THE EMPTY PLACE. Bright faces come and go, far shapes Dance up and down the wall ; A presence in the crowded room Takes precedence of all.

We see it night and day, howe'er By shine or shadow cre A little vacant spot, wherefrom One little tace is lost.

The sound of music swells and falls, And laughter fills our ears,

A silence, hollowed out of life. Is all our spirit hears. That silence, like a hush of prayer,

Can drown the loudest spe And piercing sharp through hugh snd song Our inmost sense can reach.

O little garments in the drawer. With such precision spread ! O little chair against the wall ! O little cradle-bed. Uncurtained, in the silent room, And pillowless and cold ! O inother's arms and tender hands, That have no babe to hold !

We know full well the world and wealth Of which we are bereft : But where our words wherewith to tell The emptiness that's left !--Wherewith to span that shoreless void
