TOO POLITE. "What dirty hands you have, Johnny," said his teacher. "What would you say if I came to school that way?" "I wouldn't say nothin'," replied Johnny. "I'd be too polite."

PURITY FLOUR

with its stored up wealth of nutriment, the perfectly milled product of the sturdy wheat of Canada's famous wheat lands, furnishes the thrifty housewife with the logical solution of her problems in meeting the expensive living of these days.

With her delicious, even-textured bread; tasty, light, white cakes and crisp, flaky pastry she satisfies the appetites of her family, while economically furnishing them with the nutriment necessary to their health and strength.

ANNOUNCEMENT Handsomely bound in grey and gold the PURITY FLOUR COOK BOOK offers 150 pages of the latest tried information upon the preparation of all manner of nutritious dishes—from delicious and strength-giving soups to dainty, tasty desserts. A work from the pen of Miss E. Warner, Specialist in Dietetics and Domestic Science Expert, and carries the approval of the famous Macdonald College. Its text is in the easily understood and non-technical language of the home kitchen.

Mailed postpaid on receipt of 20 cents. WESTERN CANADA FLOUR MILLS COMPANY, LIMITED TORONTO—WINNIPEG

A NEW COOK-BOOK IS BOON TO COOKS

Appearance of Purity Flour Cook-Book Comes at Very Opportune Time.

The cook's best friend is the Purity Flour Cook Book, which makes its appearance at the moment when the question of food and its conservation is occupying the thought of the brainiest men and women of the day, and when anything that can help to the solution of culinary problems is a benefactor of the public.

Generally speaking a cook book is no new discovery, but a volume which contains within its pages recipes that cover foods and drink of endless variety for the home or restaurant, all tested by up-to-the-minute experts and directions for which are told in brief simple language, is something rare enough to be a novelty. Often times the cook book which is meant to be of service in the kitchen is laid away on the topmost shelf, because its information is clothed in such a plenitude of words that the meaning is lost. One glance at the Purity Flour Cook Book gives it an assured place at the right hand of the woman whose realm is the up-to-date kitchen.

The Western Canada Flour Mills Co., Ltd., in issuing this attractive cook book have departed from the usual path by not confining their publication to foods made from their own special product, but have added recipes for many varieties of food. Two years were spent on the preparation of the Purity Flour Cook Book, which was edited under the expert supervision of Miss E. Warner, specialist in dietetics and domestic science at the now famous Macdonald College, the name of which is in itself guarantee for the work that comes from the pen of a member of its staff.

Food palatably prepared is food conserved, waste in many cases being the result of bad cooking. The recipes of the Purity Flour Cook Book represent foods evolved with regard to the mixture of ingredients that will give best results from the point of nutrition and digestion, as well as foods acceptable to the palate. These are the things for which modern dietetics stand, and there is nothing in Canada more authoritative than the college from one of whose staff the book emanated.

The Purity Flour Cook Book is published in clear, readable type, and on fine quarto paper, the cover being in an aesthetic design in grey and gold. It may be commended because of the fact that it contains more recipes than are often found in a cook book costing from \$1.50 to \$2.00, and will be mailed post paid to any address by application to the Toronto office of the Western Canada Flour Mills, Ltd., by mentioning The Toronto World and enclosing the nominal price of 20 cents.

WHAT THE DICKIE BIRDS SAY.

Sometimes a bird tells you things. If it is unpleasant gossip beware of that bird. She is a decidedly bad bird, as Trollope says, and not at all fit to take the place of a domestic hen in a decent farmyard. Sometimes the bird tells things that are wildly untrue. That's the kind of carrion bird that the keeper and the crown prince use for a carrier pigeon.

LARGEST KITCHEN IN WHOLE WORLD

Hotel Commodore Will Serve Ten Thousand Meals a Day.

The fry cook, the fish cook, the roast cook, the sauce cook and the pastry cook and other chief cooks, will each have separate quarters, with a great section of range and personal staff of assistants in the gigantic Commodore Hotel, now being built at Forty-second street and Lexington avenue, adjoining the Grand Central terminal, New York. John McE. Bowman, president of the Bitmore, Manhattan and Ansonia Hotels, is president of the company which will own and operate the hotel; it will be managed by George W. Sweeney, vice-president.

Plans for the kitchen, which, it is said, will be the largest in the world, have just been completed by Warren & Wetmore, architects of the hotel. In the kitchen, 10,000 meals a day will have to be prepared. The kitchen will form a long chain of rooms, floored with marble, walled with white tiles and divided into working compartments, with counters of glass and white Carrara marble. The kitchen, Mr. Bowman said, is the seat of a hotel. Leony C. Derouet, who has become widely known since he cooked the grand dinner some years ago for Bradley Martin, will preside over the Commodore's kitchen.

