# RECOMMENDED

A prominent physician made the remark recently that if people were half as particular in regard to in-ternal cleanliness as they are about ternal cleanliness as they are about external appearance three quarters of our ordinary ailments would be eliminated. This medical man said people did not stop to think of the importance of keeping the system just as clean as one is careful to keep hands, face and body. The result is that the intestinal tract becomes clogged and waste material which should leave the body daily stays there for an indefinite period doing a harm few people realize. So many ills are traceable to these clogging poisons! An internal bath sounds novel, but it is much easier to take than any other kind! A spoonful of Sal Lithofos before breakfast (or any other meal), dissolved in a glass of tepid water acts as a gentle cleanof tepid water acts as a gentle cleanof tepid water acts as a gentle clean-ser of the bowls—provides a sooth-ing internal bath that rids the body of dangerous toxic poisons and gives one that feeling of freshness, vigor and well-being. A further advantage of the internal bath lies in the fact that a healthy body ensures an alert and active mind which makes for greater efficiency and happiness in one's daily work.

"It would have been silly and mischlevous enough if written by any journalist in Fleet Street," Truth, an independent journal, says, referring to Lloyd George's strike article, "but, being written by a retired Premier of Great Britain, it reads like the work of one temporarily bereft of his senses." Ironically, Truth adds: "It is to be feared a serious slump may follow in the American market for copy from our unemployed statesmen."
