

THE PROPERTY OF  
Trinity Medical College.

the comfort and convenience of the large and constantly increasing number of students in attendance. To meet the requirements of the very large Anatomy classes, a new Dissecting Room—very spacious, also lighted from the ceiling, and which, for SANITARY REASONS, is entirely separate from the rest of the College Building, has been recently built. It is furnished with every modern requisite of a Dissecting Room.

Trinity Medical School is an independent Corporation, entirely separate and distinct from every other. Under its special act of incorporation the School Corporation is empowered to enter into affiliation with any "University or Universities" with which it may be desirable, in the interests of the students, to have it connected. The School rests on the broadest possible basis and is in affiliation with

The University of Trinity College,  
The University of Toronto,  
Queen's University,  
The University of Manitoba.

Students attending Trinity Medical School have thus every advantage which University connections afford, under which they can, by conforming to the curriculum laid down by the several Universities named, go up for their degree, before any one, or more of these. And in addition, they can, if they desire to do so, present themselves for the School Examinations, as laid down in this announcement, which are equivalent in every way to those required for University Degrees in Medicine, and if successful, obtain the "Fellowship by Examination" diploma. This qualification is fully recognized, separately, and conjointly, by the several Examining Royal Colleges of Physicians and Surgeons in Great Britain. Under its special act, this School is represented on the College of Physicians and Surgeons of Ontario, and has therefore every privilege enjoyed by any medical teaching body in the Dominion.

The "Fellowship by Examination" Diploma entitles its holders to go up before the Royal Colleges of Surgeons and Physicians in Great Britain, with precisely the same exemptions from various parts of the examinations as are allowed to holders of University Degrees.

Full instruction is given in Trinity Medical School in all the subjects required for degrees in Medicine, by the University of Toronto, including Biology and Comparative Anatomy.

The Faculty has been greatly gratified with the high standing uniformly taken by the students of Trinity Medical School at the various examining boards before which they have presented themselves.