4000 to Work in Hotel. Of the 10,000 meals to be prepared each day, 4000 will be for employees. A battery of brass pneumatic tubes will bring down the orders from the various floors, and electric elevators will shoot back the dishes. In addition to the preparation of meals for those who will stay at the Commodore, elaborate dishes for public and regimental dinners, wedding parties, balls and receptions will be prepared in the banquet kitchen, which will be 145 by 54 feet wide.

The meals for employees will be served in a cafeteria. The main kitchen will be 200 by 64 feet. More than a hundred cooks will be employed there under the direction of the head chef, the under chef and the night chef. An elaborate venting system will eliminate all excess moisture and odors. Dishwashers to be Noiseless. There will be a dozen or more economical dishwashing machines, operated by electricity. They will have a capacity of from 500 to 800 dishes an hour. There will be three mammoth ovens for the baking of bread, rolls and pastry. The baking department will be presided over by the head chef, head baker and seven assistant bakers. In this great bakery 10,000 rolls a day will be baked and over 600 loaves of French bread, brown bread, English muffins, popovers, etc.

The kitchen equipment will be of the latest type. There will be enormous soup cooling devices, steam serving lathes, automatic egg boilers, electric silver and knife cleaning machines, quene and vegetable preparing machines, vegetable steamers and boilers and innumerable other utensils.

Fifteen Butchers in Kitchen. Above the main kitchen will be the preparatory kitchen, divided into departments. For instance, in the preparatory kitchen there will be the butcher's department, under the supervision of the head chef and head butcher, who will have fourteen assistants, divided into three small departments—first, five butchers for meat; second, six butchers for chicken, game, etc.; and third, three butchers for fish.

PAPER SUBSTITUTES FOR WOOD AND TIN

Hard Paper Used for Containers and Other Articles, in Place of Wood.

Many containers and other articles, formerly made exclusively of wood, tinplate, vulcanized rubber and metal or fibrous materials, can now be made of paper at lower cost and equally serviceable by means of special machinery which winds paper with adhesive on one side, into tubes or barrels in an infinite variety of sizes and shapes. The times being especially opportune for such substitutes, hard-paper products may soon replace wood for shipping packages, large and small; also for machine rollers such as split pulleys, harvester rolls, tool and other handles, and many purposes in the electrical industry.

Paper containers may also replace tin for canning fruit and vegetables, thus solving an urgent war-time problem. The one-quart size with a thin interior coating of some rubber preparation is said to make an ideal can for preserved fruits. Moisture-proof shipping barrels of hard paper are much cheaper as well as much lighter than those of wood, a half-horsepower in wood costing \$1.25, while the paper can can be furnished for 80 cents. The shipping advantages of paper containers are obvious. Oils, paints and the like can be shipped in them as well as in galvanized or steel drums. Even the steering wheels of a familiar automobile, it is said, are soon to be made of hard paper.

GREAT SHIPWAYS NEARING COMPLETION

Eastern Shipbuilding Company Erecting Special Set of Ways.

To facilitate the construction of one of our big battle cruisers, an eastern shipbuilding company is erecting a special set of ways at a cost of about \$500,000. The fact is particularly interesting because the structure will be 300 feet long, which will give it the distinction of being, so far as is known as large as any in the world. It will be provided with electric cranes of great power and other equipment of the most modern type. The foundations, keel-supporting crib, launching ways, keel-supporting crib, launching ways, and blocks are to be of concrete.

EARNING HIS KEEP.

"Why don't you get rid of that dog, son? He's useless and has no spirit." "He's a big help to me in the junk business, dad. Comes home nearly every day with a kettle tied to his tail." Louisville Courier-Journal.

FOR A FEW DAYS LONGER

The Ridpath Library of Universal Literature

In Twenty-Five Volumes, at Almost One Third the Price Formerly Charged.

GIVES the biography and bibliography of all the prominent authors of all lands and all ages, showing their trials, their successes, their ambitions and their accomplishments, with critical estimates of their place in literature, by prominent critics. This latter feature alone makes the work invaluable in aiding us to form our own conclusions of an author's standing.

PRESENTS the masterpieces of extracts from each author in an entertaining and instructive manner, so that the possessor of the Library has at all times at hand a literary reference work; in short, a bird's-eye view of the literature of the world.

CONTAINS a remarkable portrait gallery of world-famous authors and illustrations of famous masterpieces of literature and famous artists, copies of rare portraits and paintings, comprising a real portrait gallery in photogravure, engraving and Japan vellum.

SAVES TIME, to the busy man, the student, the teacher or professional man to whom a thorough knowledge of the world's literature is indispensable, but who cannot take a special college course, and who could not wade through the thousands upon thousands of books already published to attain that knowledge, even though the means were at hand to purchase them.

Never Before Sold for Less Than \$77.00.
